COMMERCE AND FINANCE COTTON MARKET IRREGULAR.

However There is a Steady Under-tone and the Sales For the Day Are Fairly Good—Support From Wall Street Bulls is in Evidence.

Wall Street Bulls is in Evidence.

New York, July 24.—The cotton market had rather an irregular day, but showed a generally steady undertone, with the close steady net 3 points lower to 7 points higher. Sales were estimated at 100,000 bales.

The market opened steady at unchanged prices to a decline of 6 points in response to peet cables, good weather and scattered bear pressure. At the decline there was moderate support from bull interests, whose purchases of August recently are estimated at about 45,000 bales, leading to a fumor that the Wall Street longs intend to make up cotton on contract next month. This idea seemed to check bear pressure, and during the middle of the day the market advanced with August leading market advanced with August leading the upward movement and selling 10 points net higher, while later months at one time showed a net gain of 4 to 6 points. The close was off from the best under realizing with August remaining relatively firm. The active new crop months closed about 1 point lower to 2 points higher. Southern spot markets officially reported were net unchanged to 1.16c lower Weethnet unchanged to 1-16c lower. Weather and crop advances were generally bearish and the trade is evidently convinced that the government bureau report to be published on July
31st will show a further improvement in the condition of the crop.
Nevertheless the Wall Street bulls
appear confident of their position and
support from that source was in evidence on all the soft spots in to-day's
trading.

Receipts at the ports to-day 4,658, against 3,259 last week and 890 last year. For the week 25,000 bales, against 25,004 last week and 7,953 last year. To-day's receipts at New Orleans 1,329, against none last year, and at Houston 1,890 bales, against 542 last year.

THE STOCK MARKET.

Prices Broken on Large Speculative Liquidation and the Bushug De-mand is Unable to Check the Full —Order For New Trial of the Standard Oil Case Affects Move-

New York. July: 24.—Speculative liquidation on a large scale broke prices of stocks badly to-day. The fall was gradual and restrained in the early stages but became more precipitate as it progressed, uncovering stop-loss orders. Knowledge of the existence of such orders emboldens the professional operator to make short sales and to offer concessions In prices in making these sales thus forcing declines. Speculative liquida-tion and short selling have been in evidence before this week but they were overcome by the force of the buying demand.

It was in this respect that the market showed a notable change today, the buying orders, except at prices below the opening level, show-ing a material shrinkage. The order refined quiet. from President Roosevelt to push a Cocee, futures at re-trial of the Standard Oil case was of 5 to 10 points. a professed motive for much of the selling, especially amongst those who had bought stocks largely on the ground of the decision in favor of boxes. the Standard Oil Company.
