BOWING TO DESTINY.

Mr. Blaine kicked hard, very hard, out when he received the announcement of the canvass of the vote in New York it is said he accepted the results as settling the Presidential question cheerfully and expressed himself as having no regrets. Had he done this before he sent out those telegrams and instructions to the national Republican committee to claim everything we could more easily believe that he had no regrets. His defent has caused him the bitterest pangs of his life, as all his actions since the figures came in on the night of the election go to show. He is not only a beaten but he is a humiliated man, and his defeat puts that hope of the Presidency, which he has cherished for years forever beyond his reach He may not pass out from public life but he passes out from the list of possible presidential candidates of the future.

There are those among the Republican editors who_supported him who are now disposed to censure him harshly and hold him responsible for the defeat. That his record had much to do with his defeat there is no doubt as it drove away from bim the support of many Republicans who would have have stood by other nominees, but they knew that record when they nominated him, and should not now throw it up to him. They ought to remember, too, that with all that was against him he made a bold, a dash-Which we have just opened, and are satisfied we a brilliant campaign. There are few men in the Republican party who would have carried such a load and carried it as well. The wonder is not that he was beaten, but that he was not beaten worse He doubtless made mistakes in his canvass, one of the greatest of which, in our opinion, was dropping the tariff after the Ohio and West Virginia elections and unfurling the bloody shirt, by which he gained no votes and possibly lost many. In this he sunk at once from the high non sectional character which he at first assumed to the sectional demagogue and by doing so lost to some extent the respect of the bet-

ter class of people North and South. But with all this there was enough in his canvass to show that he was a man of no ordinary powers, and that in the language of Beecher he was an alluring candidate, who, with a less odious record to weigh him down would have been invincible

Who will mourn for Logan now?

Bas La Prarie, a Wisconsin halfbreed, is 106 years old. For ninetyfive years he has chewed tobacco and taken his whiskey straight.

James Mulligan and Warren Fisher have not made any public remarks since the election, but they doubtless have taken much solid comfort from the figures,

Apropos of the kicking of the Republican galvanized corpse, the Cleveland Plain Dealer tells this anecdote; "An Irishman, passing through a graveyard, noticed on a monument the words, 'I still live.' He hesitated a moment, when he broke out, 'Be jabers, if I was dead I am sure I would acknowledge it!"

New York World: The vote of St. John, the Prohibition candidate, in this State-outside of New York city -foots up 24,041. Ben Butler, who cost the Blaine managers \$100,000, only polled 13,396 votes in the same territory. The average Republican politician can now be heard cursing St. John a distance of two miles these clear, frosty mornings.

President Arthur is reported as saying that he is not surprised at the defeat of Blaine, and that if he had been nominated he would have carried New York, which would have settled the Presidential question. Arthur would evidently have made a stronger candidate than Blaine, and would have been much harder to beat. He had no Mulligan record to

The magnificent Democratic gain in Iowa of some 55,000 over the vote of 1880, has put the adherents of the party in that State in a splendid humor. They are confident that the Republican majority will be wiped out altogether by 1888, and they are going to make a determined effort to carry the State in the next Guberna torial election. It would not be at all surprising if four years from now the Democrats should be able to boast of a solid West, extending from the Ohio and Indiana line to the Missouri river. They have a fine chance to capture Illinois, Michigan and Wisconsin when they get into power and show the country that they are truly for reform in the public service and a reduction of the burdens of the pec-

The municipal debt of New York is \$125,810,000. A constitutional amendment was adopted at the election on the 4th inst., prohibiting any city of more than 10,000 inhabitants contracting an indebtedness exceeding 10 per cent of the assessed value of its real estate subject to taxation.

Frank Hurd is said to be preparing a speech to be delivered at the coming session of Congress, in which he will urge Democratic harmony on the tariff question, and will cut himself loose from the extreme low tariff wing of the party.

NEW LOCAL ANÆSTHETIC.

Remarkable Experiments with Muriate The Philadelphia Medical and Surgical Reporter, Nov. 8, has the fol

lowing interesting particulars in regard to the new anæsthetic and experiments in surgery made with it. Recently a new article has been brought to our notice by Dr. Koller, of Vienna, which seems to promise

much. It is the active principle of coca or cocaine, and this agent is produced or extracted by displace ment with hot water on the leaves of the erythroxylon coca, (aat. ord erythroxylacce) a shrub indigenous to the mountains of Peru and Boliva. He found that the introduction of one to three drops of a 2 per cent. watery solution of muriate of cocaine into the corneal chamber rendered both the conjunctiva and cornea completely insensitive, so that, for instance, the cornea could be partially gouged without any reflex action or sense of pain. At the meeting of the Ophthalmological Congress at Heidleberg the same fact was confirmed and demonstrated by Drs. Reallant and Backer. Brellaur and Becker.

A 2 per cent solution has been chiefly employed, and even a half per cent., has been employed with success in the ophthalmic clinic of Jefferson Medical college Hospital in two operations for strabismus by Dr. William Thomson. On October 31, 1884, we witnessed the two opera tions, which are perhaps the most painful in surgery. The cornea could be rubbed with the book, and the eye speculum gave no pain, even the grasping of the conjunctiva with the forceps was borne without the slightest evidence of pain, and in the cutting twice of the tendon of the straight muscle of the eye there was not the slightest movement or evidence of distress. It proved a true mydriatic by dilating the pupil even every four minutes. The dilatation of the pupil of the pupil began in fourteen to fifteen minutes after the solution was instilled into the eye, and reached its maximum in from thirty to forty minutes, remaining stationary for one hour, and gradually declining in twenty-four hours. In the same eye of the patient atro-pia in solution had been introduced, and the cocaine after, but they did not interfere with each other.

