BRADSTREET'S TRADE REVIEW. her Conditions, Retail Business nd to Some Extent, Collections, uproving in Unison—Cotton Goods tuation Unquestionably Stronger. w York, April 13.—Bradstreet's to-

New York, April 12.—Bradstreet's tomorrow will say:

Trade displays more animation, weather conditions, retail business and to some extent collections improving in unison. Easter season influences have been a stimulus even where temperatures, heavy rains or bad roads have occurred, and few complaints as to retail trade are noted. These latter, by the way, are most in the East. Generally speaking, the weather West and South has been good and some lost ground has been good and some lost ground has been regained in planting, though the crop planting season is still fully ten days late. The spring jobbing trade is nearly over, but some re-orders are noted and there is freer buying of fall goods. Among the industries, favorable features are the activity in building, the partial settlements, advances granted, in the Central and Western bituminous coal settlements, advances granted, in the Central and Western bituminous coal efficiency and production of which break all records. March railway earnings, though of course not showing the percentage of gain reported in January and February, which compared with periods of weather blockades and traffic congestion, are still by far the best ever recorded in March. In cotton goods, the situation is unquestionably stronger.
