THE TREASURY'S BIG SURPLUS. When it is said that the fiscal year 1906-7 closed with a Treasury surplus of \$37,000,000 much remains to be old. These figures take no account of revious accumulations, which run the othil surplus up to the neighborhood of \$250,000,000. Now on deposit in stional banks is \$182,000,000 of this mount-a condition which, while better than that the money should be adle in Treasury vaults, results in locicing up an equivalent amount of credit in the form of securities, mostly government bonds. That such a state of affairs should exist in a time of financial strain sufficiently evidences the weakness of our fiscal system. The problem of fiscal reform is a difficult one at best, but it can be greatly simplified by merely stopping the collection from the people of so much money beyond the government's utmost

It has just been estimated that Greater New York and Greater London, at their present respective rates of growth, will have exchanged posttions by 1920. New York, the chicuinfor says, will then have 8,650,000 Liaw and Messrs. W. H. Belk, of Charpopulation and London will be about lotte, and R. A. Morrow, of Monroe, 100.000 behind. This estimate is hardly convincing-we should make the date of New York's primacy 1930 at Side Lights on Race Relations in the the earliest-but it gives some idea of the great future unquestionably ahead of the American metropolis.

CAPPTAL NOW \$5,000.000.

Mechanics Perpetual Now the Largest Building and Loan Association in the United States-Capital Increased at Meeting Last Night. The authorized capital of the Mechanics Perpetual Building and Loan Association is now \$5,000,000. At a meeting of the stockholders last night, favorable action was taken on the proposition to increase the capital from \$2,000,000 to \$5,000,000. Not only is the Mechanics Perpetual the largest building and loan association in North Carolina and in the South but doubtless the largest in the United States.

The association was formed in 1883 with an authorized capital of \$1,000,-000 or 10,000 shares. This subscription was all taken by October 1901. at which time, it was decided to increase the capital to \$2,000,000. Not only has a great part of this been To subscribed but the indications are that unless it is increased it will all be taken at an early date. The March series just closed embraces 3,850 shares or a par value of \$385,000. Another series will open September

ROCKEFELLER'S BIRTHDAY.

Day Celebrated in Watching Play for the Olympic Cup on Euclid Club Links at Cleveland.

Cleveland, O., July 8.-John D. Rockefeller, the Standard Oll magnate, celebrated his 68th birthday to-day by watching the play for the Olympic cup on the Euclid Club links. Shedding his cost, rolling his trousers, and jammiing his soft hat firmly on the back of his head, the man reputed to be the richest in the world, trudged along in the midst of the crowd o fgolf enthusiastists, watching the play of Walter J. Travis and W. C. Fownes. He applauded their good plays, expressed his sorrow for their lead shot, in general enjoyed himself to the full in observing the play of these two crack amateurs. No secret service men accompanied him. Almost unobserved he the galiery following the Travis match at the ninth green and trudged along with them over the last nine holes. He was particularly interested in the play of the veteran Travis. "Why don't you play in the tourna-ments?" asked a newspaper man.

"It's too much of a nervons ler. strain.

"Well, Travis took up the game pretty late in life," commented the newspaper men.

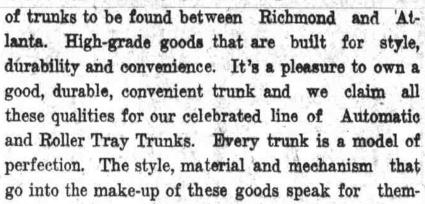

"Yes, that's true," said Mr. Rocke-feller, and then a dded: "That's an argument in favor of us veterans but he is not so old as I am." Then he peeled off his coat and followed along.
