16 Six Thousand Three Hundred Acres Land. The owners of The Crowder's Mountain from Works beg to call the attention of capitalists from manufacturers, stock and dairy men, and those who wish to settle colonies, to their property, which offers inducements to the classes above named.

The property consists of Six Thousand Three Hundred Acres of land, located in the countles of Gaston and Cleaveland, in the State of North Carolina, at King's Mountain Depot, on the Atlanta and Charlotte Air Line railway, now owned by the Richmond and Danville railroad company. The property has been used for fifty years past as an iron property, and has been worked at various points, but chiefly at the site of the celebrated Yellow Ridge Ore Bank, which has always yielded an ore noted for its richness in metallic iron, and its softness and toughness. This vein of ore, which extends for two miles in length, has been worked to the dept 1 147 feet, showing at that depth a vein of ore about 40 feet wide, and analyzing as high as 66 per cent. of metallic iron. This vein has not been worked for twenty years, but the facts set forth can be fully shown. Various other veins have been worked, and within the past eighteen months, however, the owners have discovered deposits of ron ore have been discovered at other points. Within the past eighteen months, however, the owners have discovered deposits of ore in Crowder's Mountain, (five veins of fron ore, are exposed), which were unknown before, and which will furnish an amount of good ore, easily worked and above water, that must make it one of the mountain, which is 1000 feet above the level and, 2200 feet above the sea level, a vein of ore eight feet wide, which crops out at various points from the top to the bottom of the mountain, showing in one place about 21 feet or solid vein. This vein can be traced over the top of the mountain,

YORK SOLILOQUIZES. I'm old York.

made me feel mean, I must confess. I didn't like this joint canvass business in the beginning, but I couldn't help it. Mott and Young and the balance of the revenue engineers said I had to come to the scratch, for the cause was desperate and the only chance was to boldly face the racket, even at the risk of being chawed.

If they had stuck to running the revenue machine and the darkies, and let old York play his own game in his own way, Scales and Jarvis and Coke and Vance never would have had the chance to pluck and chaw me up as they have done. I could have played that white

As an evidence of the "great gains' the Republican party in this State is making, they point to the fact that John M. Moring, of Durham, and one Mr. Reeves, of Surry, have "jined 'em." They forget to say that Mr. Moring wants to go to Congress and joined the Radicals for their votes. He is butting against Gen. Cox. It is not stated either what

It was started in Philadelphia, but not proving a success there, was moved to New York, where it is not doing any bet-

ter. The Judge boosted Secretary Lincoln for the Republican nomination for the Presidency, and in doing so savagely assailed Blaine and his record. But he has lately taken the stump for Blaine. In a joint discussion recently at Dunkirk, N. Y., after he had delivered a glowing eulogy on the Plumed Knight, his Democratic competitor opened the May number of The Continent and read in reply his terrific onslaught on Blaine. Tourgee, taken by surprise, did as York does when asked questions, hung his head and finally slunk to

Southern Trade Prospects. Baltimore Manufacturers' Record.

If any of our readers have been dis posed to-doubt our predictions of a heavy business throughout the Southrevenue into flinders (on the stump). ern States this fall and winter, we I could have claimed to be the man | would invite their attention to the numerous special reports to the Man-ufacturers' Record, published today. Notwithstanding the injury to the cotton crop from the long drouth, which fortunately has at last been broken in many parts of the South, the indications all point to a season of great activity and much prosperity of the windows and left old York A few months ago the severe stringency in the money market made it impossible for the planters to borrow money as freely as in times past, and it was feared that they would be unable to continue the cultivation of their crops, and that heavy losses would thus be entailed upon them. Instead of this, however, their inability to borrow necessitated a forced economy without causing any injury to the crops from the lack of cultivation, and it is now universally admitted that the cotton crop has this year been produced at a lower cost than ever before. Many of our reports make special mention of this, and say that the farmers are less in debt now than for some years, which is one of the most favorable conditions for en-

larged trade this season. Moreover, the production of foodstuffs has been greater than ever before, and instead of the South's spending from \$175,-000,000 to \$200,000,000 at the North and West for foodstuffs, as she has heretofore annually done, this amount will this year be reduced probably by fully one third, and possibly the reduction may be even larger. In industrial matters the prospect is equal ly cheering, and all indications point to a more rapid development of the material resources of the South this year than last; in fact, during the next twelve months more mills and factories, more foundries and machine

shops, and more mining enterprises will probably be started in the South than ever before in the same length of time. Outside capitalists are beginning to appreciate the advantages of the South, and are making liberal investments in all kinds of enterprises -railroad, mining and manufacturing -while the Southern people them selves are doing their full share in helping on the development of their country. The great exhibition at New Orleans will do almost incalculable good for the South, and will result in attracting millions of capital for in attracting millions of capital for investment, and many thousands of enterprising immigrants from other parts of this country, as well as from Europe. Looking over the whole field, we feel safe in predicting great activity in the South's industrial interests during 1884 '85, with every assurance of a constant and rapid development of all her vast material

ABOUT THE STATE.

correspondence which the Statesville
American started with such a grand
display of head-letter some time ago?
It was too thin a fraud to stick to.

The North State, Republican, of
Greensboro, tries to keep up the
courage of its people by assuring
them that they can rely on York's
election by at least 10,000 majority.

Seven hundred and twenty-five
thousand dollars, expended on public schools in this State by the
Democratic party, furnishes a striking illustration of the litterest the
Democratic party takes in the educaing illustration of the interest the Democratic party takes in the education of the children of the people.

If Dr. York does not like to be called a Republican, why does he not have the manliness to say that he is not. But he cannot say he is not, for he endorses "Blaine and Logan and the Republican platform in full,"

tions. As it was, however, he inflicted quite a severe cut on the right side of his throat, and another less severe over one of his eyes. He had been laboring under great mental excitement for a day or two. Mabson is an employe of the custom house, and for some time past he has appeared to be dissatisfied with the actions of his party, which has tended to increase the disarrangment of his mental equilibrium. He lost a great deal of blood.

Lumsden was caught in the machinery and fatally injured. Besides Crowder's Mountain the owners possess King's Mountain, for about seven miles, whose pinnacle is the highest point of land from Richmond to Atlanta, except Mt. In addition to iron ore the property has manganese, limestone clay for making fire-proof brick, gold and other minerals. Very pure and excellent barytese has just been found in large quantity.

anely, and it is well supplied with water by unfallag springs and branches.

The other 4,000 acres embraced in the mountain
sides are productive of fine grass and herdage, and
afford excellent natural pasturage for sheep and
cattle. The climate is so mild that but little shelter for stock is needed in the coldest winters. The
whole six thousand acres are now covered with a
fine growth of timber of all kinds, such as pine,
hickory, oak, wainut, cedar, etc. The land is well
suited to farming purposes, by those who wish to
colonize. Cotton, corn, peas, oats, clover and grass,
and fruits of all kinds are produced beautifully, and
it is specially suited to grapes and small fruits. It
could be divided into small farms that would give
to each farm variety of soil, and level and hilly
and. It is situated in the Piedmont beit, which is
noted for the salubrity of its climate, and the
healthiness of its atmosphere. It is a region free
from mataria and other unhealthy influences. It
is located with great convenience to railroad facilties, being situated at from two to four miles from
King's Mountain Station, on a railway that has the
most extensive connections with all parts of the
country, and which offers great inducements to
those who are trying to develop the country along
its lines. The owners will sell this property to suit
purchasers, as follows: The whole tract, including
mineral interests, for Sixty three Thousand Dollars,
