Stuyvesant Fish Argues in Favor Freight Car Clearing House.

With the view of determining the practicability of establishing a freight car cleaning house the American Railway Association will appoint a committee to make the necessary investigation. The proposition has the earnest support of Stuyvesant Fish, who in strong argument in its favor has submitted to the executive committee the following as its most essential feature.

1. Properly qualified railroads should be invited to sign an agreement to observe the rules of the proposed American railway clearing house for a definite period.

1. The directors of the clearing house should establish a standard for

equipment. If any equipment be accepted which does not in value come up to the standard, the owner should deposit with the clearing house approved securities of sufficient value to make up the deficiency.

3. The chairman of the clearing

house should distribute equipment, so that each road shall have, so far as possible, at command a number of cars equivalent to those it has contributed. To effect this the chairman should have the power to penalizing railroads which delay or divert
