

GENERAL NOTICES.

Loss and Gain. CHAPTER I. "I was taken sick a year ago With bilious fever."

From 228 lbs to 120! I had been doctoring for my liver, but it did me no good. I did not expect to live more than three months.

CHARLOTTE, N. C., Oct 30, 1883. Messrs. Brown, Weddington & Co. GENTS.—I find on trial that the McSherry Grain and Fertilizer Drill brought you succeeds in putting in winter oats admirably and I am very much pleased with it.

Very respectfully, BEN T. PRICE.

The above is from one of the best young farmers in Mecklenburg and is a positive proof that the McSherry Drill is the one for the farmer to buy. We guarantee them to sow all kinds of grain.

INDEX TO NEW ADVERTISEMENTS. Wittkowsky & Baruch - Silks. R. H. Jordan & Co. - Lamps, etc.

LOCAL RIPPLES. Monday is the regular meeting day of the county commissioners.

Not a great deal of staple was put on the market yesterday, but prices held firm at ten cents for the best.

The streets were thronged yesterday and the merchants kept busy here were more people in the city than in any day since the circus.

Mrs. Emma Reinhart, wife of Prof. J. Reinhart, of Richmond, Va., is on a visit to the family of Mr. J. Vogel on Poplar street.

J. H. Monroe, Wm. Monroe and Clarke Hall, were all arraigned before the mayor yesterday morning on charges of drunk and disorderly conduct and were fined \$5 each, making \$15 for the graded school.

Mr. Williams, of New York, the new superintendent of the city water works, has arrived and taken charge of his office. Mr. Craig, who resigned goes to Athens, Ga., to take charge of the water works there.

The street parade of Davis' \$10,000 brass band attracted big crowds yesterday. The band is undoubtedly a good one, and its uniform is gay and gaudy enough to please the eyes of the people.

The ladies of the Second Presbyterian church have succeeded in their efforts to purchase a carpet for the church, and were yesterday busily engaged in putting it in. It is of a very pretty pattern and adds greatly to the comfortable looks of the interior of the church.

The "beef shoot" took place at Harborside yesterday according to programme, and the boy was won by Mr. John P. Morris. There were twelve guns in the contest, and the distance to the target was 50 yards. The beef was "staked" by Mr. J. N. D. Wilson, and all the boys who wanted to shoot for it would pay him one dollar and blize away.

Mutual Insurance. Assessment No 53 first class and 113 second class have been sent out to Charlotte section 478 of the endowment rank of the Knights of Pythias. These assessments of \$4.20 per member pays \$81,000 in insurance to the families of persons who have died during September, who were members of the order.

The New Diocese. Under the new division of the Diocese in this State, Charlotte will still remain under Bishop Lyman's administration. Mecklenburg being in the old diocese. The counties that will comprise the new diocese are: Currituck, Camden, Pasquotank, Perquimans, Chowan, Gates, Hertford, Bertie, Martin, Washington, Tyrrell, Dare, Hyde, Beaufort, Pitt-Green, Pamlico, Craven, Carteret, Jones, Lenoir, Wayne, Sampson, Duplin, Onslow, Pender, New Hanover, Brunswick, Columbus, Bladen, Robeson, Cumberland.

The New Time. A good many of our people have no idea what sort of time it is we are to have shortly and for their benefit we submit these explanations by Dr. Powell of the naval observatory: "The change of local time for Washington, recommended by the naval observatory, is in pursuance of the general plan for uniform time as correlated by hour meridians throughout the civilized world. For many years scientific men have been urging this measure, associations have been organized for the purpose of securing it, and committees appointed by scientific bodies, perhaps in every civilized State. The plan will be of great value in the collection and comparison of scientific observation that depend upon time. From the standard of scientific research, therefore, it is greatly desired. The local change in Washington will be advantageous to all business men and to all who travel by rail." Upon this indorsement Secretary Teller informed the Secretary of the Navy that he would be glad to adopt the new time, which is understood to be 8 minutes and seconds faster than the present local time, the change will go into effect on November 18.