We have also seen this agent used by Dr. Shakespeare, of this city. He dropped a 4 per cent. solution into the eyes of two patients with cata ract with the result of producing very complete anaesthesia in the eye so treated, so much so that he was enabled to perform indectomy with

enabled to per orm indectomy with out eliciting any evidence of pain.

It has been used by Dr. Charles S. Turnbull, who, on November 2, operated upon the eye of a patient from the iron district of Pennsylvania, who two weeks since had his eye badly injured by a piece of steel. The operation of making an artificial pupil was required to restore the sight. A drop of a 4 per cent. solution of the drug was dropped into the injured eye every five minutes for half an hour, at the end of which time the finger could be rubbed over the eyeball without any sensation other than a touch. The apparatus to hold the lids apart and the forceps to hold the lids apart and the forceps with which the skin of the eye ball

was grasped caused no pain. This anæsthetic has also been used in a few cases within the past two weeks by one cr two eminent oculists in New York. This material is costly at present, and as it has not been made in this country, it will be some time before it will be cheap enough to be used in ordinary practice. It was used on Monday, October 27, for the first time at the Mount. Sinai Hospital. A woman 50 years of age, who was totally blind, was admitted to the hospital. She was suffering with double cataract.

On the afternoon of October 27 she was taken to the operating room.

The hospital staff and a number of physicians were present. The attending physician had a quantity of the new anæsthetic. It is a colorless fluid, without taste or odor. The eyelids being held wide open, four drops of the liquid were cautiously dropped upon the surface of the eyes. It produced a slight anæsthetic effect upon the external coating After an interval of five minutes four drops more were applied, which caused the insensible condition to extend deper insensible condition to extend deeper and after waiting another five min utes four drops more were used. After the last application had done its work, the sensation of the eyes was tested and they were found to be entirely anæsthetized. A pair of fixation forceps, the application of which no healthy eye can stand without causing a visible shrinking, were then applied and adjusted without any sensation being felt by the patient.

It is to be noted that the tincture fluid extract and wine of cocoa have been tried as local anæsthetics, but that they only produce a slight ob-tunding influence upon the surfaces to which they are applied, while the alkaloid of c.ca or cocaine would seem to have a decided anæsthetic effect.

The Negroes Deserting Mahone.

A Richmond dispatch says: The utter hopelessness of Mahone's future ASSORTED PRESERVES in this State can be appreciated when it is understood that even his colored supporters are showing signs of de-serting him. Intelligence received here from many of the black districts indicates that the colored voters are manifesting a disposition to act for themselves in future political con-tests in this State. Independent col-ored Republican leaders in several of the black counties have already callored Republican leaders in several of the black counties have already call-ed meetings of their race, to be held at an early day, to consider the pro-priety of cutting loose from Mahone and other leaders of his party. Since and other leaders of his party. Since the election of Cleveland many of the more intelligent colored men here have expressed the opinion that the voters of their race in this State can-not longer be blindly led by the Re-publicans.

REDUCING WAGES ome of the Results of Competition the Iron Business.

FALL RIVER, Nov. 17.—The Old Colony and Mount Hope companies of Somerset have posted notices of a reduction of 10 per cent. in present wages of all their employees, the reduction to go into effect December lst. This is said by the employees to be the third reduction made by the works in two years, the first two per cent each, and that when the new prices become operative they will be receiving forty per cent. les for their work than is marked as the card prices. The manufacturers say that the overstocked market, caused by the competition of iron mills of middle and western districts has forced them either to shut down or make a reduction and they chos the latter course in order to keep their employers at work. The Old Colony mill at Sumerset is a branch of the Old Colony company at Taunton which is one of the largest concerns in the Eastern district. Nailers w now get about \$2 25 per day, helpers about \$1.25 and puddlers about \$1.7 No trouble will ensue from the duction as the men are anxious to work preferring reduced pay to idle-

Errors in Casting the Eirc oval Vote. Philadelphia Times.

It behooves both national commitlees to issue explicit directions to the officials of all the States concerning the casting and the certification of their electoral vote on the first Weddoing this is about all the excuse they have for existence for nearly four vears to come

Four years ago the vote of the State of Georgia was lost to General Hancock, because of an informality in certifying it to the President of the Senate. Its loss did not affect the result in any way, but it might easily have done so and produced serious consequences. Irregularities of a technical nature were developed in other returns. But they could not change the result and were permitted

While the appointment of electors is purely an affair for the States, the counting is a function of the Federal government, the laws of which should be observed even to the remotest technical detail. If any doubt exist as to any of these an explicit circular of instruction from the national com-mittees would jundoubtedly produce favorable results.

While the vote in the electoral col-

lege is not close, it is still desirable that the people of no State should lose their voice because of the ignorance of their officials This can easily be guarded against by following the course suggested.

The report of the Director of the Mints shows that the Mint has turned out during the year over \$28,000,000 of standard silver dollars, to add to add to the millions of those coins already in the Treasury vaults at Washington. The production of precious anetals for the year 1884 will probably be, when the full returns for the close of the year are in gold, \$29,000,000; silver, at its standard della coincipe and the control of the control dollar coining rate, \$48,000,000. Mr. Burchard estimates the coin circulation of the United States at the close of the last fiscal year to have been about \$765,000,000, of which \$537,000, 000 was gold and \$228,000,000 silver. Upon the same basis the coin circulation July 12, 1884, was \$802,000,000, of which \$250,000,000 was silver and nearly \$552,000,000 gold.

A Good Many Failures. During the year 1883 there were 10.568 failures in the United States and Canada. Some of these were big concerns, and some very small Failures is sorrowful business to any man, especially if it is his health that tails. A great many times 10.568 people fail in health in the caurse of a year. Many of them might be saved if they would take Brown's from Bitters, the great family medicine and restorer of wasted health
