

FINANCIAL AND COMMERCIAL

COTTON DECLINES 11 TO 20 POINTS

A selling movement led by brokers called to represent Wall Street caused a downward movement. New York, Sept. 29.—The cotton market opened firm at an advance of 37 points in response to the reactionary tendency of Liverpool futures, and immediately the call increased the net gain to a matter of some 700 points on the more active months on covering of shorts and moderate activity. But the weather South was good, and while some private crop reports indicated a reactionary tendency of the market, an estimate issued of the October condition was given a liberal interpretation, while the large receipts turned attention to the week's statistical showing. These considerations operated to check the advance, and after some irregularity the market in the afternoon broke sharply under aggressive selling for both accounts, promoted by rumors that Fall River was received lower firm offers from the South. The selling movement was led by brokers believed to be representing Wall Street, and accompanied by South river liquidation, and on the whole the stop orders were caught in some volume.

The market was finally steadied slightly by room short covering at a net loss of 11 1/2 points. Sales were estimated at 300,000 bales.

MILLER & CO.'S REPORTS.

Condition of the Cotton, Coffee, Sugar and Grain Markets.

By Private Wire to F. B. Alexander, Mgr.

COFFEE.

New York, Sept. 29.—Market changes have been insignificant to-day, but prices have turned upward in the afternoon. Receipts continue full at Brazilian cents. A large increase in the invisible supply is expected on the 30th of October, but it is claimed that it will be at the expense of the increased available stock in the hands of the merchants of the world, particularly in Europe. The coffee supply is in strong hands and will be firmly held unless the present belief in a very small yield should be abandoned, of which there is no suggestion now.

GRAIN.

Chicago, Sept. 29.—Wheat has a nervous local market, with a trend downward. The Southwest continues to contribute to the millers demand, but the prospective crop is not so large as the usually large percentage of the crop already marketed in Kansas. This amounts to 55 per cent. On the other hand, Minneapolis is short of a very poor cash demand, but four news was a little more optimistic.

Corn was firm at a moderate recession, and was little influenced by the weak tone in wheat. Receipts in the total were less than half those of a year ago. In the West, the market was quiet and the movement was quite liberal, while in the East movement is light.

Cats were quiet and firm, with some recession towards the close. There was fair local buying of May, presumably covering. Country receipts in the North were quiet and firm. The sample market was 1/2 cent lower.

Provisions.—The buying of October lard and the selling of January sent the former to 12 1/2 cent premium, and this was the feature of a rather quiet market. Packers generally bought October lard and the market was strong, while pork was a little easier. The selling was chiefly for commission houses. Hogs to-morrow, 16.00.

CASH PRICES: No. 3 yellow corn, 55; No. 3 white corn, not quoted; No. 2 corn, 53 1/2; Wheat, No. 3 red winter, 112; No. 2 hard wheat, 110 1/2; rye, 6.

COTTON.

New York, Sept. 29.—Pressure from American sources displaced the good advance scored by Liverpool during the early morning, and of the first gain of 6 points, only 1 point was retained at the close. There was a good deal of bearish pressure also exerted in this market. Miss Gile's report showed a decline in condition of only 4 1/2 points for the next month, which was accepted as indicating a bureau figure of about 7.5 on its face, a bearish argument. The market tomorrow will be the first day on October contracts, and quite a number of longs were liquidating in advance. News from the South is not so encouraging, and forgers being rather free. In the present case they want to be certain that their purchases will reach the ports in time to clear during October. This combination of circumstances was more than the market could withstand, and we have seen considerable liquidation after the expiration of strength. Prices shortly after the opening were 10 points higher than last night, but there has since been a decline of nearly 20 points. The market is far from the bottom and about 12 to 15 points lower than yesterday. It is possible that a dealer in the market, who has long interest is largely responsible for the farmer who has cotton for sale to have the task of disposing of it, made more difficult by the fact that he has to sell to his friends. Telegrams this afternoon from Fall River say that the market is headed with firm offers from the South. It would not be surprising to see mill owners take advantage of an opportunity to get cheap cotton, and free purchases would in all likelihood be followed by the reopening of the mills.

STOCKS.

New York, Sept. 29.—To-day enjoyed a fairly large volume of activity, but a certain amount of irregularity, due to profit-taking, was noticeable. The sales of this character at times were very heavy, but the effect upon prices was regarded as remarkably good. London's quotations were encouraging and foreign houses appeared on the buying side to a considerable extent. In the afternoon the market was decidedly encouraged by the general list. At the opening this stock sold 1/2 above last night's close, but it gradually receded until it had fallen two points from the highest, the close, however, being at a fractional recovery. The common declined fractions were encouraging and the railroad list was the sharp advance on comparatively small transactions in the high-priced anthracite coals. Delaware & Hudson rose 3/4. The market was firm on predictions of a dividend early next year, but it subsequently lost most of the gain on realizing. The earnings reached by several of the coal companies were considered eminently satisfactory under the circumstances, and much talk was heard with regard to the possibility of trade improvement and concealment of earnings by the coal companies. St. Paul was an early strong feature. Other strong features were Chesapeake & Ohio, Union Pacific, Canadian Pacific and some of the specialties. A final recovery in the list left quotations little changed from last night. The market closed fully steady.

