Six Thousand Three Hundred Acres Land. The owners of The Crowder's Mountain Iron as beg to call the attention of capitalists iron affacturers, stock and dairy men, and those with to extle colonies to their property which wish to settle colonies, to their property, which wish to settle colonies, to their property, which inducements to the classes above named. I property consists of Six Thousand Three tred Acres of land, located in the counties of on and Cleaveland, in the State of North Caract King's Mountain Depot, on the Atlanta conston and Cleaveland, in the State of North Car olina, at King's Mountain Depot, on the Atlanta and Charlotte Air Line railway, now owned by the Bichmond and Danville railroad company. The property has been used for fifty rears past as an iron property, and has been worked at various points but chiefly at the site of the celebrated Yellow Ridge Ore Bank, which has always yielded an ore noted for its richness in metallic iron, and its softness and toughness. This vein of ore, which extends for two miles in length, has been worked to the depth of 147 feet, showing at that depth a vein of ore about 40 feet wide, and analyzing as high as 66 per cent. of metallic iron. This vein has not been worked for twenty years, but the facts set forth can be fully shown. Various other veins have been worked, and within the past two years very large deposits of iron ore have been discovered at other points. Within the past eighteen mouths, however, the owners have discovered deposits of ore in Crowder's Mountain, (five veins of iron ore, are exposed), which were unknown before, and which will furnish an amount of good ore, easily worked and above water, that must make it one of the most desirable iron properties to be found. They have discovered on the pinnacle of this mountain, which is 1000 feet above the level land, 2200 feet above the sea level, a vein of ore

and, 2200 feet above the sea level, a veln of ore eight feet wide, which crops out at various points from the top to the bottom of the mountain, showing in one place about 20 feet of solid veln. This vein can be traced over the top of the mountain for vein can be traced over the top of the mountain for over a mile, and this deposit aione would afford an almost inexhaustible supply of ore, easily worked, and above the water line. In addition to this four other veins have been found on this mountain. The ore is a mottled gray ore, showing on analysis from 49 to 65 per cent. of metallic iron, with a small amount of titanic acid, and without any sulphur or phosphorus. The quantity of ore in this mountain is simply inexhaustible and of good quality.

mountain is simply inexhaustible and of good quality.

Besides Crowder's Mountain the owners possess King's Mountain, for about seven miles, whose pinnacle is the highest point of land from Richmond to Atlanta, except Mt. Airy, in Georgia, and they have reason to believe this mountain is full of ore also. In addition to iron ore the property has manganese, limestone clay for making fire-proof brick, gold and other minerals. Very pure and excellent barytese has just been found in large quantity.

cellent barytese has just been found in large quantity.

As a stock and dairy farm it offers fine opportunities to those who may wish to engage in such business. It has from three to four thousand acres of level or only slightly rolling land, which produces gnass, grain and all kinds of farming products finely, and it is well supplied with water by unfailing springs and branches.

The other 4,000 acres embraced in the mountain sldes are productive of fine grass and herdage, and afford excellent natural pasturage for sheep and cattle. The climate is so mild that but little shelter for stock is needed in the coldest winters. The whole six thousand acres are now covered with a fine growth of timber of all kinds, such as pine, hickory, oak, wainut, cedar, etc. The jand is well suited to farming purposes, by those who wish to colonize. Cotton, corn, peas, cats, clover and grass, and fruits of all kinds are produced beautifully, and it is specially suited to grapes and small fruits. It could be divided into small farms that would give to each farm variety of soil, and level and hilly and. It is situated in the Piedmont belt, which is noted for the salubrity of its climate, and the healthiness of its atmosphere. It is a region free from maiaria and other unhealthy influences. It is located with great convenience to railroad facilities, being situated at from two to four miles from King's Mountain Station, on a railway that has the most extensive connections with all parts of the country, and which offers great inducements to those who are trying to develop the country along its lines. The owners will sell this property to suit purchasers, as follows: The whole tract, including mineral interests, for Sixty three Thousand Dollars, or will make favorable terms, reserving the mineral interest, payments to be one-third cash, balance in one or two years.

MR TILDEN'S LETTER.

