STRONG FACTS!

A great many people are asking what particular troubles Brown's IRON BITTERS is good for.

It will cure Heart Disease, Paralysis, Dropsy, Kidney Disease, Consumption, Dyspepsia, Rheumatism, Neuralgia, and all similar diseases.

Its wonderful curative power is simply because it purifies and enriches the blood, thus beginning at the foundation, and by building up the system, drives out all disease.

A Lady Cured of Rheumatism.

Baltimore, Md., May 7, 1880.
My health was much shattered by
Rheumatism when I commenced
taking Brown's Iron Bitters, and I
scarcely had strength enough to attend to my daily household duties.
I am now using the third bottle and I am regaining strength daily, and I cheerfully recommend it to all. I cannot say too much in praise of it. Mrs. MARY E. BRASHEAR,

Kidney Disease Cured.

Christiansburg, Va., 1881.
Suffering from kidney disease, from which I could get no relief, I tried Brown's Iron Bitters, which cured me completely. A child of mine, recovering from scarlet fever, had no appetite and did had no appetite and did not seem to be able to eat at all. I gave him Iron Bitters with the happiest results.

J. KYLE MONTAGUE.

Heart Disease.

Vine St., Harrisburg, Pa. Dec. 2, 1881. After trying different physicians and many remedies for palpitation of the heart without receiving any benefit, I was advised to try Brown's Iron Bitters. I have used two bot-tles and never found anything that gave me so much relief.

Mrs. Jennie Hess.

For the peculiar troubles to which ladies are subject, Brown's Iron BITTERS is invaluable. Try it.

Well, Yes.

Yesterday's Monroe Enquirer contains the following explanation: "The CHARLOTTE OBSERVER says that the audience which assembled in the opera house on Tuesday evening to hear Dr Talmage was the largest, most critical and most refined that ever assembled in Charlotte. This is easily accounted for; a large crowd was there from Monroe."

Snow and Sleet Down the Carolina

The tops of the cars that came in on the Carolina Central Railroad last night, were covered with snow and sleet. They had a regular old midwinter storm about Laurinburg day before yesterday, and it is thought the outlook forfruit in this section next summer is not as bright as a gold dollar. The people ll seem disposed to lay it up to Wiggins.

The Date of Eas er.

About this season of the year many people are asking what it is that determines the date of Easter. The answer is the moon in March, which Tennyson calls "the roaring moon of daffodills." The old rule is that Easter shall fall on the Sunday after the full moon which comes after the vernal equinox. That brings Easter this year on the 25th of March. In 1818 it fell on the 22d of March, the earliest date possible. It will not fall upon that day again in this or the following century.

Something About Huntersville. Under date of the 8th inst. a friend from Huntersville writes us as follows about that town and the people: "Huntersville is the happiest little town in Western North Carolina; she has two churches, well attended, with ministers second to none in the State, viz: Rev. W. M. Orr, of the Associate Reformed

Presbyterian, and the Rev. A. M. Watson, late of Lexington, N. C., stated supply, to fill the vacancy caused by the resignation of Rev. Dr. J. F. Latimore, and while the two congregations, namely, Huntersville and Ramah, profoundly regretted the withdrawal of Dr. Latimore, yet they, with one accord, congratulate themselves on having secured the services of one so eminently qualified to fill his place. We have two flourishing schools, one an academy or high school, under the supervision of the Rev. W. W. Orr, with an average attendance of about sixty scholars; the other a free school, with about forty scholars, under the control of Miss Anna, daughter of the Rev. A. M. Watson above named. We have street cars, propelled by locomotive power. Our board of council, in connection with the finance committee, have been busily engaged for over five weeks making up an ordinance for the protection of drummers and guano agents. They ex-

expect to finish their work by the first of June, at which time your humble servant hopes to be heard through the columns of your much esteemed paper." Vernon has the Best of the Bargain. An incontrollable desire to get himself locked up in the guard house seems to have come over Vernon Asbury of late. No sooner than he gets through a small job of breaking rock and is giv-

Irwin lying in the street and was almost frozen. During his last furlough from the rock pile, Vernon took occasion to file his complaint against uncle John Bartlett, the janitor, for not having enough blankets on hand to keep him warm. He fared badly because he was deprived of his pipe, and his first act on getting out was to buy a piece of plug tobacco and two clay pipes and take them to the friends left behind him on the rock pile, and while they filled their pipes, Vernon kindly cracked rocks for them. Vernon is not skilled in the use of the hammer, but can break about a hatful of rocks in a hard day's work. By a careful calculation, it is found that the city loses 83 cents for each day Vernon is kept at work, and boarded. It is a losing business. but while the authorities may get tired of Vernon, he shows no sign of getting

The Coming Storm. There is something peculiar by fearful and disquieting in the storm, which according to the Canadian Wiggins, it is to roar over the country on the 11th of this month. The prophet takes all the responsibility. He has crossed the stream and burned the bridge behind him. He has uttered the prediction in the most solemn manner and again and again placed himself on record in such a way as to stand or fall with the prophecy. We say it is to be a peculiar dis turbance. All ordinary storms are supposed to originate on the earth and in its atmosphere. But this is to be phase of astronomical pertubation. It is to be a supermundane storm. "A great storm will strike this planet on the 9th of March," is the way the oracle reads, and this implies that it is to come from abroad-perhaps from the sun, perhaps from the insterstellar space, perhaps from goodness knows where. And this is not be its only peculiarity. It will "strike this planet on the 9th of March" in the Northern Pacific Ocean, move Westwardly round the world, re-entering this hemisphere in the Gulf of Mexico, strike the rocky mountains, rebound and pass back to the Atlantic, making the trip of 24,000 miles in two days. To do this it will have to travel at the rate of 500 miles an hour, which is beating a West India typhoon five to one. It takes a rattling storm to get over the ground at the rate of 100 miles an hour, but this Wiggins commotion will circumnavigate the globe in fortyeight hours. It will be accompanied by a tidal wave whose highest elevation will be seen probably in the Bay of Bengal. "No vessel," says the prophecy, "whatever her dimensions, will