Government bonds were unchanged; other bonds in good demand and firm. Total sales stocks, 792,100; bonds, \$4,774,000.

HEAVY REALIZING IN STOCKS.

Coalers furnish the principal support for the market. The railroad declines are a manipulative source in a roundabout way in some of the Van derbilt-Bonds Easy-Sales of stocks.

New York, Sept. 29.—The stock market was subjected again to-day to very heavy realizing, and prices are lower as a consequence, but it must still be said that the realizing was well taken, and the fall in prices was by no means precipitate. The movement was not accounted for by any new developments either in the market or to cause advances in the few stocks that showed strength. The coalers furnished the principal support for the market, although the August earnings of the anthracite carriers proved very unfavorable compared with the showing of some other railroads. This was a fair example of the disregard of news which characterized the movement. Reading was the mainstay of the market, and was bid up again, and again with trifling effect. The declines caused by the profit-taking.

The sharp reaction in Northern Securities on the curb was the signal for a decline in Union Pacific and crossed a section of a manipulative source for the numerous rumors in circulation of late of a compromise in the Northern Securities case. The Graham and Pacific syndicate with the help of Union Pacific and even St. Paul which was lifted 10 points, but it again weakened in some of the Vanderbilt's in view of a session of the New York Central directors, caused a bad impression. Prices touched the low level in the first hour and made an irregular rally. Bonds were easy. Total sales stocks to-day, 300,000 shares, including Atchafalpa, 24,900; B. & O., 21,200; Canadian Pacific, 7,000; C. & O., 34,300; St. Paul, 23,900; E. & W., 10,000; Norfolk and Western, 3,000; Norfolk & Western, preferred, 2,500; Missouri Pacific, 11,400; Reading, 14,800; Southern Pacific, 10,300; Southern Railway, 20,100; do preferred, 3,100; Copper, 12,000; Ice preferred, 5,000; Sugar, 4,000; B. C. P. Ellis & Co.'s Cotton Letter.

Special to the Observer.

New Orleans, Sept. 29.—An early advance at Liverpool was promptly lost after the opening of American markets, which displayed a tendency to develop weakness immediately thereafter. Yesterday's sellers in some instances were caught, causing an initial rise of 5 to 7 points, but selling against spot purchases in the interior afforded a supply more than ample to satisfy this demand. Total sales to-day, 300,000 shares, including Atchafalpa, 24,900; B. & O., 21,200; Canadian Pacific, 7,000; C. & O., 34,300; St. Paul, 23,900; E. & W., 10,000; Norfolk and Western, 3,000; Norfolk & Western, preferred, 2,500; Missouri Pacific, 11,400; Reading, 14,800; Southern Pacific, 10,300; Southern Railway, 20,100; do preferred, 3,100; Copper, 12,000; Ice preferred, 5,000; Sugar, 4,000; B. R. T., 11,000; U. S. Steel, 12,100; do preferred, 12,100.

LIVERPOOL COTTON MARKET.

Liverpool, Sept. 29.—Cotton in limited demand plus 2 points lower. American middling, fair, 6.30; good middling, 6.14; middling, 6.02; low middling, 5.94. The sale of the day was 3,000 bales. The market was quiet for speculation and export, and included 1,900 American. Receipts, 1,000 bales, including 500 American. Futures opened steady at 10.00; October, 10.00; November, 10.00; December, 10.00; January, 10.00; February, 10.00; March, 10.00; April, 10.00; May, 10.00; June, 10.00; July, 10.00; August, 10.00.

COTTON-OPENING AND CLOSING.

New York, Sept. 29.—Cotton Spot closed steady, 19 points decline; middling uplands, 16.70; middling fall, 16.55. Sales, 11,000 bales.

THE DRY GOODS MARKET.

New York, Sept. 29.—Buyers of dry goods are not interested in the future, but they have been, although the scarcity on a good many lines has made them anxious about spot goods and deliveries which they cannot accept. The export trade is again quiet, but converters are showing more interest in the market.

THE MONEY MARKET.

New York, Sept. 29.—Money call firm, 13/16; closing bid, 1/4; offered at 2. Time loans firm; 90 days, 3 per cent; 90 days, 3 1/2; months, 3 1/2. Prime mercantile paper, 4 1/2; 60-day, 4 1/2; 90-day, 4 1/2. Commercial bills, 4 1/2; 60-day, 4 1/2; 90-day, 4 1/2. Mexican dollars, 45%.
