The owners of The Crowder's Mountain Iron Works beg to call the attention of capitalists iron manufacturers, stock and dairy men, and those who wish to settle colonies, to their property which offers inducements to the classes above named.

The property consists of Six Thousand Three Hundred Acres of land, located in the counties of Gaston and Cleaveland, in the State of North Carolina, at King's Mountain Depot, on the Atlanta and Charlotte Air Line railway, now owned by the Richmond and Danville railroad company. The property has been used for fifty years past as an iron property, and has been worked at various points, but chiefly at the site of the celebrated Yellow Ridge Ore Bank, which has always yielded an ore noted for its richness. In metallic iron, and its softness and toughness. This vein of ore, which extends for two miles in length, has been worked to the depth of 147 feet, showing at that depth a vein of ore about 40 feet wide, and analyzing as high as 66 per cent. of metallic iron. This vein has not been worked for twenty years, but the facts set forth can be fully shown. Various other veins have been worked, and within the past two years very large deposits of iron ore have been discovered at other points. Within the past eighteen months, however, the owners have discovered deposits of ore in Crowder's Mountain, (five veins of iron ore, and which will furnish an amount of good ore, easily worked and above water, that must make it one of the most desirable iron properties to be found. They have discovered on the pinnacle of this mountain, which is 1000 feet above the level land, 220 feet above the sea level, a vein of ore eight feet wide, which crops out at various points from the top to the bottom of the mountain, showing in one place about 20 feet of solid vein. This vein as mottled gray ore, showing on analysis from 45 to 65 per cent. of m

quality.

Besides Crowder's Mountain the owners possess King's Mountain, for about seven miles, whose pinnacie is the highest point of land from Richmond to Atlanta, except Mt. Airy, in Georgia, and they have reason to believe this mountain is full of ore also. In addition to iron ore the property has manganese, limestone clay for making fire-proof brick, gold and other minerals. Very pure and excellent barytese has just been found in large quantity.

brick, gold and other minerals. Very pure and excellent barytese has just been found in large quantity.

As a stock and dairy farm it offers fine opportunities to those who may wish to engage in such business. It has from three to four thousand acres of lovel or only slightly rolling land, which produces stass, grain and all kinds of farming products anely, and it is well supplied with water by unfailing springs and branches.

The other 4,000 acres embraced in the mountain sides are productive of fine grass and herdage, and afford excellent, natural pasturage for sheep and cattle. The climate is so mild that but little shelter for stock is needed in the coidest winters. The whole six thousand acres are now covered with a fine growth of timber of all kinds, such as pine, hickory, oak, walnut, cedar, etc. The land is well suited to farming purposes, by those who wish to colonize. Cotton, corn, peas, oats, clover and grass, and fruits of all kinds are produced beautifully, and it is specially suited to grapes and small fruits. It could be divided into small farms that would give to each farm variety of soil, and level and hilly and. It is situated in the Piedmont belt, which is noted for the salubrity of its climate, and the healthiness of its atmosphere. It is a region free from malarin and other unhealthy influences. It is located with great convenience to railroad facilities, being situated at from two to four miles from King's Mountain Station, on a railway that has the most extensive connections with all parts of the country, and which offers great inducements to those who are trying to develop the country along its lines. The owners will sell this property to suit purchasers, as follows: The whole tract, including milneral Interest, or will sell one half the mineral interest, or will sell one

mineral Springs, and to the widely-known Cleve-iand Springs.

The town of King's Mountain is also adjacent, where are good hotels, a flourishing and excellent high school, and several new and handsome churches. The owners invite the attention of all interested to this property, and ask an examination of it. Any further information regarding it will be promptly furnished by addressing R. E. Cochrane, Manager Charlotte Real Estate Agency.

The Yellow Ridge Ore Bank has been recently sold to a Pittsburg, Pa., company, and a German colonization company has recently bought 2,500 cres adjoining this property.

WAS IT IN THE TRADE? When the few ambitious and disappointed Democrats in this State put their heads together and organized the so called Liberal party, they wanted it distinctly understood that they were Democrats, and they adopted the catch title Liberal in contradistinction to what they called the Bourbonism of the regular Democratic organization. It made these few gentlemen as mad as wet hens to call them Republicans, or even to gently hint that they were drifting that way. Some of them even thought it necessary to deny that while visiting Washington they called upon
