PRYOR'S OINTMENT

IS A SPEEDY CURE FOR

Blind or Bleeding Piles, Hemorrholds, Sores, Ulcers, Tumors, Itching of the Parts, Fistulas and all Kindred Diseases; also of Burns, Corns, Felons, Fever Sores, Scald Head, Tetter, Sore Nipples, etc.

Atlanta, Ga., August 25, 1877.

After an experience of twenty-five years in selling this ointment, and during that time having closely watched its effects, and having the testi-

mony of my friends and neighbors to confirm my confidence in its merits, I became fully satisfied of its value, and I have bought the exclusive right to make and sell it, and offer it to you as the best remedy in the world, especially for all forms of

READ THE TESTIMONIALS:

This is to certify that I have tried Pryor's Pile

Ointment in a case of piles, and state that it gave more relief than anything I have ever tried. I fur-

ther state that as a remedy for burns it is unpar-alleled. I also used it for a case of tetter in my

feet of twenty years' standing, and say that it is the first thing that I have ever tried that gave me more than momentary relief. I consider now that I am entirely relieved from that distressing dis-

THE NEW COMET.

Prof. Boss Thinks It Must Fall Headlong Into the Sun -- A Startling Hypothesis Advanced.

WASHINGTON, Sept. 20.—Prof. Lewis Boss, of the Dudley Observatory, Albany, is now in Washington on his way to Santiago de Chile, where he is to observe the transit of Venus. Prof. Boss said to-day, concerning the comet now to be seen near the sun: "I have scarcely a doubt in my own mind that we are actually witnessing a return of the great comets of 1843 and 1880. I believe that the perihelion passage will be found to have occurred some hours previous to Greenwich, midnight of the 17th, and that the orbit will be found to be elliptical, with a period of less than three years. We may, therefore, expect the comet back again in 1884, if not sooner. At each fresh plunge into the solar atmosphere the comet, which at that time is moving with the enormous velocity of 370 miles per second, will be impeded in its flight. The result of this will be to make the intervals between successive returns continually diminish in length. Hotter and hotter will become the mad flight of the splendid comet under the allpowerful and increasing attraction of the sun. At last, and as I believe before the close of the present century, the comet on some of its recurring approaches to the sun will meet low down in the solar atmosphere an obstruction

too great to be resisted. THE COMET'S TURKISH BATH.

"It will then fall headlong into the sun and vanish from the catalogue of comets forever. This catastrophe may occur next year or some years later, but I believe it must come sooner or later. I am more inclined to believe that the destruction of the comet will take place suddenly rather than by a gradual wasting away. It is even possible that this event will occur without our knowledge, but if we are fortunate enough, sometime when the comet is on its homeward journey to the sun, we shall watch him gradually approaching the great luminary of day until cast in his rays, and then we shall watch in vain for his emergence. This may seem to be a bold prediction, and I may have made some error whose existence I do not now suspect. If so I shall be glad to have it pointed out, and at all events shall watch for the first rude elements of the present comet which are yet to be completed with fervent interest." If this proves to be a return of the Gould comet of 1880 it 26th of September it will be about twenty degrees west of the sun. It will the 19th, or only about one-half as bright as on the 10th of September. On October 10th its distance from the sun will be about forty degrees west, and it will only be one-fifteenth part as bright as on the 19th. It will probably still be seen in large telescopes, though to best advantage in equatorial latitudes. Short as this period of visibility will probably be, it ought to be long enough te enable astronomers to reap an abundant harvest of observations, which shall settle the form of the orbit within narrow limits and determine with certainty whether the hypothesis of Prof.

Boss be true. The observer of the new comet at the Natal Observatory this morning says; "It was a very prominent object, rising about half an hour before the sun and to the southward of it at ten or twelve degrees. The comet was very plainly seen with the naked eye after suprise. About 7 a.m. it was easily followed with the telescope. This is the third instance in a hundred years of the observation of a comet in broad daylight with a Meridian instrument."

How the World Goes Right Along About Its Business.

