THE WEAK AND DEBILITATED. Why Women Become Invalids. (From the SL Paul Pioneer Press.) The home life of woman has its pen-Their confinement and close application to household duties and the sedentary parsuits which are a part of their bring with them a train of evils whose name is legion. From her peculiar setion, she is more sensitive than the stronger sex-more casily persuaded and more ready in her belief of causes and

effects. Hence, for the thousand ills which flow from her position and habits, she is prone to fly at once for relief to drugs and nostrums. Besides, women are not permitted the advantages men have in the use of proper preventives, and she is left a prey to quackery and bad advice. In tarn, ood liver oil, beef tea, iron, nervines and notions are taken, which derange the stomach and enfeeble the nerves, without possessing any food value, and which increase the weaknesses of their delicate organism. In the development of the special functions from inadequate nutrition, the wasted form is only a too common sight. Under these conditions of an irregular and disordered system, the married state is entered into, and the pangs of maternity are encountered. The harmful effects of all kinds of drugs and harmful effects of all kinds of drugs and nostrums, which women would never take if they knew what they contain, is a prolific source of the aliments with which they are afflicted. A pure stimulant is often indispensible to their malady and is highly recommended by the most eminent physicians. The ques-tion has been heretofore, where to procure an absolutely pure and unadulterated arti-cle, free from fusel oil and other poisoneus impredients, that could be safely prescribed ingredients, that could be safely prescribed for their benefit. Eminent scientists and chemists have failed to find a trace of fusel oil in Duffy's pure malt whiskey, nor any adulteration whatever, and hence it has not only become the standard of purity, but a specific in medical practice. For such diseases as dyspepsia, indigestion, heart burn, faints and swoons, and wasting maladies, to which delicate women are prone, the highest medical anthorities give this pure stimulant a preference, and recommend its use medicinally.

BRADFIELD'S FEMALE REGULATOR Is strictly a vegetable compound, and is the pro uct at medical science and practical experience direct-id towards the benefit of

from the Rapid City Republican. The Rapid City Republican, pub-lished at Rapid City, Dakota, in its issue of April 15 has the following in relation to the Harney Peak Company's developments and progress in tin mining in the Black Hills, and especially of the operation of the Etta mine, the Coates and the Bob Inger soll mines, which are the richest the

company has yet developed : HOW THE TIN WAS DISCOVERED. The value of the tin annually imported into the United States in the shape of tin plate and block tin reachsince his first seizure. es the sum of over \$25,000,000. For years efforts have been made to discover a profitable tin mine in the United States, and although the ore has been discovered in many places, no locality discovered prior to 1880

produced the tin stone in sufficient quantity to make it profitable. A man named Cox, it is said was the first to recognize the cassiterite in the gravel washings in the Bear Gulch country. Contemporaneously\_tin stone was discovered at the Etta mine which was at that time being worked for mica. NEW YORK CAPITAL ENLISTED.

Lodes of enormous size have been discovered and developed, showing thousands of tons of ore which will

overreach the value of those of the rest of the world. The grand slumbering industry has been slow in coming to an awakening, but now it is thoroughly awake and will move on with great strides until the Black Hills shall stand forth as the grandest tin producing region of the world. A New York company had confi-

dence in the reports and sent experts to the Hills to examine into the truth of the statements, and as a consequence an examination of the Etta mine resulted in the sale of it to the New York syndicate. They at once proceeded in a business like manner and commenced the development of their property. The results were so flattering and promised such great success that the company commenc-

ed purchasing other mines in different parts of the tin area of the Southern Hills, and had a large concentration mill planned to work the ore. The plans were drawn up with direct and special reference to the working of the ores at the Etta Mine. The mill was made in accordance with the plans and shipped to the mine. Months elapsed between the time of

designing the mill and the time when the wheels of the grand monster plant were first revolved, a few days since, inaugurating what will prove to be one of the greatest mining in-

dustries in the world. THE VALUE OF THE YIELD. The average amount of tin stone in the ores at the Cornish mines is about

1.95 per cent. This may be consider-

New York Eun. The friends of ex-President Arthur are hoping against hope that a chage which took place in his condi-

tion yesterday may not prove to be a mere temporary or delusive improve-ment. Mr. Arthur felt better yesterday than on any other day during the past three weeks. He slept sound-ly all night without an anodyne or narcotic, and awoke in the morning refreshed and invigorated. He read the morning papers and skimmed over the pages of a novel. Hereto-fore he has been too weak to read continuously even for a short time, and all the news of the day that has

reached him has come through his sister, Mrs. McElroy, who has devot edly watched by his bed side ever

MR. ARTHUR'S HEALTH.

