People Greatly Interested in Speculating as to the Definite Plans of the Company Over Which Mr. E. D. Latta Presides, Relative to the Ex-tension of the Car Line to the River.

One Hundred Represented the Peo-ple and Its Decision Should Stand. It is now believed that it is only a question of a faw months until the work of extending the electric railway lines of the Charlotte Consolidated Construction Company to the nearby towns and to the Catawba river will

One thing regarding the present discussion of the proposed new char-ter which is highly entertaining to the public, and that is how completely "the people," the dear people, seem to begin. As was stated yesterday morning in The Observer, the officers of the company decline to be interhave delegated and completely confided their interests and desires to a viewed as to the specific purposes of the recent incorporation of the Charvery few of our local politicians. It is touching to note how devoted to lotte Gas and Electric Company, but the interests of 'the people' these it is clear that this step was taken purely in the interest of adding

further strength to the properties, rights and franchises now controlled by Mr. Latta and his company.

The extension of the electric line to the river and the building of a handsome hotel and park grounds on the bid Davidson place, comprising 1.000 acres of fine timber and other lands, has been the personal ambition of Mr. Latta for many years and the ideal system toward which all other steps have been merely subordinate

and auxillary. It is certain that the chartering of the Charlotte Gas and Electric Com-

pany was sought by Mr. Latta for the n the electrical cut-rate war which he interprets the recent offerings of his competitor, the Southern Power Company, to foreshadow. It is ancipated that in the immediate future he will offer to the people of this city a price for illuminating gas, upon which he now holds an absolute monopoly, that will be extremely flattering and intended to meet any reasonable price upon electricity offered by the Southern Power Company.

As a further source of securing slectrical power, additional to its finely equipped plant in Dilworth, the 4C's has in mind the development of its water powers on the Catawba upon the sites secured when the Davidson place was purchased

The separation of the gas and elec power business from the street railway system, which is owned by the same company, is aimed to giv strength to both wings of the business and to make possible the early, if not immediate, extension of the electric lines to the river. Toward the consummation of this scheme which has means more for Charlotte than any other or all the other developments "You can fool some of the people of this company along this part-ular line.

AN INTERESTING MEETING

Address of South Carolina Professor a Feature of a Successful Service at the Y. M. C. A. Building.

The meeting for men at the Young Men's Christian Association yester day afternoon was one of special in-terest and profit. The speaker was Col. John G. Clinkscales, professor of mathematics at Wofford College, Spartanburg, S. C.

Colonel Clinkscales based hL adif not for the politicians who are dress on the ninth verse of the 119th fighting it so hard. "Wherewithal shall a young man cleanse his way? The address was especially intended for young men' and out of the lifebox. perience with young men. Colonel Clinkscales drew illustrations for Board of Aldermen of Complaints every verify presented. He denounced Regarding the New Charter as Al-cigarette smoking, profanity, idleness, the use of intextenting liquors in any quantity, and especially immorality.

### Insects Destroying Peach Trees. Sanford Express.

Mr. A. F. FcPhail, of the St. Andrews section, was in town Tuesday and informed The Express that a small red insect was destroying the fruit trees in that section. They confine their work to the peach trees. They were first discovered last summer. They are too small to be seen with the naked eye, but can be readily found with glasses. They kill the tree by cutting into the body of it. Mr. McPhail expects to write the Agricultural Department in Raleigh and see if something can't be done to exterminate the little pest. This insect fits the description of the parasite that was so destructive to cotton on the farms a few miles east of here last summer.
