# 81 New Up-to-Date Ladies' and Misses' Suits, About Half Price

Our Buyer has just returned from a SPECIAL TRIP to New York. We had such a Big Trade in Suits that we were compelled to replenish. We secured a great many Stylish New Designs in regular goods in the Popular Colors. Most of these are in and COMING EVERY DAY.

## TWO SPECIAL LOTS The Newest, Up-to-Date Suits and Dresses

In addition to regular goods we secured a lot of 81 Suits from the Veribest Suit Company, which failed. They are all new, stylish this season's Suits, which we bought at about half price.  
LOT 1—Pretty Suits in 36-inch lengths, Broadcloth, Herringbone, Serges, etc., satin lined. Suits that sell regularly \$15.00 to \$20.00. Our special price... \$9.95  
LOT 2—Up-to-date, stylish Suits, long length, variety of styles, all \$25.00 grade and more. Our special price... \$14.95  
Both these lots are made by good tailors, never meant to sell for cheap Suits. All wool materials and well tailored.

On these two lots we will be compelled to charge for alterations, but the Suits are so well tailored and we have such an assortment to choose from you can probably get fitted.  
Many new styles just out in New York. Our assortment the best we have had.  
New lot Directoire style Satin Dresses that you will be pleased with.  
A lot Sample Suits at one-third off from our best tailoring house.

## Special Sale Skirts--\$7.00 to \$10.00 Skirts \$4.98

All kinds, Voiles, Panamas, etc., in the best styles, never made to sell for the price; full width, trimmed with buttons. You will recognize them at once as fine goods.  
An exceptional opportunity to secure a nice Skirt for a little money.  
About 100 Skirts in the lot, worth up to \$10.00... \$4.98

## Special Values Secured For All Departments For Festival Week

New Dress Goods, new Silks, new Belts, Bags, Neckwear, new Sweaters, new Millinery, etc., etc.

# IT PAYS TO TRADE AT IVEY'S

### YORKVILLE'S PHONE TROUBLES

Franchise or No Franchise to Piedmont Telephone Company a Live Question—Petition Being Circulated Calling for an Election.  
Special to The Observer.  
Yorkville, S. C., Oct. 12.—"Franchise or no franchise to the Piedmont Telephone Company" is still a very live question that is agitating Yorkville. The telephone company has been making strenuous efforts since it bought out the local company here several years ago to secure a new and more liberal one in the place of the one granted to the old company, which expires in May, 1909, but so far has been unsuccessful. The situation is about like this: The original telephone system was built about twelve or fourteen years ago by Mr. W. B. Moore and with the verbal consent of the owners a large proportion of the lines were erected through private lots, no holes at all being placed on the principal business streets. Later Mr. Moore organized a stock company which absorbed the system he had built up and subsequently the local company sold out to the Piedmont Telephone and Telegraph Company, a majority of whose stock is owned or controlled by the Bell Telephone Company. At the time the local company was absorbed local subscribers were allowed all connections within the city limits for \$1 a month and those who paid \$2 had the privilege of the entire county, including all country lines, and all towns in the county including Rock Hill, Fort Mill, Clover, Sharon, Hickory Grove and Church. The new owners, after making a fruitless effort to secure a new charter, finally agreed to continue to give the same connections at the same charge, except when they substituted a Bell for a home telephone the monthly charge would be \$1.25 for town connections and \$2.00 for the county. After this agreement had been entered into matters looked along with apparent satisfaction to all parties until about a month or six weeks ago when it was made public that representatives of the Piedmont Telephone Company had been negotiating for some time with the town council for the granting of a charter. At the instance of Mr. G. H. O'Leary a public meeting attended by a goodly number of citizens, was held for the purpose of ascertaining exactly what the telephone people wanted and what the council had done or proposed to do about the matter. At that meeting Mayor Hart made a frank statement as to the wishes of the telephone company and what action had been taken by the council up to that time. The telephone company wanted a charter to extend over a period of twenty-five years, allowing it free use of the streets of the city, and on its part it agreed to substitute the latest improved multiple circuit system in the place of the one now in use, charge local subscribers \$1.25 a month and those having out-of-town privileges \$2.00; to cut off Rock Hill and Fort Mill and to maintain these rates until the number of connections reached 350, when another \$4 cents would be added. The proposition was not approved by the citizens and on motion a committee of several citizens was appointed to make a proposition from their viewpoint. Subsequently the committee submitted its report. In substance it was that the life of the franchise be ten instead of twenty-five years, that rates remain as at present and subscribers still be allowed connection with Rock Hill and Fort Mill. The proposition was promptly turned down by the telephone company.  
In the meantime somebody had been studying the town charter, it being the kind provided under the general incorporation act for towns of from one to five thousand population, and discovered that it provides that it may be amended at any time on a petition signed by a majority of the freeholders and a majority vote of the qualified electors at an election that must be called by the council on presentation of the prescribed petition. A petition is now out asking for an election to decide whether or not the right of the city council to grant franchises of any kind without the approval of a majority of the voters shall be taken away. The petition is being freely signed. The subscribers feel that if it is the purpose of the telephone company to give them a square deal they are as well off without a charter as they would be with one, as no effort is ever likely to be made so long as they stay good to exist there and if they do not stay good the town can tell them to get off those streets they are now using and freeholders can order them off their lots; while on the other hand if they get the kind of franchise they are asking for the people are sure to get less than they are now receiving and to pay more for it. They say nothing of their absolute independence of the public.  
Several officials of the telephone company were in town last week for the purpose of trying to induce the town to see the matter from their viewpoint and after they had failed to do so it is said that they advised the local manager that unless they got what they wanted at the hands of the town they proposed to close their local exchange and cease doing business here.  
Litigation For Possession of Spartanburg Property Ended.  
Special to The Observer.  
Spartanburg, S. C., Oct. 12.—The case of the Central National Bank vs. T. C. Duncan, former president of Union Buffalo Cotton Mills owner of a valuable business block here, for the possession of what is known as the Palmette corner, was ended here today, the defendant giving a new lease on the property. A lease was made in 1906 for the corner for a period of twenty years and the defendant objected to a certain clause in the lease, claiming a change was made after the contract had been signed. The contract was cancelled and the bank people commenced suit for possession of the property. The new lease is the same as the former one except that there is a slight increase in the rental price for the last ten years, and the lease is to become operative January 1st next. The property is one of the most valuable in the city.  
Spartanburg Yields to Anchor.  
Norfolk, Va., Oct. 12.—After a race sailing vessel, storm bound in Hampton Roads, which put to sea with the life boat at yesterday, were forced back to-day by strong northerly winds and high seas. The vessel is again at anchor in Hampton Roads.