A Bear who had made himself believe that he had the worst luck of any animal in creation, was crawling through the woods one day when he met a Serpent, who inquired: "Which way now, my Friend?"

"I am going to find some spot where I can retire from the World. The World has not used me right, and in revenge I will desert it." "I wouldn't do that." "But I will. I can no longer trust

anybody. I have been cheated, lied to and misused until I have no faith left. I will now retire within myself, and if any convulsion of Nature takes place the country must not blame me for it. I have borne all that one Bear can be expected to put up with.' Bruin went his way until he found a lonely spot, and he then crawled into a

hole and began listening for the Crack of Doom. It made him feel good to think that the world was turning itself bottom side up because he had absented himself from sight and search, and he was determined not to yield until after several thousand terror-stricken people had come to him with tears in

Much to Bruin's surprise, the night passed like all other nights. No one appeared during the forenoon to plead with him, and the afternoon passed without an earthquake or tornado. He momentarily expected the advent of a crowd to plead with him to come back to the World and have faith and confidence, but the crowd didn't show up. After a long and hungry night Bruin began to weaken. After much argument with himself he crawled out of his den, and was sneaking through the woods, when he met a Hare. "Is the world yet standing?" asked

"Certainly, never was more solid since I can remember." "And is any one searching for me?" "Not that I know of."

"Everything goes on just the same, "Just the same." "And didn't you hear that I had lost

all faith in human nature, and retired from the world?" "Never heard a word of it. Tra-la old man, I'm off."

The Bear sat down on a thistle and thought the matter over for a few minutes, and then arose and made a beeline for his usual haunts, telling every man he met on the way that he had been off on a fishing excursion.

The cynic who flatters himself that he is revenging on the world by withdrawing his company forgets that he will be obliged to associate with him-

A Half Million Fire.

PHILADELPHIA, Sept. 25.—The Frank-lin Sugar Refinery of Harrison Have-meyer & Co, an immense brick structure at Front and Almond streets, was partly destroyed by fire this morning. The fire broke out at 4:15 a m, and although three alarms were rung it was not got under control until the block bounded by Delaware Avenue, Swanson, Almend and Bainbridge streets, was destroyed. This block contained two large buildings, that facing on Delaware Avenue being a mould house three stories high, and that in the rear of the mould house and extending to Swanson street being a new building, called the filter house. These buildings were filled with sugar in process of manufacture and ready for delivery. Both structures with their contents were destroyed. The loss will probably reach half a million dollars. The centrifugal house and boiler house on the block from Swanson to Penn streets. block from Swanson to Penn streets and Almond to Bainbridge streets, were saved.

That wonderful catholicon known as Mrs. Lydia R. Pinkham's Vegetable Compound has given the lady a world-wide reputation for doing good. It is like a living spring to the vital constitution. Her Blood Puriner will do more to cleanse the channels of the circulation and purify the life of the body than all the sanitary devices of the Board of Health.

This officer, well-known in Raleigh, where he was stationed a number of years as commandant of Camp Russell. died at his home at Schraalenberg, New Jersey, Wednesday, of apoplexy. He was born in Newbern, North Carolina, and was appointed from this State to the United States Military Academy in the summer of 1837. He was graduated from that institution July 1, 1841, and was promoted to be second lieutenant in the Second United States Artillery. He served through the Mexican war with distinguished gallantry, and was several times brevetted and promoted. He was for some years commandant of the West Point Academy. After the close of the Mexican war he did garrison duty for several years at Forts Moultrie and Pinckney, South Carolina, and Fort Hamilton, New York. He was engaged in the Seminole war in Florida. In August, 1863, he was promoted to be Major of the Second Artillery. After the close of the war he was detailed to the command at San Francisco Harbor and subsequently at other Pacific coast defenses. He was sent to Sitka, Alaska, in September, 1871, and remained on duty there until January, 1873. After that he served at Fort Macon and Raleigh, and at the Washington Arsenal. In July,

1877, he was made lieutenant-colonel of his regiment, and after a leave of absence of a few months he resumed duty at Fort McHenry, Maryland. He retired from the service a short time since, after a continuous service of about forty years. Col. Allen had relatives in this city and in Newbern.

