WASHINGTON LETTER

THE FEDERAL FEE BILL.

A Bill Very Rigid in Its Terms-

The Senate Backing Down-Personal, &c. On the day of its introduction it was not possible to give full details of the very elaborate bill reported for the Committee on the Expenditures of the Department of Justice on the subject of Marshals, District Attorneys and Clerks' fees. I This measure provides that marshals and district attorneys shall receive salariee, instead of fees and be allowed their actual expenses for transportation going to and returning from

court: They are required to render itemized accounts verified. Assistants and clerks are also allowed such amounts for actual transportations. The district attorneys for Western North Carolina and South Carolina receive under this bill \$4,000 salary. The district attorney for the Eastern District of North Carolina is paid \$3,000 with many others. The Western North Carolina marshal's salary is \$3,000. The South Carolina marshal's is the same; the Eastern North Carolina marshal's \$3,000. The fees collected by of marshals and district attorneys are to be paid into court and all expenses taxed against other parties than the United States, There are various other require ments in this connection. The marshal is allowed one clerk and one chief deputy, if deemed necessary by the attorney general. In the districts with which we are concerned, the salary for these officials shall not exceed \$1,500 in any case. Where courts are held at more than one place the attorney general may allow either a clerk or chief deputy, but not both at such place, if the business requires it, at a salary not to exceed \$1,000. In no case shall fees

hereafter be allowed to the officers serving process except for committing and discharging prisoners. No such fee shall be paid to a chief deputy. No fees permitted where the

service could have been by mail. Only actual expenses of transportation when itemized allowed to deputy marshals, sheriffs and constables while serving processes. Where there is no public conveyance an al lowance of ten cents a mile each way is made in addition to the fees provided by law.

United States commissioners shall receive only \$1 for issuing process to arrest and \$1 for bond for court, also

\$5 for all other writs, processes, for all oaths, docketing, hearing and maintain them in reasonable decency and comfort. The men, on the other trying the same, but where there are two or more charges against one person the commissioner is allowed only one fee. Justices of the peace shall receive the same fees for serving in criminal cases. Their accounts must be verified and forwarded to the United States attorney.

Where one person is clerk of both Criminal and District courts, he shall not receive for both services more than \$3,000 per annum, (except the Southern district of New York,

Only fifty cents per meal for marshal, deputy or prisoners, each allowed in transportation. The bill is very rigid in its terms.

Jurors and witnesses receive actual and necessary expenditures for transportation, and witnesses \$1.50 and jurors \$2 a day during actual attendance at court, and for the time neces sarily occupied in going to and from the same, Deputy marshals and guarde receive \$2 per day.

The Senate backs down from its high and mighty position. By resolution adopted yesterday, and by action of the body in executive session, the collectors of internal revenue will all be confirmed. About this matter there is only one comment heard: The Senate finds itself occu pying an untenable position and re-

Havannah, via Tampa Bay and the roads belonging to the Line. Quite a number of Senators and Represen tatives will avail themselves of the privilege of a free junket. Senator Ransom will go as far as Weldon. No other member of either House from the two Carolinas will be aboard at 11 o'clock to-morrow. When the excursion starts. The Major is a live railroad man and has worked up here the interests of his fast line with remarkable ability and zeal.

The resolutions introduced by Mr.
Reid on Thursday were the joint production of Messrs. Reid and Henderson. This was stated or intended to be stated in my letter of that date

but Mr. Reid desires it to be generally understood. Mr. Skinner took part in the con-

sideration yesterday of the Indian Appropriation bill.

Gen. Cox has introduced a petition of twenty citizens of Wake county asking for the opening of the Indian Territory.

I hear that a letter has been received from Western North Carolina stating that Messrs. Wilson and Tate have sold ther marble quary to par-ties from the North for \$200,000. Mr. W. F. Leake, of Wadesburo,

passed through this city yesterday.

AN EPISODE OF THE WAR.

The City Presented with a Bill for Rations Served to a Com-

pany of Soldiers, A circumstance occurred in the mayor's office yesterday which quite dumbfounded the clerks and other attaches of the place for a time. Luke Reilly, of No. 831 Catharine street, handed to Major Linton a bill against the city for \$327 25. It bore the remote date of April 15, 1861, and represented the cost of meals furnished to 100 soldiers of the war composing to 100 soldiers of the war, composing Company A, of the Twenty-fourth Regiment Pennsylvania Volunteers.

