14 One Hundred and Fifty Acres Land 1/2 mile of the city limits, adjoining the ran civena-well located for a truck and dairy farm; ½ in timber, branch running through it, about 8 acres meadow. Price \$30 per acre.

timber, branch running through it, about a acres meadow. Price \$30 per acre.

15 One unimproved lot 99x198 on Ninth street, between D and E streets. Price \$350.

16 Six Thousand Three Hundred Acres Land. The owners of The Crowder's Mountain Iron Works beg to call the attention of capitalists iron manufacturers, stock and dairy men, and those who wish to settle colonies, to their property, which offers inducements to the classes above named.

The property consists of Six Thousand Three Hundred Acres of land, located in the counties of Gaston and Cleaveland, in the State of North Car olina, at King's Mountain Depot, on the Atlanta and Charlotte Air Line railway, now owned by the Richmond and Danville railroad company. The property has been used for fifty years past as an iron property, and has been worked at various points, but chiefly at the site of the celebrated Yellow Ridge Ore Bank, which has always yielded an ore noted for its richness in metallic iron, and its softness and toughness. This veln of ore, which extends for two miles in length, has been worked to the depth of 147 feet, showing at that depth a vein of ore about 40 feet wide, and analyzing as high as 66 per cent. of metallic iron. This vein has not been worked for twenty years, but the facts set forth can be fully shown. Various other veins have been worked, and within the past tighteen months, however, the owners have discovered deposits of ore in Crowder's Mountain, (five veins of iron ore, are exposed), which were unknown before, and which will furnish an amount of good ore, easily worked and above water, that must make it one of the most desirable iron properties

fore, and which will furnish an amount of good ore, easily worked and above water, that must make it one of the most desirable iron properties to be found. They have discovered on the pinnacle of this mountain, which is 1000 feet above the level land, 2200 feet above the sea level, a vein of ore eight feet wide, which crops out at various points from the top to the bottom of the mountain, showing in one place about 20 feet of solid vein. This vein can be traced over the top of the mountain for over a mile, and this deposit alone would afford an almost inexhaustible supply of ore, easily worked, and above the water line. In addition to this four other veins have been found on this mountain. The ore is a mottled gray ore, showing on analysis from 45 to 65 per cent. of metallic iron, with a small amount of titanic acid, and without any sulphur or phosphorus. The quantity of ore in this mountain is simply inexhaustible and of good quality.

mountain; is simply inexhaustible and of good quality.

Besides Crowder's Mountain the owners possess. King's Mountain, for about seven miles, whose pirmacle is the highest point of land from Richmond to Atlanta, except Mt. Airy, in Georgia, and they have reason to believe this mountain is full of ore also. In addition to iron ore the property has manganese, limestone clay for making fire-proof brick, gold and other minerals. Very pure and excellent barytese has just been found in large quantity.

manganese, limestone clay for making lire-proof brick, gold and other minerals. Very pure and excellent barytese has just been found in large quantity.

As a stock and dairy farm it offers fine opportunities to those who may wish to engage in such business. It has from three to four thousand acres of level or only slightly rolling land, which produces grass, grain and all kinds of farming products linely, and it is well supplied with water by unfalling springs and branches.

The other 4,000 acres embraced in the mountain sides are productive of fine grass and herdage, and afford excellent natural pasturage for sheep and cattle. The climate is so mild that but little shelter for stock is needed in the coldest winters. The whole six thousand acres are now dovered with a fine growth of timber of all kinds, such as pine, hickory, oak, walnut, cedar, etc. The land is well suited to farming purposes, by those who wish to colonize. Cotton, own, peak, oats, clover and grass, and fruits of all kinds are produced beautifully, and it is specially suited to grapes and small fruits. It could be divided into small farms that would give to each farm variety of soil, and level and hilly and. It is situated in the Piedmont belt, which is noted for the salubrity of its climate, and the healthiness of its atmosphere. It is a region free from malaria and other unhealthy influences. It is located with great convenience to railroad facilities, being situated at from two to four miles from King's Mountain Station, on a railway that has the most extensive connections with all parts of the country, and which offers great inducements to those who are trying to develop the country along its lines. The owners will sell this property to suit purchasers, as follows: The whole tract, including nifneral interest, or will sell one-half the mineral interest of this proper

17 14616 scres, a well improved farm, one mile N. C. Railroad, good dwelling, 6 rooms, with all necessary outbuildings, good orchard well, adapted for grain and grass. Stock and farming implements will be sold with the place if desired. Terms easy.

will be sold with the place it desired.