Southern Cotton Manufacture. The Columbus (Ga.) Daily Enquiry in its fall trade issue gives some interesting figures in reference to cotton manufacturing in the South in 1882. There are now in operation in Alabama, Georgia, Kentucky, Louisiana, North Carolina, South Carolina, Tennessee, Texas and Virginia, 14,788 looms, 659,-512 spindles, employing 17,941 hands and consuming 179121 bales of cotton annually. During the past year the increase in cotton manufacturing has

A Delicious Appetizer, That ensures digestion and enjoyment of food; a tonic that brings strength to the weak and rest to the nervous; a harmless diarrhese cure that don't constipate just what every family needs—Parker's Ginger Tonic.

BEDFORD ALUM AND IRON SPRINGS WATER AND MASS.—The great tonic and alterative contains iwice as much iron and fifty per cent. more alumntaum than any "alum and iron mass" known. Just the thing for the "spring weakness" now so general. Sold by all druggists of any standing. Prices reduced one half.

New Advertisements.

The above is a good likeness of Mrs. Lydia E. Pinkham, of Lynn, Mass., who above all other human beings may be truthfully called the "Dear Friend of Woman," as some of her correspondents love to call her. She is realously devoted to her work, which is the outcome of a life-study, and is obliged to keep six lady assistants, to help her answer the large correspondence which daily pours in upon her, each bearing its special burden of suffering, or joy at release from it. Her Vegetable Compound is a medicine for good and not evil purposes. I have personally investigated it and am satisfied of the truth of this. On account of its proven merits, it is recommended

and prescribed by the best physicians in the country. One says: "It works like a charm and saves much pain. It will cure entirely the worst form of falling of the uterus, Leucorrhosa, irregular and painful Menstruction, all Ovarian Troubles, Inflammation and Ulceration, Floodings, all Displacements and the consequent spinal weakness, and is especially adapted to the Change of Life."

It permeates every portion of the system, and gives new life and vigor. It removes faintness, flatulency, destroys all craving for stimulants, and relieves weakness of the stomach. It cures Bloating, Headaches, Nervous Prostration, General Debility, Sleeplessness, Depression and Indigestion. That feeling of bearing down, causing pain, weight and backache, is always permanently cured by its use. It will at all times, and under all circumstances, act in harmony with the law that governs the female system. It costs only \$1. per bottle or six for \$5., and is sold by

druggists. Any advice required as to special cases, and the names of many who have been restored to perfect health by the use of the Vegetable Compound, can be obtained by addressing Mrs. P., with stamp for reply, at her home in Lynn, Mass. For Kidney Complaint of either sex this compound is unsurpassed as abundant testimonials show.

"Mrs. Pinkham's Liver Pills," says one writer, "are the best in the world for the cure of Constipation, Billiousness and Torpidity of the liver. Her Blood to equal the Compound in its popularity. All must respect her as an Angel of Mercy whose sole ambition is to do good to others. Philadelphia, Pa.

WORTH SENDING FOR.

AN INVALUABLE AID

IN THE TREATMENT OF

During the last epidemic of the "Yellow Scourge," which was so fatal throughout the lower Mississippi Valley, no external remedy was to generally used, and with such great success, as the BENSON CAPCINE POROUS PLASTER

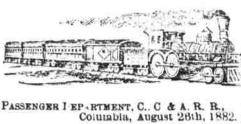

Applied at the commencement of the disease over the region of the liver and spieen, by their powerful stimulating and alterative action they incite a free flow of bile from the overloaded and stagnant liver, causing a free and easy action of stagnant liver, causing a free and easy action of the bowels, and in this manner removing from the system of the sufferer the polsonous material

which was robbing him of life.

BENSON'S CAPCINE POROUS PLAS. TERS

are a sure preventive and were used by all skilled ye low fever physicians and nurses throughout the whole Sou.h. Apply them at once; don't wait. They are a SEABURY & JOHNSON, Manufacturing Chemists, New York,