The correctness of the bill was attested by John McHugh, the captain of the company, and Mr. Reilly himself. The latter explained that while the company was stationed in the third story of a building at the southwest corner of Twelfth and Chestnut streets he furnished meals to the men for seven days at the rate of 15 cents a meal. He had never been paid, and, as an evidence of his good faith, referred the mayor's secretary to Common Councilman Owen, who he said, was colonel of the regiment at the time, and would remember the occurrence. Mr. Reilly said that during the war he was worth \$75,000, and made no effort to collect the money. Reverses came upon him years afterward and left him penniless, and then the idea struck him that he had a just claim against the government for what had become to im in his present circumstances a

amounts to over \$1,000.

very considerable sum of money. He applied to the Washington authorities, but his bill was returned, with

instructions to collect it from the

New York Star Numerous strikes throughout the country are not only putting those immediately concerned to serious loss, but they are causing the public grave inconvenience. In some cases a tendency toward lawlessness has been developed, but, in the main, wonderfully good order has prevailed considering the number of exasper-

ated men who are now idle. The danger of disorder and the inconvenience to which the public is put by this condition of affairs unite to make these disputes between two opposing parties over a private interest a matter of public concern, and it is time that thoughful men were giving serious attention to devising a remedy. One solution that has been commonly looked to in the past might as well be dismissed, and that is the starvation of the strikers into submission to any terms the employers may dictate. The organization of labor is too complete and its power too manifest to allow such an end to

existing difficulties. It is clear that every one of these disputes arises from a difference of opinion that could be readily arbitrated by fair men in whom both the parties to the controversy, had con-fidence. There are natural limitations to the demands on either side and comfort. The men, on the other hand, cannot force the employers to pay them wages that will leave no margin of profit for the individuals or corporations conducting business. Somewhere between these two extremes is a happy medium that will allow fair profits to the employers allow fair profits to the employers and decent wages to the employed. This remedy can only be discovered in two ways; one is a frank conference of the representatives of the controversy and the other is the submission of the question to the arbitration of men having access to all the facts. One or the other of these solutions ought to be reluntarily.

the facts. One or the other of these solutions ought to be voluntarily accepted by both parties, and if this is not quickly done there are many indications of a disposition to compel such a submission by law. There is a growing popular feeling that the owners of valuable franchises must not be permitted to dispressed the not be permitted to disregard the public convenience because of a dispute their men over a question of wages that might easily be adjusted by conference or arbitration.

Do you ask me for my secret Why my teeth are pearly white? Why my breath is ever fragrant? And my goms are rosy bright? My secret's oft been told before-Use SOZODONT. And nothing more.

Fragrant Sozodont and invigorates the gums, purifies serves the teeth from routh to old age. Sold

Scott's Emulsion of Pure Cod Liver Dil, with Hypophosphites. Especialir Desirable for Children, A LADY physician at the Child's Hospital, at any, N. Y., says: "We have been using Scott's miston with great success, nearly all of our

tans find it very beneficial."

An Undoubted Blessing. About thirty years ago, a prominent physician by the name of Dr. William Hail discovered, or pro-duced after long experimental research, a remedy for diseases of the throat, chest, and lungs, which

nts are suffering from bone disease and our

THE NEW SOUTH.

STILL FORGING FORWARD.

Millions of Dollars Invested in

Rarely, if ever, before has the in-dustrial outlook at the South been so dustrial outlook at the South been so promising as at present. The cott n mills and iron works are running on full time; many of them are really crowded with orders, and their business is yielding better profits than for several years, and of other lines of manufactures the same is true. In the diversification of manufacturing interests there is very notable and interests there is very notable progress. During the last two weeks we have reported in our Construction Department the organization of many new enterprises, and among some of the most important were a \$100,000 sugar refinery in Kissimmee, Fla., a \$50,000 fertilizer company in Ocalla, an ice factory company in Sanford, broom factory at Tampa, a \$200,000 coal company at Mobile, Ala., a \$15,000 agricultural implement company in Rome, Ga., a tobacco factory and a \$50,000 company to manufacture pianos in Atlanta, an ice factory in Macon. a \$100,000 phos

