#### HYDROPHOBIA.

Some Interesting Facts as to M. Pasteur's Methods.

Paris has become the objective point time had been thus wasted a county of pilgrimages from all parts of the convention came along A county globe, his reported discovery, or attorney was to be nominated and rather contrivance, of a prevention Mr. Dawson's name was proposed. given him a unique position among gal abilities, but this was crushed by the world's great physicians. The exact limits of his power over the didn't "make a bit of difference terrible disease produced in the human subject by the bite of certain he was nominated it would stop that rabid animals are not yet perhaps eld flute music." Mr. Dawson was ascertained, but it is hardly open to nominated and the campaign began. dispute that his three years of study It waxed hot between Mr. Dawson of hydrophobia have been productive and his opponent. The issue was the of very premising results. It is per- dute. The point was made for Mr. haps safe to go beyond this, and to Dawson that if he should be elected concede that M. Pasteur's snocula there would be peace in the commun tions with portions of nervous matter ity, and if he was defeated the town taken from animals suffering from would demand his removal. He was rabies have been followed by results elected and made a good officer. He that bear comparison with the benefits soon showed that he was a pretty that accrue from inoculations with fair lawyer. After awhile there was vaccine virus. Hydrophobia is caused a district convention to nominate a by a specific poisen, which, it is prosecuting attorney for the judicial thought, may develop spontaneously district composed of Atchison, Noda in the dog and some other animals, way. Hall and Andrews counties. but not in man. The bite of a mad Mr. Dawson began worrying the flute dog is the usual origin of the disease in man, though the cat, wolf and fox may also transmit it. The fluids of the mouth are commonly supposed to be the chief source of the poison, letter leaves and man the title of the cat. The fluids of the district and on that he was to be the chief source of the poison, letter leaves and more than title of the cat. per, &c., suffering apparently from hallucination. He may or may not avoid water. It is only by confining and watching a suspected animal that the owner can be sure whether it suffers from hydrophobia or from some other of the many ills to which our pets are subject.

The symptoms of hydrophobia usu-The symptoms of hydrophobia usually exhbit themselves in from thirty to forty days after the bite; intervals of six months or a year are rare and doubtful. Prompt cauterization of the wound may at times prevent ful superiority of certain violins made generations ago by Italian artisments. lation. The last inoculations are made with a virus whose strength has been artificially increased by "cultivation." This cultivation consists in inoculating a rabbit with a particle of the spinal cord of a mad dog, and when, after fifteen days, this rabbit dies of hydrophobia, sixty other rabbits are in succession inoculated, one from another, until, as the virus becomes stronger, the sixtieth rabbit dies on the seventh day. A dieck has manufactured some violins at Cincinnati that have the ring of the valued and treasured old Italian instruments. The clear, rich, resonant tone appears to be owing to the material of which the violin is made. This is a peculiar wood, said to be a species of balsam pine. Violinists in Germany and artists in Italy give glowing testimony respecting the Cincinnati instruments, and rejoicing that a long lost secret has been rabbit dies on the seventh day. A ing that a long lost secret has been man inoculated with the weakest disclosed. virus would not be protected, but after having been gradually prepared by inoculation with cultivations of

length, it is held, arrives at a state in which he is proof against the virus of the ordinary mad dog. Such at least is the theory. The experience of the four children recently sent over to Paris from Newark will go far to show whether it is well founded. It

#### THE FLUTE IN POLITICS

Effect on Obstreperous Delegates of a Missourian's Performances on a Flute.

Chicago Herald. The dispatches say that Col. Lafay ette Dawson, of Missouri, has been appointed by President Cleveland a Justice in Alaska. About twelve years ago Mr. Dawson was almost unheard of, save in the little town of

Maryville, where he had a law office in a little back room over a bakery. His outfit consisted of a pine table, a copy of the Missouri Statutes, a blotting pad, a penholder and one pen, a stove with brick for the legs, and a flute. Now and then Mr. Daw sen would have occasion to consult the law book on his table, but most of the time was occupied in working up a sentiment in the community against himself on account of his af-The laboratory of M. Pasteur at fections for the flute. After some

but according to M. Pasteur, it is concentrated chiefly in the nervous system. The flesh is not, it appears, afvention was next in order, and fected. A veterinarian recently sta- Major Dawson aspired to represent ted to a horrified Prussian audience his county. A gentle protest was en that he had a hundred times eaten tered by a man named Moorehouse, the uucooked flesh of rabid cows and horses without bad results. Not all ed to know if Dawson wanted the curs of eccentric demeanor are to be earth. The inquiry had scarcely thought mad. The animal affected been made when the wheezy notes thought mad. The animal allected that are the flute crawled out of Dawson's tay hydrophobia is shy and irritable, of the flute crawled out of Dawson's refuses food, eats bits of straw, pas window. He was elected a delegate Large line of Black Goods as low as 12½c. per yard.

the development of the disease, but made generations ago by Italian art-once developed, it is almost sure to ists, Since then no skill, no modern prove fatal. By exposing portions of analysis, experiment or ingenuity the brain or spinal cord of a rabid has been able to produce such impleanimal to dried air, the minute creaments, It has been, therefore, a fretures to whose activity the disease is quent inference that materials had as supposed to be due lose their vigor to much to do with the matter as form some extent, and with this weakened and skill. It would be a singular virus M. Pasteur makes his first in-oculation, increasing the strength of found in the United States, yet such the virus with each successive inoculations are dieck has manufactured some violins

#### A Mayor Pleads Guilty.

The queer spectacle of a mayor of a city pleading guilty of the charge of a misdemeanor was witnessed in the City Court of Louisville Ky. Last Sunday Mayor Reed fought in front of a barroom with Wharfmaster Kremer about an election bet. Saturday morning both of them were presented to the Police Court. The It is possible, of course, that rabies may develop in one or more of the children before they reach Paris, in which case M. Pasteur would not expended by the children before they result from his treatment; but it may be hoped both that the disease will not mature so did wrong in conscious friendship, did wrong in appearing upon the public street in front of a bar-room and offering to bet money on an election on the Sabbath day, as I there-by violated the law which it is my duty to enforce, hence I desire to While Keene was playing Richard plead guilty to the charge as made, III in Little Rock, just as he called with feelings of humiliation and regret, and am anxious to pay such penalty as the court may see proper to inflict." The mayor was fined \$20.

Dr. S. W. COHEN, of Waco, Texas, says: "I have and no family will ever be without it after once using it, and discovering its marvelous power. It is put up in large family bottles, and sold for the small price of 60 cents a bottle. Sold by T. C. Smith & Co.