Mr. Arthur to k solid food yester-day for the third time since his reday for the third time since his re-lapse Mrs. McElroy with her own hands prepared the exPresident's dinner. It consisted of a piece of rare roast beef, cut in small morsels, and a few delicate stalks of early asparagus. The patient ate it with evident pleasure, and grumbled be-ceuse he could not have a second cause he could not have a second helping After dinner the ex-President sat in a cushioned reclining chair in his bedroom for an hour. chatting with his sister and daughter. He was in good spirits and felt san-guine that he would soon be able to take that long postponed drive in Central Park. No visitors called yesterday, with the single exception

of Dr. George A Peters who came at 1 o'clock. Dr. Peters was seen at his house, No. 12 West Twenty-ninth street yesterday afternoon. "All that I have to say about my patient can be summed up in one word-nothing!" exclaimed the iras-

cible old gentleman. "I consider it a wonton piece of impertinence that reporters should swoop down on my house, singly and in hordes, at all hours of the day and night, and pester me with supid questions. Why, sir, last night one of your gentlemen had the brazen impertinence to almost pull my door bell out by the roots at 12:30 o'clock, and when I shoved my head out of the window he leaned against the railing as cool as a cucumber and called out, 'How's President Arthur?

"What did you tell him, doctor?" "I told him to go -well, never mind what I told him. Once and for all I emphatically declined to say anything about Mr. Arthur's -health. The sooner this filters through the heads of the reporters and editors the better.

"Is there any truth in the rumor. doctor, that the ex-President's illness is caused by gout in the stomach?" Dr. Peters glared at his tormentor

## Substitute for the Blair Bill.

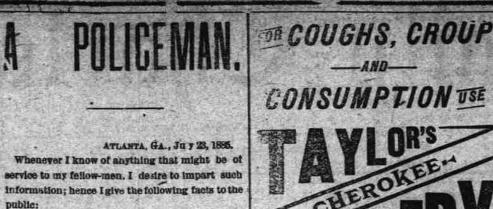

Old stool,

WASHINGTON, April 26.-The labor committee today decided upon a sub-stitute for the B air bill which will be reported tomorrow. It provides for the distribution of \$75,000,00 among the States for educational purposes, not more than \$7,500,000 a year, the money to be derived from the sale of public lands. It is to be distributed according to the population of each State of the scholastic age. Each State is to have absolute control of the disbursement of its share. This wipes out the objection made by Southern members to the Blair bill that it is unconstitutional.

# LITTLE SUFFERER Cleasned, Purified and Beauti-

find by the Cuticura Remedies

It affords me pleasure to give you this report of the cure of our little grandehild by your CUTICURA EXMEDITS. When six months old his left hand be gan to swell and had every appearance of a large boll. We poulticed it but all to no purpose. About five months after it became a running sore. Soon other sores f. rmei. He then had two of them on each hand, and his blood became more and more impure it took less time for them to breek out. A sore came on the chin, beneath the under lip, which was very offensive. His head was one sold scab, discharging a great deal. This was his condition at twenty-two months old, of consump-tion (scrofula of course). He could walk a little, but could not get up if he fell down, and could not move when in bed, having no use of his hands. I immediately commenced with the CUTICURA REM EDIES, using the CUTICURA and CUTICURA REM Correspondence Atlanta Journal. and sternly pointed in the direction tories, using the curitoria and curitoria soar f eely, and when he had taken one bottle of the CUTICULA RESOLVENT. his head was completely cured and he was improved in every way. We were very much encouraged, and continued the use of the Remedies for a year and a half. One sore after another healed, a bony matter forming in each one of these five deep ones just before healing, which would finally grow locse and were taken out; then they would heal rapidly. One of these ugly bone formations I preserved. After taking a dozen and a half bottles he was com-pletely cured, and is now, at the age of siz years, a strong and healthy child. The scars on his han is muit always remain; his hands are strong, though we once feared he would never be able to use them. All that physicians did for him did him no good. All who saw the child before using the CUTICURA REMEDIES and see the child now con-sider it a wonderful cure. If the above facts are of any use to you, you are at liberty to use them. MRS. E. S. DRIGGS, May 9, 1885. 612 R. Clay St., Bloomington, libs. The child was really in a worse condition than he called B. B. B. The child was really in a worse condition than he appeared to his grandmother, who, being with him every day, became accost med to the disease. MAGGIE HOPPING. of Blood Poison on record. His body and limbs had no less than four hundred small ulcers-his

Mrs. M. M. Prince, living at 38 West Fair St. Atlanta, Ga., has been troubled for several months with and ugly form of catarrh, attended with a copious and offensive discharge from both nestrils. Her system became so affected and reduced that she was confined to bed at my house for some time. and received the attention of three physicians; and used a dozen bottles of an extensively advertised blood remedy, all without the least benefit.