phate company at Brunswick; a \$20,-000 gas company, a \$5,000,000 mining company and a \$50,000 lumber company in Arkansas; a \$300,000 wagon manufacturing company, a \$250,000 clock manufacturing company, a \$50,000 wooll manufacturing company, \$45,000 stove works, \$1,500,000 natural gas company, a \$60,000 com-pany to manufacture burglar alarms and electrical goods, and a stove foundry in Kentucky; in Louisiana

the list of new enterprises for two weeks includes a \$150,000 ice factory, a \$60,000 cotton compress and the prospects of a 5,000 spindle mill to manufacture ramie. North Carolina shows for the same period a \$50,000 company for the manufacture of coach material. some five or six new tobacco factories, a number of saw mills, mining enterprises and other industries, South Carolina a \$50,000 electric light company, while Tennessee reports a \$50,000 fruit-canning company, a \$50,000 natural gas company, a \$150,000 iron company, a shoe fac-tory, \$25,000 range and castings com-pany, a \$50,000 furniture manufac-

turing company, an ice factory, machine shop, a \$100,000 company to manufacture heating furnaces, a cheese factory, a marble company gas light company, grain elevator, flour mill company, a \$50,000 soap and chemical company, a hosiery mil company; in Texas there, have been reported a \$25,000 ice company, a \$25,000 electric light company, \$30,4000 cotton gin factory, \$50,000 gas works, \$50,000 lumber company, \$50,-000 rolling mill, a \$250,000 cotton oil company to build a mill, \$20,000 coffee and spice mill, a \$100,000 roller mill, a \$24,000 electric light and pow-

er company, a \$30,000 milling company and a \$15,000 flour mill; in Virginia, a \$1,000,000 tin mining company, an earthenware factory, a canning factory, machine shop, woolen mill, \$100,000 paper mill company and a flour mill, and in West Virginia a \$100,000 oil and gas company, an agricultural implement company, etc. As this is a record for two weeks only, and includes simply the most important industries organised or incorporated during that period, it shows that there is much industrial activity all through the South. In addition to the enterprises mentioned there have been many saw and planing mills and small industries generally. And the

indications are now favorable for some very extensive new enterprises.
The Pittsburgh papers announce that
Mr. Henri Hauman a noted Belgiau Mr. Henri Hauman a noted Belgian engineer, passed there last week on his way South, where he is going to lacate a large iron and steel plant for a powerful Belgian syndicate. These works, it is stated, will employ over 1,200 men, and will manufacture steel by the basic process. And so the good work goes on. Day after day adds to the new enterprises and to the wealth of the South. Col, A. K. McClure, the editor of the Philadelphia Times, who is a good authority, says:

"I regard the prospects of the South as even much better than the South as even much better than the Southern people themselves regard them. There is nothing in the history of the world that can be compared with the efforts of the Southern people to rehabilitate themselves. Considering the institution under which they was up their system of which they grew up, their system of labor which has been so violently revolutionized and the necessity for diversifying their industries, of which they knew nothing, it is marvelous how they have adapted themselves to the new order of things and to what a stage of advancement they have arrived in a few years. Pennsylvania has much more reason to fear the South in the manufacture of iron and in the competition than any foreign country. You will draw a large por-tion of our industry to your section, and we, as we have always done, will learn something new and go at it. There cannot be anything more insane than the raising of cotton here in the South where you have the benefit of splendid water power that never freezes and where everything tends to cheapen production, and then to ship that cotton away to bleak New England, and there to have it spun and woven. That sys-tem cannot last in the New South.

it is bound to come, there will be a revolution; and it cannot be far diss tant." No Boom that Science has Con-

Whenever capital comes South, where

ferred Has been fraught with greater blessings than that which has accurred to the lubabitants of malarial ridden portions of the United States and the Tropics from the use of Hostetters's Stomach Bit ters. The experience of many years has but too tent, congestive and bilious reevers, while on the other hand, it has been no less clearly shown that the use of the Bitters, medicine congenial to the frailest constitu and derived from purely botanic sources, affords and derived from burely became sources, another a reliable safeguard against malarial disease, and arrest it when developed. For disorders of the stomach, liver and bowels, for general debility and renal inactivity, it is also a most efficient remedy. Appetie and sleep are improved by it, it expels rheumatic humors from the blood, and enriches a circulation impoverished by mal-assimilation.