A doctor at Richmond says that if people will take a bath in hot whiskey and rock salt water in a year they will never catch a cold, in fact somebody has tried this new remedy, and would say: Stick to the old and reliable Dr. Bull's cough syrup.

THREE KILLED INSTANTLY.

MANY OTHERS WOUNDED, SOME MORTALLY.

A Fearful Political Riot in Danville - Blood Flowing in the Streets and the Whole Population in Arms - The First Shot Fired by a Negro, Etc.

DANVILLE, Nov. 3.—While the Democrats were assembled this evening at 8 o'clock, in Pace's Opera House, discussing matters pertaining to the campaign, a large crowd of negroes near by on Main street created a row, first commencing in a fistfight, which soon led to the drawing of pistols by both sides, when a negro placed a pistol at Walter Holland and fired wounding him supposed mortally.

Then a general fire opened killing three negroes dead and wounding many others, some mortally, great excitement exists especially near the Western suburbs of the town. One white man was fired upon while patrolling in that vicinity which wounded him and his horse. A squad has been sent to that quarter. The entire white population is under arms.

Gaston Superior Court. The lawyers all returned home yesterday from Dallas where the fall term of Gaston court has been in session the past week. On last Friday the civil docket was taken up, and it will be resumed on Monday morning, when the second week of court begins. One of the most interesting cases that will come up will be the motion for a restraining injunction against the Lindegar factories, recently purchased by Mr. Hart. It is probably that a motion will be entered to set aside the sale of the Woodlawn factories. Solicitor Osborne goes back Monday to try a couple of State cases that were continued from last week.

Opening the Season with Big Ones. The season for big sweet potatoes has opened up lively. Yesterday morning early a man was seen trying to get into the OBSERVER office door with an immense potato, but who had to scrape the aid of a couple of colored men with crowbars before he succeeded. It was Mr. C. L. Hutchison, of Mount Holly, Gaston county, and the potato was raised by him on his farm. A short while after that another disturbance was raised at our door, and a man came lumbering in with a tremendous tuber from Dr. E. Nye Hutchison. They are pasturing big potatoes, and would last an ordinary family two weeks. Now all that is lacking to complete our happiness is a possum. Somebody send us a fine specimen of that vegetable, and we will be able to laugh starvation to scorn.

Exploits of Cotton Thieves. Two negroes, Scott Rankin and Sam Williams, were committed to jail in Concord a day or so ago, the first on charge of stealing cotton and the latter for receiving it. It seems that on last Monday night Dick Sloan and Scott Rankin made a raid on Mr. Derton's plantation and succeeded in carrying off a lot of cotton. They hired a negro named Boger to haul it away for them. Boger worked for Mr. Joe White, and before the load was disposed of daylight came and Boger was seen by Mr. White unloading the load at his barn. He suspected something wrong, and on questioning Boger that individual became frightened and confessed that he had hauled the cotton for the two men to a shanty on Mr. Alfred Cook's plantation, where it was received by Sam Williams, Justice's Jack Alexander and W. J. Hill investigated the case and sent Williams and Rankin to jail. Sloan succeeded in eluding arrest, and is now at large.

Gun House and Twelve Bales of Cotton Burned. Mr. Robert W. McDowell, of Steel Creek township, this county, suffered a serious loss Friday afternoon in the destruction by fire of his gun house, together with twelve bales of cotton, all his own property. The fire was no doubt accidental. It was a horse power gin in the house, running it up to 11 o'clock a. m., and there was no fire about when they quit work. Two men were working in a wagon within 25 yards of the gin from that time to within a few minutes of the discovery of the fire, and there could have been no possible chance for an incendiary to have approached the building without detection. The fire was first discovered at 8 o'clock, and so rapid was its spread that the farm hands were able to save only a small quantity of seed cotton. The gin house, machinery and twelve bales of cotton were destroyed within the course of a few minutes. Mr. McDowell had no insurance on his property and the loss will fall heavily upon him. His total loss is estimated at \$1,500. A match in the seed cotton is supposed to have been the cause of the fire.