She finally commenced the use of B B. B. with a decided improvement at once, and when ten bottles had been used, she was entirely cured of all symptoms of estarrh. It gave her an appetite, and increased her

THE PRINTING TELEGRAPH. child born west of the Blue Ridge, and was the father-in-law of our townswas the father-in-law of our towns-man James E. Reid. — During the thunder storm which prevailed in this section last evening, two mules, belonging to Mr. James Brown, were being driven to a wagon by a young man whose name we did not learn. Wonderful Electrical Machine That Sends a Message and Heeps A number of bankers, lawyers, scientists and journalists gathered yesterday afternoon at the office of

At a point one mile from Asheville yesterday afternoon at the office of the International Printing Telegraph Company, No. 327 Walnut street to witness a practical test of an elec trical invention which, it is claimed, will largely supplant the telephone. This is the printing telegraph. The instrument looks very much like a type writer, but it has this advantage over a type-writer, that while it prints one copy, or manifold conies if Junction, a current of lightning struck the team, killing the mules in-stantiy, and shocking the driver to such an extent that his condition last night was critical and aroused fears east he should not recover.

Wilmington Star: Articles of in-Wilmington Star: Articles of in-corporation were filed yesterday with S. VanAmringe, Esq., Judge of Probate, for the Wilmington Electric Light Company, the object of which is stated to be for the making, pro-ducing, generating and furnishing light and motive power produced by or resulting from electric currents. The principal place of business is Wil-mington, and the incorporators are U E McNett, E E Burruss, John W Atkison, E P Balley, H A Burr. A D Brown, James Sprunt and William Latimer. The capital stock of the company is \$40,000, divided into four hundred shares of the val-ue of one hundred dollars each. The officers will be a president, secretary prints one copy, or manifold copies if desired, right before the operator's eyes, it prints exact duplicate copies at the other end of a telegraph wire, hundreds of thousands of miles away. Among other advantages which it possesses over the ordinary telegraph or telephone system is that it gives the sender an exact copy of every message that he sends, and places every word right before his eyes, so that any mistake will be at once de tected. It can be operated by any child who can read, and can be operated as fast as a type writer, which is considerably faster than the officers will be a president, secretary and treasurer, and a board of five directors to be elected by the stock-Morse telegraph system. As showing the advantages that the printing teleholders.

the advantages that the printing tele-graph possesses over anything now in use, it is claimed that a message can be transmitted to the possessor of an instrument in his absence from his office and he will find it recorded. The recording of the message at both points of sending and receiving pre-vents disputes as to the contents of the message. It is impossible to read by sound or to intercept a message by tapping the wires, thus rendering secrecy complete. Its absolute accu-racy renders it invaluable in com-mercial or financial transactions. Asheville Citizen: The telegraph informs us that our esteemed friend, Mrs, Bessie Rambough Johnston, of Mrs. Bessie Rambough Johnston, of Warm Springs, now on a visit to France, was married in Paris, on the 26th, to Mr. Stafford of Brooklyn, New York. Mrs. Stafford will re-main abroad for some time yet. She certainly has the best wishes of many friends in this section, but there are some who are grievously disappointed.——Mr. George Alex-ander, an old orchardist of the Swan-nanoa Valley, was on the square yes-terday with a wagon load of apples, fresh, plumb and ruddy, as if just plucked. Near the end of April, it is refreshing to see the fruits of the or-ohard in such fine preservation. mercial or financial transactions especially for bankers, merchants, railroads and all other persons re-quiring minute accuracy. It can be used as a stock indicator. It will duplicate the same

used as a stock indicator. It will duplicate the same message at any number of points, and can give any number of reproductions of an origi-nal message in transfor. Its use for newspapers is invaluable. A cor-respondent in Boston, for example, can call up offices in New York, Philadelphia, Baltimore and Cincin-nati and produce his copy in the of-fice of newspapers in each place ready for immediate use in the composing room. The instrument is both a re-ceiver and a transmitter. At the exhibition yesterday all that Salisbury Herald: Colonel Calvin J. Cowles, late assayer of the mint at Charlotte, has leased the Baker mine Charlotte, has leased the Baker mine near Morganton. It is a quartz vein carrying a small per cent of galena, assaying about \$10 in gold and 15 ources in silver to the ton. The mine was discovered some years ago by the gold in the surface dirt. — The Milledenville cotton mill because
