COMPROTISIS IS ACCOPTED

be Approximately 40,000. The limits of Greater Charlotte will be the lines suggested at the mest-ing of the board of aklermen Mon-day night and endorsed by the board the a compromise between the two at one-half mile circle and the two-mile direts. The Meckleinburg delagation in the Legislature, which had opposed an extension of more than two miles from Independence Equare in the face of the recommen-dation of the two and one-half mile circle by the extension committee of 160 and the endorsement of the board of siderman, yesterday wired Mr. W. F. Dowd, chairman of the aldermanic committee appointed to prosecute the committee appointed to prosecute the matter, that the compromise was ac-ceptable and that the members from this county would support it. This telegram was in response to a com-munication from the committee in-cluding the resolutions passed by the eity fathers and an inquiry as to what stand the legislators would take. The matter of the extent of the extension of the city limits has been a matter of the greatest interest in the city for several months, since the the city far several months, since the agitation for extension was begun; and the concensus of opinion is that the limits decided upon are wise and just. All of the built-up territory lying in the two and one-half mile eircle will be taken in and practically cit the unimumered lands in the all of the unimproved lands in the between the two mile and two and one-half mile circle will be left

LINES WILL NOT BE EXACTLY AS SUGGESTED.

francs to aid the vineyardists to re-plant their vineyards, not only to re-place a wealth-producing industry. but to safeguard her people from lapsing into drunkenness. Italy, some twenty-five years ago, seeing what France was doing in grape cul-ture, began to give ancouragement to grape culture at home, with the negative that within twenty-five years The new limits will not be exactly as suggested by Judge Burwell. The judge took his points from an old map and some changes in roads in Charlotte township since the map was result that within twenty-five years, printed will make some of the points impossible or impracticable. What will probably be done, and what will the production of wine in Italy has increased from not a great many million gallons annually to over a have exactly the same effect as to the territory to be included, will be billion gallons. What is true of these countries has been true of all other countries that have given enthis: The northern and southern ends suggested by the judge will stand, these being a point two and one-half miles north of the square on the couragement to grape growing and wine drinking.

"All the encouragement that the North Carolina Railway, and a point wine men of this country would ask for or want, would be dissociation two and one-half miles south of the quare on the Charlotte, Columbia & of pure, light wines, of limited alcougusta Railway, respectively. In- holic strength, from the rum traffic tead of the exact points suggested on and permission to sell them under the county roads on the east and such restrictions as were deemed wise west, it is probable that there will be until the people had been educated four equidistant corners on either to their proper use. Such a con-side. This will make the lines more dition would solve the ever present regular, will make the survey easier, issue of the liquor traffic in this counwill embrace practically the try, would add billions of wealth to ame territory that would be inthe country, particularly of the South, and add a great manufacturbluded in the exact lines suggested in ing industry that would in a few years the resolutions. rival the investments now in any oth-

Carolina, is now living in Nortalk, Ya., where he conducts his large and growing wine business. In writing an Observer man a few days age con-cerains the agitation of the liquer question in North Cairoins, he made the following interesting observations and statements: "Every newspaper man or publi-olst in the country could, we believe do a great good, not only to the wine business, but to the great question of temperance reform, if, on repeated occasions and at such intervals as they thought would be interesting to their clientels, they would discuss the great proposition of the possibilities of grape growing and wine culture in the United States and its effect on the social, moral and financial con-dition of the people. If the matter were an experiment, if we had no guides to govern us, the issue might guides to govern us, the issue might be spoken of as problematical, or even chimerical, but with the svidence published in the older countries, of which I will mention only one or two which I will mention only one or two points, there can be little room for doubt with any thoughtful man. "I will simply mention one or two historical facts, easy of veri-fication and proof. In fact they are not controverted at all. First, that the grape and wine crop is the backbone of French progress, an essential element of its food products, and that in grape-growing districts excessive use of alcoholic liquors and drugs is practically unknown. When phyloxpractically unknown. When phylox-era attacked the vineyards of France, drunkenness began to increase by such leaps and bounds that he gov-