The Approaching Comet. An astronomical observer caught a glimpse of the new comet several nights since, but as it was only a few minutes in an opening in the cloudy sky, time was not afforded for measurements of its brightness and dimensions. Prof. Carr says the nucleus was not well defined, but a tail was perceptible apparently a few minutes in length. This comet, which was discovered September 8th by Prof. Brooks in the constellation Draco, is still in the same constellation, but is brighter for its distance, and its tail is brighter than it was at the same distance during its last appearance in 1812. It is still in the constellation in which it was first noticed, and is making but slow progress across the heavens, and but slowly increasing in brightness. Its further path from its present position in the north west heavens, through Cygnus and Cygnus and Pegasus, till about the end of January, it disappears below the horizon in the south. It will reach perihelion, the point in its orbit nearest the sun, on January 25, when it will be about 60,000,000 miles from the earth. It will be visible to the naked eye about the middle of December, and will rapidly increase in brightness after the perihelion. Although it will be brighter than at its last appearance, it will not be nearly as prominent an object in the heavens as the great comets of last year and 1812. The comet was first observed September 15, 1812, and the interval between them and January 25, its next perihelion, will be 71.5 years. Calculations made in 1812 predicted its return in 70.6 years, so that our present celestial visitor is overdue nearly nine-tenths of a year—certainly not a very surprising lameness in a visitor who calls so seldom.

Ladies, beautify your complexion with Gleason's Sulphur Soap. Ladies Hair and Whisker Dye, 80c.

Josh Billings' Head From. NEWPORT, R. I., Aug. 11, 1880. Dear Bitters—I am here trying to breathe in all the salt air of the ocean, and having been a sufferer for more than a year with a refractory liver, I was induced to mix Hop Bitters with the sea gale, and have had the finest and glorious result. * * * I have been greatly helped by the Bitters, and am not afraid to say so. Yours without a struggle, JOSEPH BILLINGS.

SOME ROUGH WORK.

A Party of North Carolina Negroes Go into South Carolina, Armed with Guns and Knives and Attempt to Rescue a Prisoner.

There is considerable excitement among the people in Robeson county, this State, and Marion county, S. C., over the outrageous conduct of a mob of negroes from the former county in attempting to rescue a prisoner from an officer in the latter county. A colored girl named Fannie Williams was arrested by Mr. Elias Norton on the charge of robbing the residence of Miss Catherine Priest, an aged maiden lady of Marion. The girl confessed to having committed the robbery, but the constable had to keep her under arrest over night for trial next day. What followed is told from a correspondent of the Charleston News and Courier, who reports that some twenty-five black ruffians, organized at a church in North Carolina and came to the house of Mr. Norton, their pistols over and around their heads, swearing vengeance against Norton and demanding that he should at once release Fannie Williams and threatening that if he refused to do so they would turn over every house on his premises and wreak vengeance on him. Mr. Norton has an invalid wife and children who were greatly shocked by the behavior of the mob, and the horse who had thus ruthlessly invaded their home. But he was a man of nerve. He got into his house, secured his double-barrel gun, came back into his piazza and defied the motley crew to touch the house in which the prisoner was confined, and if they did so he would open fire indiscriminately on all who were in front of the building. The ruffians could not intimidate him, they reluctantly took their departure, telling Norton in a threatening and boisterous manner that they would meet him at the office of Justice Harlee the next day with their guns, and that they would shed blood or release the prisoner. Mr. Norton gathered a crowd of the best white citizens of the vicinity from both counties, Marion county, S. C., and Robeson, N. C., and at an early hour was at the office of Trial Justice Harlee with the female prisoner, fully prepared for emergency, that might arise. Warrants were at once issued by the trial justice for the parties for riot and attempt to rescue a prisoner, and constables were sent for the parties in different directions. At 8 o'clock p. m. eight of the gallant braves had been brought in, several of them having been rendered hors du combat by being disarmed of pistols which they carried concealed upon their persons, and a sudden application of bracelets to their limbs. Trial Justice Harlee gave the matter a full and thorough investigation and committed them to jail in default of bail, each and every one of them. Several of the parties are leading local politicians in the "Old North State," and some of those in South Carolina are leading Republicans prior to 1876. One of them, Capt. Peter McGill, was always a stalwart, a leader whom the roughest of the rabble in the darkest days delighted to honor and follow. After the investigation, and as soon as the trial justice decided to commit them for court, this redoubtable hero took leg bail and made his escape.

