

THE MAN OF THE HOUR

"The Man of the Hour" in North Carolina at this time is Dr. J. J. McKanna, of Reidsville.

Dr. McKanna is the president of the McKanna Sanitarium Company, and the discoverer of the treatment bearing his name. He has sanitariums in a dozen Western cities at which the McKanna treatment is administered, and there is a McKanna Sanitarium also in Richmond, Va.

—Murphy's Hotel Annex.

The McKanna treatment for the whisky habit is indorsed, wherever known, by governors, officials of railroad companies, Supreme and Su-

perior Court justices, mayors of cities, ministers, the press, and the public generally.

One of the last acts of Governor Robert B. Glenn, of North Carolina, before he turned over the affairs of his State to ex-Congressman W. W. Kitchin, governor-elect, was to reiterate his indorsement of the McKanna treatment, which has been known in North Carolina the past several years.

Nothing on earth discovered by man has secured such indorsements as that given the work of Dr. McKanna.
