Mr. Cunningham Here.

Mr. C. D. Cunningham, manager of the Keeley Institute at Greensboro, is spending several days in the city attending the convention. When asked about the work of the institution with which he is connected, he stated that the number of patients was steadily increasing and that more women were being treated here than ever before. This is primarily because of new additions which have been made especially for this end giving comfort and privacy. Mr. Cunningham remarked with a smile that he was glad to see so many delegates to the convention living up to the diploma which they had received from this institution. His comments on the growth of Charlotte were altogether gratifying, notably in view of the fact that he is a citizen of the Town of Greensboro.

Delegates' Tickets Extended.

Both the Southern and the Seaboard through their representatives stated to the convention yesterday that the tickets of the delegates would be extended 24 hours after the adjournment. This considerably relieved those who have been wondering what the railroad would demand after the limit of the tickets had passed in point of time. This applies only to the intra-State tickets as a matter of course.

GASTONIA-CHARLOTTE ROAD. In Good Condition For Automobiles, Only About a Mile Remaining Unmacadamized.

Only about a mile of the road between Charlotte and Gastonia remains unmacadamized and it is only a question of a few days when this will be put in first-class condition. This distance is a favorite stretch for automobiles and will be more so when the little space is fixed up. The following editorial comment from The Gastonia Gazette will be read with interest: From Gastonia to Charlotte by the macadam road is about 24 miles, the half-way place being the South Fork river at Sloan's ferry. The river, by the way, was up considerably Wednesday, though it was at least a foot lower than it had been a day or so previous. All of this 24 miles is macadamized with the exception of a little more than a mile, this unmacadamized stretch lying on each side of the river. It will be gratifying to automobilists and others as well, to know that the county now has a force of hands at work grading and macadamizing the Gastonia part of this stretch between Belmont and the river. When this is done it will only remain for Mecklenburg to macadamize the short stretch on the opposite side and then every foot of the way from Gastonia to Charlotte will be in the best possible shape for autos.

It is a noteworthy fact that in this 24 miles one is never, except for a very few minutes at a time, out of sight of a cotton mill. Leaving the Flint at Gastonia behind, one finds himself in a very few minutes passing the three fine mills at Lowell and before he knows it the magnificent plants of the McAden Mills, so picturesquely situated on the banks of the South Fork, are in sight. Then, in another short space of time, he sees the Chronicle and Imperial Mills at Belmont. It is noted that the walls of the new mill at Belmont are up and work is progressing nicely on it. At the present rate at which work is moving along this mill will be ready for turning out goods pretty early in the fall. From here on there is a good little distance before another mill comes in sight, this being the Elizabeth Mill just west of Charlotte.
