SOME NEW PATTERNS. We have just been making some new patterns for head shaft, hangers and head shaft pillow blocks. These paterns are of a design so far superior o anything that we have heretofore meen able to get from other makers that we are not only satisfied but ablesed with the results of our efforts. All our hangers are of very superior have put in them the best features of what was already on the market, and have put in them also some features us in position to introduce many new difficult. We make all our bearings, self-oiling. Who could deny that it is better to put sufficient oil in a hollow base of a bearing to last six months and then not be bothered about it again, than to have the old way of squirting oil on it every two or three hours and besides the trouble, generally having a mess also. By careful oiling of our bearings once in three to six months. according to the work, we get the very best results and we never have a sloppy mess of oil on the floor or on the machinery or on the cloth or whatever else we are making.
