NORTHERN EXCURSIONISTS. To morrow the first of four excursions arranged by the railroad companies and the immigration bureau of this State, for the benefit of people who desire to visit North Carolina for the purpose of making personal observation of the inducements this State offers to settlers and capitalists, leaves Boston, the objective point being Shelby. These excursions are good as far as they go and will doubtless result in many of these people eventually making their homes amongst us. It would be better, however, if arrangements could be made with the railroad companies to sell low rate tickets to individuals as well as to parties of excursionists, and make the time long enough to enable parties once here to visit any portion of such frauds; also for an itemized of the State they desire, and see for Postoffice Department from March 4, themselves, and study the country leisurely without being hurried. Hurrying through the country at railroad speed the visitor only gets a flying view of the land he passes over, and generally speaking the lands along the railroads are comparatively poor and unattractive, for as a rule the roads run on ridges and get as far away from the water courses as the

The extreme cold weather in the North and West, during the present winter has turned the eyes of thousands of people Southward, and at the present time, we see it stated in the New Orleans papers, large numbers of Western people are on prospecting tours in the lower Mississippi valley where rich and cheap lands and mild climate invite settlement. All the indications lead to the conviction that the next few years will see a large immigration of North-ern people into the South, and that too of a good, and desirable class. people of thrift, intelligence and industry, who will make good citizens when they come and do much to de- and nays must be called upon the velop the resources of the sections in which they locate. Cox, of this State, has a little resolution before Congress asking for information from the several departments as to the States from which employees hail, the object of which doubtless is to ascertain how many chaps from Northern States are serving as proxies for Southern States, some of them being credited to States which they have never put foot in.

Mrs. J. J. Astor has sent 1,063 homeless children to the South and West in the last few years, at an exshow that an immense majority of the cases the transfer of the children to new surroundings has resulted in great good to them, and to the satisfaction of the families to which they

SOME PEOPLE.

SOME PROPLE are complaining nearly all the time, without having very much cause for complaint. They have fallen into the habit of it, and would not be happy unless they thought they had something to complain

Some People can endure a great deal of pain without making much noise about it. When they suffer severe wounds or terrible surgical operations, they simply set their teeth and resolutely determine not to utter a cry or a groan. These are the heroes.

Some People are all the time suffering from inward troubles which the outside world know nothing about. The cause of their suffering is hidden, but the pain is there, deep, bitter, and constant. Dyspepsia has its martyrs, many of them brave, patient, and enduring.

Some People, if they did but know it, are putting themselves to a great deal of needless trouble and worriment in harboring pains which they might as well be rid of as not. Why don't these people try Brown's Iron Eitters? This is an iron medicine, compounded with the highest degree of skill. It drives dyspepsia out, and gets rid of dyspeptic pains. It scatters rheumatism and relieves rheumatic sufferers. It regulates torpid livers, and relieves people from liver complaint. It tones up the nerves and banishes neuralgia. It enriches the blood, and gives it a good red color, strengthening the system and giving health instead of disease, and pleasure instead of pain. Ask your druggist for a bottle of Brown's Iron