A Colored Shoplifter Jailed. Policeman Joe Orr yesterday arrested a colored man named Nathan Martin, who, to prepare for the frost, went into Gray's shoe store and selected a pair of brogans without bothering the clerks to wrap them up for him, and change his money. Mr. Gray detected Martin's little irregularity and called on policeman Orr to overhaul Martin. He was arraigned before the mayor who heard his plea, and the bound him over to the inferior court for trial. Martin could not give bond and was sent to jail.

A GREAT BLOOD MEDICINE.—One of the best medicines ever known for the cure of diseases arising from impure blood, no matter from what cause, is Rosadalis. It is a great alterative medicine as well as a blood purifier. It cures scrofula, rheumatism, skin diseases, liver complaint, rickets, &c. Read the following letter from a distinguished gentleman in Florida: "Lake Irena, Fla., June 10, 1883. I have been a great sufferer for 15 years, not able to stand from an injured leg. Have tried many M.D.'s and their remedies to little purpose. I believe Rosadalis will cure me. Send me one dozen by steamer. It was recommended to me by a friend, and I have taken 3 bottles, and find it helping me. The druggists who usually keep it are out of it, and I cannot afford to wait the slow arrival of their supplies."

Lake Irena, Fla., June 10, 1883. I have been a great sufferer for 15 years, not able to stand from an injured leg. Have tried many M.D.'s and their remedies to little purpose. Supt. Board of Public Instruction.

A BLAST EXPLODES

And Blows Up Two Men—Probably Fatal Accident at Concord.

Over in Concord they are macadamizing the street from the depot to the town, and a force of colored men are employed at the quarries near by to blast rock to put in the street. Yesterday morning two of the men, Dan All-day and Honeycutt, were engaged in charging a blast, and had about completed their work, when the blast exploded with terrible effect. Allman, who was nearest the blast was hurled into the air and fell fully fifty feet distant from the scene of the explosion. Honeycutt was not very badly injured, having escaped the full force of the explosion. Allman was picked up and carried to his home, and medical assistance was immediately summoned. The physician found that no bones had been broken, but the unfortunate colored man's flesh was badly lacerated and burned, and he presented a shocking spectacle. His eyes were destroyed by the powder and he will entirely lose his sight. His injuries are very serious and probably fatal. What caused the explosion we have been unable to find out.

This accident is similar in many respects to the one that occurred in Concord last night, when two colored men were blown out of a well by a premature discharge of dynamite receiving injuries from which one died and the other lost his eyes.

Opera House Last Night. In our opinion, the best amusement of the season was given at the opera house last night by Mr. Chas. L. Davis and his excellent company, in the play of "Alvin Jolson." Mr. Davis, as a matter of course, is the central figure in the whole play. He is an ingenious actor and his comicallies are of the sort that cannot fail to amuse. He is very ably supported and in the composition of his company a good deal of real talent is recognized. The play itself is interesting, and the \$100,000 worth of diamonds and the fine music were side-shows. Alvin Jolson is good throughout, and all agree that Mr. Davis and his company deserve good houses wherever they go.

Bad Accident at the Rock Hill Factory. A very serious accident, resulting in the total destruction of the engine at the Rock Hill cotton factory, occurred last Friday evening, and will cause a suspension of business in the factory for the next ninety days. The cylinder head was torn all to pieces by the crank shaft which, being released by the pin dropping out, flew over and not only knocked the cylinder to pieces, but tore up the engine room in a lively manner. It was a very strange accident, the like of which rarely happens. At the time it occurred, the engine was being driven under a full head of steam, and the moment the pin dropped the crank flew up, tearing out its fastenings and driving the cylinder to pieces. The accident will necessitate the purchase of a new engine, and according to fore man Neisler's estimate, a suspension of work for 90 days. The Rock Hill Manufacturing Company employs 100 hands, who with their families, make a total of 300 people dependent upon it for their support. The loss in breakage of machinery, combined with the enforced suspension of work, will be a serious one to the company.