Price \$19 per acre.

Tract of Land, 150 acres, located in Lincoln county, N. C., adjoining lands of Goodson are Payne unit others, 6 miles from Benver, 23 from Charlotte, and 18 from Dayldson College. Has on it is good dwelling, 7 from a lines, and well adapted land, good orchard, good water, and well adapted for grains, grasses, corn, wheat, tobacco, cotton, etc.; 35 acres good bottom land. In fine state of cultivation. Price \$2,250.

eultivation. Price \$2,250.

19 Tract of Land, 8 miles south of Charlotte, 62 acres, known as part of the Samuel Taylor tract, on which is an undeveloped gold mine, (known in the N. C. Reports as the Sam Taylor mine), three frame tenement, houses, two soams stand, good bears, good was water, this good spring in the premises. Som wishout reserve for \$1.450.

20 One Dwelling, 6 rooms, two room kitchen, well or water, lot 85x215 on west side of Myers street, near Fourth. Price \$1.500.

21 One unimproved to, 85x215 feet on corner of Myers and Fourth streets, near Myers, let failled. Price \$550.

22 On Dwelling, 4 rooms, on Fourth street, near Myers, let failled. Price \$550.

33 Two unimproved tos 50x188, on north side of West Fifth street. Price \$200 each.

BUILDING UP INDUSTRIES.

The Savannah News, speaking of the development of the country, says: One thing that retards the develop-ment of the manufacturing interests of many places is a want of apprecia tion of the value and power of co-operation and the inauguration of manufacturing enterprises by many small stockholders. The people are too much disposed to depend on capitalists. Towns will often offer large bonuses and valuable franchises to secure the investment of capital in manufactories, which when firmly established are often used to the disadvantage of the towns which helped

There is scarcely a village of five hundred inhabitants in the South but should have one or more factories, owned and controlled by the people of the village and surrounding country. Almost any community can raise \$50,000 or \$100,000 with which to establish such enterprises. Say subscriptions to stock are secured for

a \$100,000 enterprise as follows: 20 men take \$1,000 each....\$ 20,000 100 men take 500 each..... 50,000 200 men take 100 each..... 20,000 200 men take 50 each,.... 10,000

Let it be understood that the stock Let it be understood that the stock is to be paid for in easy installments, say 10 per cent. every four or six months. The first installment of \$19,000 will secure the necessary land—possibly a water power. The next installment will procure the necessary materials for buildings. By the time the buildings can be erected the third installment becomes due and a norinstallment becomes due and a por-tion of the machinery may be ordered, and by the time it can be manufactured the fourth and fifth installments can be collected and the machinery ordered paid for. The sixth call will pay freight and for placing the machinery in position. The seventh will secure material and start the wheels to rolling with a healthy cash working capital. The eighth, ninth and tenth as they are called in will add to the machinery or buildings of other features as may be required. Thus, in from three to five years almost any thriving business town may establish a first class manufacturing enterprise without manufacturing enterprise without feeling that it is burdened. A large

workmen might take stock and allow a percentage of their wages to go in payment therefor, One town or community might have a cotton factory, another a woolen mill, another a wagon factory another a flour mill, another a furniture factory, another a fertilizer fac-tory, and another an iron mill, each in accordance with its natural re-

number of stockholders may pay

their assessments in lands or mate-

rials or labor. The better class of

sources and advantages. There is good, hard sense in every line of this, but there are many industries that could be started on the plan suggested here with a much smaller capital than \$100,000, and which would in the end not only handsomely pay the investers, but also prove immensely profitable to the localities and sections in which they were established. There are numerous articles which enter into every day use among our people, in their houses, on their farm or elsewhere, which we now buy from the North, which could be made here as well as there. We have the material in abundance, which in many instances is shipped in a raw state North to supply Northern manufacturers, at a low price, and good transportation for our wares, all needed being the men and the money to engage in the work. The manufacture of cotton and wool are great industries which will bring millions to the South, and help to make her both rich and powerful, and they ought to be encouraged, but with these should be numerous other industries, as diversified as possible, supplying not only our own wants, but the wants also of others. This is the road to true wealth, true prosperity and true independence.