### WOODMEN USVEIL MONUMENT.

Big Crowd Attends Exercises at High Point in Memory of W. R. Taylor.  
Special to The Observer.  
High Point Oct. 12.—Two thousand people gathered to witness the exercises by the Woodmen of the World, of this city, at the unveiling of the monument to the late W. R. Taylor, a fellow member and sovereign, in beautiful Green Hill Cemetery yesterday afternoon. The members of the Woodmen of the World, of this city, gathered in the Odd Fellows hall from where they marched in a body to the cemetery, arriving at the grave the usual wedge was formed, enclosing speakers, quartette, family and relatives of the deceased, reader of poem, and band when the following programme was carried out: Selection by High Point band; address, "The Deceased Sovereign," by Dr. J. T. Barrus; address, "Woodcraft," by Mr. R. T. Pickett; selection by quartette; address by E. B. Lewis, of Kingston, State manager Woodmen of the World; closing exercises of camp; music by band; prayer.  
It was an auspicious day for Woodcraft. The cemetery was literally covered with people who remained throughout the entire exercises. Pictures were made of the large crowd and also of the members of Woodcraft and the monument. The camp here is steadily on the increase in membership and at present the second largest fraternal order in the city.

### REAL ESTATE MARKET LIVELY.

Farm Land Selling High in York County, S. C., Despite Low Price of Cotton and the Panic—Cotton Sales Light.  
Special to The Observer.  
Yorkville, S. C., Oct. 12.—It is said that the sales of cotton on the local market since the price dropped below 3 cents has not averaged a dozen bales a day. More cotton has been ginned so far this season than for the same time last year, but this is not due to the fact that more is being made, but to the fact that the season has been unusually favorable to harvesting the crop and that practically all of it is open. As the season advances the estimate made several weeks ago that the yield would hardly exceed two-thirds of that of last year seems certain of confirmation by actual experience.  
Notwithstanding the low price of cotton, the high price of practically everything else and apparent lethargy in business generally, the demand for real estate, especially farm lands, has been quite good at prices that would have been considered high a year ago and exorbitant four or five years back. One of the largest deals in several months was made last week by Mr. J. C. Wilborn, a local real estate broker, when he sold a tract of 600 acres of as fine farming land as there is in York county belonging to Mr. S. M. Jones, of Chester, to Mr. Gordon Hughes, who at present lives near King's Mountain, N. C., for \$15,000. Mr. Hughes is a young man of exceptional ability and has achieved wonderful success in his chosen calling, farming, and will no doubt raise record-breaking crops on the farm he has just purchased. It is located about eleven miles southeast of Yorkville and about five miles southwest of Rock Hill. The gross value of the products of the farm last year was about \$18,000.  
The farmers of this county are calculating on seeding the largest acreage of wheat and oats, especially oats during the present fall and winter that has been seen in the past several years.  
(For The Observer.)  
SILENT MUSIC.  
There is music in the silent notes of love,  
There is music in the blush that comes to the cheek.  
In beauty there is music, far above  
The music of the harp and words we speak.  
There is music in the bank of violets blue,  
That yields its odor to the passing breeze—  
An symbol of love and friendship true,  
Or of prayer that ascends from pious knees.  
There is music in the twinkles of the eye  
Of the fore,  
That makes a cord in the soul of man—  
Soul-music that Appollo can never surpass.  
On lute or harp, 'e'en try as he can.  
There is music in the crystal tear that rolls  
Down the cheek of the loved and true,  
Through the eye it plays on vibrant soul,  
And runs into music, like mist into dew.  
What grander music to move the soul  
Than the bursting of buds into flowers blooming?  
That the march of spring-tide out of the sky,  
Into the new—the true—growing?  
—S. F. TOMLINSON

