# Greetings

The South, especially South Carolina, is in a very prosperous condition, and the majority of people are wearing happy faces, for which all should feel very grateful and not forget the source from which all blessings come. Jordan, Smith and the Cotton Growers' Association, which should include every farmer, have contributed much toward this prosperity. When the farmers are in prosperous condition, the wheels of business enterprises are greased. The farmer is the backbone and sinew of the whole country. Therefore all other professions should take off their hats to him. The past year has been very satisfactory to this office, for which we thank friends and customers. Some of our bankers and leading business men have remarked that the growth of our business has already far surpassed their expectations. We are getting in even a better position to render the country more efficient service, from the fact we have experience and acquaintance, and have gained confidence, and are willing and anxious to pay liberally for new ideas. It is our idea to use best efforts to promote the interest of all clients. We don't expect to be satisfied until we are recognized at home and abroad as AUTHORITY ON REAL ESTATE.