"Here's a patriot for you. During the war Grover Cleveland, 26 years old and without a family to support was drafted and furnished a substitute" The above from the Washington Critic may be so or may not, but if so Blaine has the start of Cleveland on the substitute business, for Blaine got a substitute, had him appointed to a comfortable post at home, and after the war was over got the town to reimburse him the two hundred dollars which he paid the substitute. Cleveland can't get away with that record on the substitute business

Cyrus P. Mendenhall, one of the most prominent and respected of Greensboro's citizens, and for several erms mayor of the city, died at his residence there last Sunday. He was native of Guilford county, his parents belonging to the Society of Friends; a lawyer by profession, of acknowledged ability, and a public spirited, progressive citizen. He was, we think, about seventy years old, and had been in failing health for some time.

If bad grammar was John A Logan's only fault, his election would not be such a serious matter. We could wrestle through four years of bad grammar better than we could four years of Blaine and Logan consolidated cussedness.

The Alleghany, Va., Iron Mountain Mining Company has closed a contract to furnish a Northern firm with 50,000 tons of iron ore The ore is said to be of remarkably fine quality, and exists in almost inexhaustible quantity. The mineral deposits of Virginia promise to become its greatest source of wealth in the early

Savannah News: The neglect of sanitary considerations in the building of school houses adds thousands to the number of little graves every vear. There is an old fogy notion firmly rooted in the land that children have no rights any one is bound to

The New York Tribune says the election of Blaine and Logan will be a triumph of public morals. And now we would like to have the Tribune

OF DR. THOS. REID. This great man arrived at Princeton in the year 1768, and immediately entered upon the duties of his new station. He placed the plan of instruction in moral philosophy on a phylosophy of the human mind, which Dr. Reid afterwards developed

with so much success. The late Dr. Witherspoon, president of the College of New Jersey, whose vigor and originality of mind are generally known, once informed a friend that the first publication in Great Britain in which Reid's doc trine was suggested and in a degree developed, was as essay written by himself and published in a Scottish magazine, some years before Dr. Reid wrote ou the subject. Those who are acquainted with the talents

hesitation, accredit his claim. THE FIRST LITERARY JOURNALS IN AMERICA. As early as 1741 a kind of review was attempted by Dr. Franklin, who in a magazine which was continued only for a few months, gave notices of new American books and presented liberal extracts from them. Attempts of a similar kind were made in several successive works a few

afterwards, but with as little encouragement and success. Exertions lar review of American publications, Boston. They were conducted, however, on a very small scale, with little of the boldness and impartiality of true criticism, and commanded little attention from the public. They were, consequently, soon laid aside, as were several other undertakings which, from the share of public patronage and attention bestowed upon it, bids fair to be longer lived than

any of its predecessors. DR. SAMUEL JOHNSON

THE TELEGRAPH.

It is remarkable that the celebrated Dr. Samuel Johnson, when he had made great proficiency in literature, could not obtain the degree of Master of Arts from Trinity College, Dublin, hough powerful interest was made in his behalf for that purpose. In stances of the failure of applications of a similar kind, in favor of characters still more distingushed than Johnson was at that period, are also

It is said by a writer in the Philosophical Magazine, of London, that the celebrated Robert Hooke, the contemporary and friend of Boyle, invented a telegraph, on the same general plan of those which have been since used, and formally de scribed it in a paper read before the Royal Society, May 21, 1684. Though something like telegraphic communications had been attempted many centuries before, on particular military or civil emergencies, yet nothing of this kind was reduced to regular system, or much known, till the beginning of the 18th century, when M. Amontons, of France exhibited a telegraph on a new and convenient plan, It was not, however, until after the commencement of the French Revolution that this machine was generally applied to useful purposes or became an object of much

a plan which is said to be essentially different from any now in use in minutes.