### GOES TO NEW YORK TO STUDY.

Gaffney Young Lady With Splendid Musical Talent to Cultivate in Verdies of 22,000 Against Southern.  
Special to The Observer.  
Gaffney, S. C., Oct. 12.—Miss Lottie Potter, second daughter of Mr. L. G. Potter, of the Gaffney Manufacturing Company, will leave Gaffney Wednesday for New York City, where she goes to take a post-graduate course in music. The young lady graduated last session at Limestone College with the highest honors and was pronounced by Professor Loring to be one of the most proficient pupils whom he had ever taught.  
Col. T. B. Butler returned from Spartanburg Saturday where he obtained a verdict of \$20,000 against the Southern Railway for killing a negro named Dan Brown at Greer November 23d, 1905. The case was hotly contested and the verdict was quite a triumph for Colonel Butler.  
Mrs. T. B. Butler and children left to-day for New York City, where Mrs. Butler goes to visit Mrs. E. B. Steedley, who formerly resided here. Dr. Steedley has another year in hospital work in New York when he will return to Gaffney and resume practice.  
Leg Broken by a Mistletoe.  
Special to The Observer.  
Gaffney, S. C., Oct. 12.—Magistrate Camp, who some time ago had the misfortune to sustain a severe fracture of one of his legs while in the act of lighting from a vehicle, last Saturday afternoon while walking on the sidewalk made a mistake and broke the limb in the same place. The accident is very painful and it will be a considerable time before Mr. Camp will be able to come to his office.

The Charlotte Sanatorium.

The Charlotte Sanatorium, now nearing completion, is going to be one of the most attractive buildings of the kind in the country. At a cost of not less than \$150,000 the men behind the hospital have erected a magnificent plant, modern and complete in every detail. From top to bottom it is as perfect as a seal. An Observer man, accompanied by Miss E. Ethelyn Cherryman, formerly of Grand Rapids, Mich., now here to be superintendent of the sanatorium, went over the building Saturday, peering into halls and rooms.  
Three floors above ground and a basement, with room for 60 private patients, briefly describes the plant. The outside walls are of pressed brick and cement, enameled and cream colored.  
The basement contains the kitchen, dining room, laundry, pathological laboratory, rooms for hydrotherapy and electrotherapy and boilers to furnish high pressure steam for operating rooms and other purposes. On the first floor will be the offices, the general office, reception room, sun parlors and private rooms for patients; on the second, a large reading room, four sun parlors, private rooms, single and in suites, and the women's surgical ward; on the third, operating rooms, recovery room, anaesthetic room, surgeons' and nurses' rooms, baths, lockers, sterilizing room, men's surgical ward and 20 rooms for patients; and the fourth and last floor, a beautiful roof garden and sun parlor.  
The building is fireproof throughout. The floors are of tile, the steps of marble, the doors and stair rails of mahogany, this being the only wood used in construction, and the door knobs, knobs in the operating rooms, where glass is used, of old brass. The electric and gas fixtures are of the most approved sort. A private telephone system extends through the building. Mr. J. B. Brown, the contractor, says that it is one of the most complete plants that he has ever seen. The finishing touches will be put on within the next sixty days. Miss Cherryman is directing the final details.  
In front and the inside ones of tile and cement, enameled and cream colored.

The building is fireproof throughout. The floors are of tile, the steps of marble, the doors and stair rails of mahogany, this being the only wood used in construction, and the door knobs, knobs in the operating rooms, where glass is used, of old brass. The electric and gas fixtures are of the most approved sort. A private telephone system extends through the building. Mr. J. B. Brown, the contractor, says that it is one of the most complete plants that he has ever seen. The finishing touches will be put on within the next sixty days. Miss Cherryman is directing the final details.  
In front and the inside ones of tile and cement, enameled and cream colored.  
The basement contains the kitchen, dining room, laundry, pathological laboratory, rooms for hydrotherapy and electrotherapy and boilers to furnish high pressure steam for operating rooms and other purposes. On the first floor will be the offices, the general office, reception room, sun parlors and private rooms for patients; on the second, a large reading room, four sun parlors, private rooms, single and in suites, and the women's surgical ward; on the third, operating rooms, recovery room, anaesthetic room, surgeons' and nurses' rooms, baths, lockers, sterilizing room, men's surgical ward and 20 rooms for patients; and the fourth and last floor, a beautiful roof garden and sun parlor.
