CALIFORNIA FRUIT.

California will eventually become, if she is not already, the greatest fruit-producing State in the Union. The last steamer which left San Francisco for Australia carried 12,500 boxes of apples. These were all of selected fruit and packed in the orchards expressly for shipment, each apple wrapped in paper, the same in no way interfering with the local supply. The Los Angeles Herald, in alluding to the large shipment of fruit and produce from California, states that the shipments by sea and rail from Los Angeles consist of a wonderful list of articles which would fairly astonish the people who live on the other side of the mountains, where winter rules for half the year.

It is stated that General Grant had \$200,000 worth of first-class railroad mortgage bonds, which were left for safe keeping in a vault where Ward kept his valuables. After the failure it was found that the securities had disappeared, and subsequently Ward admitted he had sold them and made away with the money.

Insurance Suits.

Correspondence of the Raleigh Visitor.

GREENSBORO, Oct. 14, 1881.—Judges Bond and Dick heard today the motion of the counsel for the Georgia Home Fire Insurance Company to place the Brown Manufacturing Company suits on the equity side of the docket. The motion was ably argued on both sides—Mr. Watson and Col. Staples against the removal to the Equity court, and Judges Crump and Schenk for the removal thereto. The argument consumed about two hours.

The court upon consideration granted the motion for removal, yet allowing the facts, if necessary, to be given to the jury. There seems to be some doubt as to the reconcilability of this division of the matters at issue, and it may yet be determined by the court that no part of the issue or facts shall be allowed to be given to a jury.

At all events the cases are ended for this term of the court, and the witnesses are all discharged. The plaintiffs will now have to file a bill in Equity or Chancery, and bring their action in the court of Equity. The Judges indicated that this would also bring the case of the North Carolina Home Fire Ins. Co., now pending in Surry Superior Court; also, within the jurisdiction of the United States Circuit Court, and under this ruling of the court as to the equity proceeding. This is not yet fully established, and an injunction may have to be sued out by the defendant's counsel to stop the further proceedings in Surry Superior Court. The removal to the Equity Court will delay the decision of these suits necessarily, as all the evidence will have to be taken by depositions, and the Judge alone will pass upon the merits—facts and law governing the cases—instead of a jury. I do not know what particular advantage will accrue to either side, but judging from the zeal and impetuosity manifested by the plaintiff's counsel in resisting the motion for removal, it would appear that the plaintiff has sustained a defeat and a disadvantage.

The case seemed to excite considerable interest. The court room was crowded, and the spectators listened to the learned arguments and legal skill displayed with unmistakable earnestness and satisfaction. What is to be the end of the Brown Manufacturing suits is yet to be determined, but the companies have at least a longer breathing spell before "forking over" the pounds, shillings and pence.

GREENSBORO, Oct. 15.—Today Judge Bond signed the decree placing the Brown Manufacturing suit against all the insurance companies on the equity side of the docket, and allowing the issues of fact to go to a jury if desired by either plaintiff or defendant; and also decreed that the case pending in Surry court shall be embraced in the decree, and shall stand upon the same footing as all the other cases which have been regularly removed from Surry court to the United States District court.

It Astonished the Public

to hear of the resignation of Dr. Pierce as a Congressman to devote himself solely to his labors as a physician. It was because his true constituents were the sick and afflicted everywhere. They will find Dr. Pierce's "Golden Medical Discovery" a beneficial use of his scientific knowledge in their behalf. Consumption, bronchitis, cough, heart disease, fever and ague, intermittent fever, dropsy, neuralgia, colic or thick neck, and all diseases of the blood, are cured by this world-renowned medicine. Its properties are wonderful, its action magical.

Raleigh's Electric Lights.