Yesterday we published the letter of Samuel J. Tilden-announcing his resolution not to be a candidate for the Democratic nomination for the Presidency and giving his reasons why. It has been current for some time that such a letter had been prepared and would be presented at the meeting of the New York Democratic State convention which meets on the 18th inst., and the probabilities are that the discussion of this rumor, and the recent action of several State conventions in electing delegates to the National convention instructed for the old ticket, hastened givingpublicity to the letter. We are glad it has been published at last, for it disposes of the doubt and uncertainty that hung over the position, and enables the Democracy to move with their eyes open, and see where they are going. Whilst there was doubt as to Mr. Tilden's purpose the party was embarrassed, and every step it took it took in the dark. Thus far nearly every State convention that has been held has expressed senti ments fayorable to Mr. Tilden, while a considerable number of them have instructed their delegates to support him. His letter, of course, changes the conditions, and leaves these delegates free to act upon their best judgment, and unite upon such can-GINGHAM UMBRELLAS, Gents' hand-made and didates as will best represent the Democracy in the coming contest.

It is well known to the readers of the nomination of the old ticket, that we did not believe it the strong ticket its advocates believed it to be, but, on the contrary, believed it a weak ticket, which would be met with merciless warfare by our antagonists, and would have inspired no enthusiasm within our ranks. A campaign without enthusiasm means uphill work all the way. Under the circumstances we regard the declination of Mr. Tilden a happy deliver-

But, this being so, we still recognize the fact that he is to-day among the first of living Americans in breadth of intellect and in the true conception of the condition of the people and the demands of the Republic, The reader of his letter will be struck with the fact that from beginning to end the spirit that pervades it is REFORM. This is the keynote, its inspiring thought; not mere reform in the matter of taxation, in the expenditure of public moneys, in appointments to office, in legislation, for he mentions none of these, but reform of the whole governmental machinery, correction of the abuses that have sprung up and gathered strength and size year after year, until, as he vigorously expresses it, the whole "governmental system has become infected with cancerous growths, false constructions and corrupt practices. Powerful classes have acquired pecuniary interests in of ficial abuses, and the moral standards of the people have been impaired."

This covers the ground, and on this, if Mr. Tilden were a candidate, he would make his campaign, and on this he would be elected, if elected at all. He would go to the roots of the cancer and pluck it out; he would stay the tide of corruption; he would command respect for and allegiance to the laws that have been ruthlessly trampled upon; he would drive the thieves from the temple, and labor for that pure and honest administra tion of public affairs which prevailed in the days when patriotism stood

higher than mere partisanship.
This is the work to day, the grand work before the Democracy, not merely to lessen taxes on this thing or that thing, not merely drive certain men out of office and to put others in their place, not merely to get control of the government and the government patronage; no, but that we may drive out the corruptionists that are in, correct the abuses that have grown up and become demoralizing and widespread, that we may make the government purepand better, make it a government of law and honesty, such as it was in the better days of the Republic, before the Republican party gained ascendency and inaugurated the reign of

lawlessness and vice. If we be wise, with this grand idea of resolution adopted to day, it is not thought that the session of Congress will end our banners, with no minen issues to divert and distract us, victory will ust. of governmental purification,

WINSTON AND BOYD. THE "HUMBLE REFUGEE" AF-

TER BOYD'S PLACE. The Great Talking Machine --- A Little

"Onpleasantness" --- N. C. Members on the R. and H. Bill --- Trying to Offset the Bolt. Correspondence of THE OBSEVVER.

WASHINGTON, D. C., June 10, 1884. -Pat Winston is here, in all the glory of two hundred pounds of flesh and his recent oratorical triumphs at Chicago. He is introduced around the Capitol as the great American Talking Machine. Pat is putting in his tongue to a good purpose, however. Cetting here at 2 o'clock yesterday, went right up to see the President. They say this morning that he is solid with Mott and those who have arthur's ear. Mott is underod to have promised him port for the District Attorneyship.

ard Boyd is flushed, hot and uneasy. By d's term expires next Monday. y believe that Winston will sucast night some unpleasantness of urred between two distinguished R publicans from North Cerolina. Ugly names were called, and records

were roughly reviewed. Cuss words filled the warm June night with a retrain not foreboding good to the cause of Blaine and Legan.

