asins to be seen.

Mount Airy has grown to such procortions and her industries are so
saried better railway facilities are
in absolute necessity. The manufacturers and business men generally facturers and business men generally favor the immediate construction of another road, but it takes time and money and lots of it to push to success any anterprise. The Mount Airy-Statesville road would fill the bill, but the prospect is moving along too slowly. This road would develop a vast section of country, both in Virginia and North Carolina—would oring to our furniture factories great quantities of fine material, for which the demand is something wonderful. Capitalists cannot find a better opening for investment.

News has reached us of the capture of one Greenwood, wanted for the brutal murder of Francis Puckett, an inoffensive brick mason, who was shot and killed by Greensome 12 miles from Mount Airy last winter. Your corres-pondent has not been able to obtain any further particulars.

Mount Airy authorities have ordered the citizens in certain portions of the city to put in granolithic pavements, and the work is progressing rapidly. So it seems we will be able to get around after a while with more comfort when the "muddy season" sets in.

It is learned that the new Baptist church now being built here will be the finest church edifice in the county. When completed it will cost anywhere from \$25,000 to \$30,000

The meetings of the association will be held in the Convention room of the Press Building, the morning session lasting from 9 to 12 o'clock, end the afternoon session from 3 to 7, at which time such business as the body have to transact will be disposed of. There will be a parade of the veterans and their sons, at which time music will be furnished by some of the many bands stationed at the Exposition, Au entertainment will be tendered them in the evening.

The purpose of this new organization which was formed March 29, 1906, in Atlanta, Ga., is to bring to-gether in a spirit of brotherly love the survivors of the armies of Grant and Lee, in order that there may be a recognized union of the people of the North and South. That every the blue or the gray, may, by coming contact with each other, learn that after all they are both American citizens, and thereby prove to the world at large that this is a united nation, that sectionalism no longer holds sway, that veterans of 1861-'65, whether they lived in the North or South, are united to-day, to-morrow and forever. The association is rapid-ly growing both in favor and numbers, and it is expected that the meeting at the Jamestown Exposition will be largely attended by old soldiers from all parts of the country.

cent revolution. We have grown accustomed to speak of this section as the land of prosperity, and the above of plenty, and while Shelby may not be able to claim a pre-eminence in this particular arranged for the occasion and the line, still signs not to be mistaken con-clusively indicate that our own county and town, with caution, silence and la-bor has been grappling with the grave problems which make for a more perfect citizenship and a broader and higher civilization.

problems which make for a more perfect citizenship and a broader and higher civilization.

To recapitulate: filince January 1st, 1997, a magnificent \$55,000 school building hat been opened, \$115,000 voted for waterworks and sewerage, a \$100,000 machine and supply company incorporated, and the end is not yet, for a fitting climax to this superb display of commercial and patriotic grandeur is the new \$75,000 courthouse just voted which speaks in no uncertain eloquence of the decay of that stupidity and obstinacy which disposed our forefathers to clamor against innovation and hitterly oppose a great many improvements and comforts; moral, intellectual as well as material and to which we own in a large degree our present pride and pleasure.

One of the most agreeable features attoning the courthouse movement was the absolute absence of politics. Democrats and Republicans vieing with each other in their advocacy of a superior stucture. A modern courthouse has been in dream of years and the object of endless recommendation by judges and grand juries, but the conservative conscientiousness of each board would not permit their attempting such a work until the money was in sight and no dcubt the delay has been wise, for the old courthouse is by no means a delapidated building, the chief objection to it being its inadequate protection against fire and incommodious office room.

By arrangement with the board of aldermen the town will use the old building for a public hall, with offices for the finest church edifice in the county. When completed it will cost anywhere from \$25,000 to \$30,000 and will be an ornament to our progressive town. The pastor of the Baptist church here, who is pushing this laudable undertaking, is Rev. J. E. Smith. He is very popular with all our people.

"Gentle Prevarication

chiseled in enduring stone" is the language in which Bill Nye describes the custom of inscribing on tombstones greater virtues than were possessed by the deceased. Many a man has lived his life so selfishly that his family were paupers before his burial. Insurance cannot cure bad habits, but it prevents some, and atones for others. The man who insures, lives up to his epitaph, as a good husband and kind father. While the gentle breezes are blowing things you way, why not bottle up some of your success for the proverbial "Rainy Day," that is sure to come to every one in

sems form or other? A policy in the Equitable, taken now, will take care of you in your old days, or take care of your family in the event of your early demiss.

No company in the world offers greater certainty of payment than the Equitable. This is the first consideration in life insurance. No company can furnish safer life insurance at a permanently lower cost than the Equitable.