At a special meeting of the board of aldermen held last night, the petition of Mr. C. M. McNett, of Washington, D. C., for the privilege of operating a general system of electric lighting in the city was granted. Mr. McNett was given the exclusive right for three years to locate poles and run wires through the streets for the purpose of distributing the light. There was but one vote against granting the easement. The prices to be charged were regulated by the board as follows: Fifteen dollars a month for each single light; \$12 a light when more than one light is taken; the lights to burn till midnight; for incandescent lights, when the incandescent shall be commenced, \$15 for every nine (9) lights; for arc lights, in case subscribers enough shall be obtained to warrant an all night current, \$16 and \$20. The Thompson-Houston is the system to be introduced. It furnishes a 2000 candle power to each lamp. It took the only gold medal for arc lighting given at the Great London international exhibition of last August and is the system used in most of the Northern and Western cities. It has recently been adopted by the electric company operating in Washington, instead of the United States and Brush systems, as superior to either of the latter. Mr. McNett has already obtained thirty subscribers to his system and will proceed immediately to put in the plant and begin operations.

The Southern Forestry Congress.
This congress will be held at Lake de Funiak, Fla., on December 16th, and will be largely attended. Gov. Perry, of that State, who has taken a deep interest in the matter, has extended invitations to the Governors of all the Southern States to be present, and to send one delegate for each congressional district. The late American Forestry Congress will also send delegates, who will advise with those from the South as to the best shape necessary to protect the southern forests from too rapid and extravagant destruction, and to call attention to the wealth and resources of the southern woodland.

Blotting out of Existence.

From the Edgefield Monitor.

The town of Summit, in Lexington county, has dried up and passed away and not only grass, but corn and cotton, are growing in the streets. A citizen of Gilbert Hollow has bought the site with the exception of two building lots and the owner of one of these has brought suit for damages against the bold iconoclast who has injured his business by turning what once promised to be a flourishing railroad town into a corn field. A good deal of interest is manifested in the progress of matters in that direction, and the final outcome is looked forward to with some anxious curiosity, as the questions to be decided involve some nice points of law which may be of more than passing interest and importance.

Pressing Autumn Leaves.

"You are the autumn leaf," said he, "And my arms are the book, you know; Now I place the leaf in the book, you see, And tenderly press it, so."

The maiden looked up with glance demure, And blushes her fair cheeks wore, As she softly whispered: "The leaf, I'm sure, Needs pressing a little more." —Boston Courier.

A Man With a Caudal Appendage.

There is a man in Willet Valley, near Collinsville, Alabama, named Turner Ransom, who has a well-developed tail. It grew from the base of the spinal column, is about nine inches long, and resembles the tail of a common dog. It is said to be the result of an ante natal fright.

Don't hawk, and blow, and spit, but use Dr. Sage's Catarrh Remedy.

sunthursky

Terribly Shakes

As the system is by fever and ague, and obstinate as that malarial, nevertheless Hostetter's Stomach Bitters will repair the damage that it does to the constitution and eradicate every trace of it. Used as a means of prevention, it invariably proves effectual. The most malignant forms of malarial disease prevalent in the tropics, the dreaded chills of the Gumbanian coast, the Chagras fever, and other types of miasmatic malarial, yield to and are prevented by it. Not only should it be used on the first symptom of a chill, but all persons residing in localities where malarial infection exists in air and water, should take it as a safeguard. It is an incomparable remedy for disorders of the stomach and bowels, for rheumatism, irritability of the bladder and kidneys, and for debility and bilious ailments.

Daughters, Wives and Mothers

We emphatically guarantee Dr. March's Catarrh, a Female Remedy, to cure female diseases, such as ovarian troubles, inflammation and ulceration, falling and displacement or bearing down feeling, irregularities, barrenness, change of life, leucorrhoea, besides many weaknesses springing from the above, like headache, bloating, spinal weakness, sleeplessness, nervous debility, palpitation of the heart, &c. For sale by druggists. Price \$1.00 and \$1.50 per bottle. Send to Dr. J. B. March, Chicago, N. Y., for sample, free.

Per sale by L. R. Wriston, druggist, Charlotte, N. C.