A well known Republican politician claims that Blaine is as strong in North Carolina as any man who could have been nominated. points to the fact that the peculiar friends of Blaine and of Logan, who were also the kickers against York, having won in the convention all

they asked for, should be satisfied now and co-operate for the good of the cause with the others. will supplement the Associated Press account of the river and harbor devate by special mention of the North Carolina amendments. Dr. York was the first to spring into the inminent deadly breach, and get spellowed up. He proposed

end by inserting the Yadkin, 000. Gen. Vance and O'Hara, with 33 others went with him, but the motion was lost. He then moved to add \$3,000 to be used at junction of U harrie and Yadkin, and in a brief streement advocated the amendment. Lost without discussion.

Gen. Vance moved to amend by adding \$4,500 for the French Broad be ween the iron bridge and the sheals, 461 miles. He said that six at ropriations had already been made, and \$43,000 had been spent. twould take \$20,000 to finish the it would amount during the present year to \$1,000,000. Mr. Breckinridge, of Arkansas, replied, and an amusing colloquy between Collins and Vance followed. The motion was lost. The

North Carolina Democrats voted for this amendment.

Col. Green moved to increase the appropriation for the Cape Fear river \$150,000. He made a short speech in support of his proposition, showing the importance of Wilmington as a port, the state of the water attained and the hope entertained of speedily deepening the channel from 16 feet ordinary and 18 feet high water to 22 feet. Mr. Willis, the chairman of the committee on rivers and harbors, spoke in reply. The

motion was lost. Another proposed Eastern improvement was to increase the Neuse appropriation from \$5,000 to\$10,000; by Gen. Cox. It was rejected after a speech by its mover which could not be heard by the uproar in the House. O'Hara was also unsuccessful in getting \$25,000 for the Trent, although making in its behalf his maiden speech of just one minute The Republicans are straining

every nerve to discount the damag-

ing effect of the secession of so many newspapers and such large numbers of thoughtful men, nor all of them are actually connected with politics. The admissions of weakness are cu rious if you put them together. Thus a New Hampshire Senator (Pike) will say there is danger in Massachusetts, but a Massachusetts Representative (Long) will locate the difficulty in some other place. The reliance of the Republicans is on bluster, the reaction, Democratic blunders and the labor vote, with hard work in the mountainous parts of the South They both admit and deny that New York is necessary. Democrats here think the New York World is foolish in claiming Ohio as a doubtful State, and thus giving the Republicans grounds to brag when they win their usual victory in October. The candidate cannot come from States like Ohio. There is some

what less talk to-day for Tilden and more for Cleveland and Bayard. The latter says his Dover speech was republished in 1880 and endorsed by ex-Secretary Cox, of Ohio, to be a patriotic effort. It will be re-printed to refute calumny. A prominent gentleman just from Massachusetts, and who enjoyed these opportunities for obtaining information, says this afternoon that the Independents of that State are in favor of Bayard or Cleveland, with Carlisle or some such man as Vice-President. Another gentleman thinks the ticket could include both Bayard and Cleveland, and instances Grant and Colfax as presenting a parallel case of candidates for the two highest offices coming from neighboring States. The Democratic tone is healthy.

A gentleman is informed by a prominent Republican here that Blaine has confessed to Mr. Murtagh, editor of the National Republi can, that he was sorry he had ruled favorably to the Democrats and made the defeat of the Force bill possible. This informant states that Mustagh himself reported the remark, and that there is no question of the truth of the same,

on the 30th. It may last until Aug-

Samuel B. Gregory, a commander in the United States Navy during the war, died on Saturday at his home in Essex county, Mass., aged 71. He commanded in 1863 the United States steamer Western World, and so suc cessfully intercepted the blockade-runners off the Virginia coast that Jefferson Davis offered a reward for his capture.

The special grand jury of the Court of Oyer and Terminer in New York, Tuesday, made a report as to the result of their investigation of the city government. The presentment declares that there are radical objections to the taxation of personal property, and it should be abolished as it was impossible to effect its equitable assessment.

The rumor that Col. George Bliss of New York, had joined the Catholic church is confirmed. Monsignor Capel to day would not confirm or deny the story, and refused peremptorily to be interviewed on the subject. Late this afternoon, however, Arch-bishop Corrigan stated that the rumor was true, and that Mr. Bliss was confirmed yesterday morning.

The New York Times, in a leading editorial, favors Gov. Cleveland, of New York, as the Democratic candidate for President, with Senator Bayard as a strong second choice. The Times thinks either of these genwirk. The city of Asheville was an important place, with a trade above the town of \$1,000,000. The tobacco interests was large and profitable; the town of \$1,000,000 and prof the most available man the Democrats can present.
