The California Condor Is Rapidly Following the Great Auk.

One night in the eighties a heifer from the Murietta ranch, in southern California, was killed by a mountain lion that lived in the fastness back in the San Bernardino range. From our camp the next day we noticed several buzzards on a dead pine up the hillside. One of the rancheros pointed out a lone

to another speck just within the scope of vision. The next day the old Mexican took me up the arroyo, and I counted seventeen buzzards and two other big birds that seemed twice the size of a buzzard feasting on the carcass of the helfer. I was interested in the big birds, but the only information I received was a gesture back toward the highest peak of the

Years later, as my interest in birds grew, I could get comparatively little information about this "king of the buzzards," or California condor (Cathartes californianus), for not many people had ever seen the bird, and very few had first hand information as to its nesting

The report that it was rapidly following the great ank and that the species would soon become extinct was not without some foundation, for the California condor has a range more restricted than any other bird of prey. In the early part of the last century it was reported fairly common as far north as the Columbia river region. But now it seems to have entirely disappeared from that locality. Once it was reported in Utah, and Dr. Elliott Coues saw it in Arizona in 1865. With the exception of a record in southern Oregon, the habitat of the his son and a few other adherents. California condor now seems to be The fate of Hudson and his party is the region from Monterey county, Cal., south through the mountains of the coast range and the extension of the San Bernardino range the mouth of which has grown up the in Lower California. There is no record of the bird in Mexico.

It is not surprising that collectors have searched the mountains and that museums are willing to pay big prices for the eggs, for after a correspondence of several years Mr. W. Lee Chambers has found that there are now only forty-one California condor eggs (twenty-six first class and fifteen second class) in the various museums and private collections of the world, while there are about seventy eggs of the great auk, which is now extinct. There are only half a dozen of the birds in captivity, and that number is not ikely to be increased to any extent at present.—Century Magazine.

An "Unfortunate Experience." The chief constable of Manches er in an after dinner speech told a queer story of a Newton Heath workman's "unfortunate experience" with a policeman. The workman was absent from his work for a fortnight, and when he reappeared his employer wanted an explanation, and this is how the man gave

"Well, sir, a fortnight ago I had a great misfortune. I was going frome along — street when I found a policeman leaning against a wall. He seemed to be drunk. and I thought the best thing I could do was to take him to the Newton Heath police station. I did so, but the moment I got him there he came to himself and charged me with being drunk, and the magistrate believed him and gave me fourteen days." An "unfortunate experience" indeed!—Westminster

This woman says Lydia E. Pinkham's Vegetable Compound saved her life. Read her letter.

Mrs. T. C. Willadsen, of Manning, Iowa, writes to Mrs. Pinkham: "I can truly say that Lydia E. Pinkham's Vegetable Compound saved my life, and I cannot express my gratitude to you in words. For years I suffered with the worst forms of female complaints, continually doctoring and spending lots of money for medicine without help. I wrote you for advice, followed it as directed, and took Lydia E. Pinkham's Vegetable Compound and it has restored me to perfect health. Had it not been for you I should have been in my grave to-day. I wish every suffering woman would try it."

FACTS FOR SICK WOMEN. For thirty years Lydia E. Pinkham's Vegetable Compound, made from roots and herbs, has been the standard remedy for female ills, and has positively cured thousands of women who have been troubled with digestants and contains the same displacements, inflammation, ulceration, fibroid tumors, irregularities, periodic pains, backache, that bearing-down feeling, flatulency, indigestion, dizziness, or nervous prostration.

Why don't you try it?

Hendrick Hudson. By ROBERTUS LOVE.

Set adrift in Hudson bay by mutineers, bis fate is still a mystery of the frozen north.

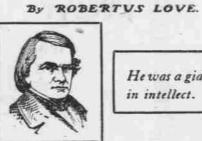

HEN a year or so ago a steamboat for traffic on the Hudson river was launched with the name Hendrick Hudson. somebody remonstrated, holding that the name of the vessel should be Henry Hudson, because that was Hudson's real name. Nevertheless it seems fitting that the boat be named Hendrick instead of Henry, for it was while in the service of the Dutch East India company that the English navigator discovered the great river which bears his name. Moreover, his own country was so jealous of his prowess. as a discoverer for another nation that on his return to the old world Hudson was practically impressed into the I h service and was not permitted ruloy his full reward for the sucses achieved by him when he voy-I mader the Dutch name of Hen-

on perished miserably in the service of British interests. This was when he made his disastrous voyage in search of that long hidden northwest to which lured so many mariners defeat or doom and which was finaly discovered by Captain Roald Amundsen nearly three centuries after Hudson's death. Hudson sailed into the vast northern bay which, along with the gloriously picturesque river, keeps his name on the map of the world. There was mutiny aboard, and the mariners set the great navigator adrift still a mystery of the frozen north. For the people of the United State

Hudson's chief achievement was the discovery of the wonderful river at second city of the world in population and the first in commercial impor-

Hendrick Hudson sailed northward around Sandy Hook and entered the river in September, 1609, in the Dutch ship Half Moon. The explorer spent a month studying the stream, going up as far as the site of the city of Alban

Stephen A. Douglas.

He was a giant in intellect.

FERY early in his career Stephen Douglas became known throughout the country as "the Little Giant." The sobriquet was a fit one. Physically he was short and slight-a little man. Mentally he was big from his boyhood. His head was large and correspondingly brainy. He was a giant in intellect.

Douglas was daringly ambitious. His goal was the presidency of the United States. As a schoolboy in Vermont and western New York the familiar paradoxical fact that "any American boy can become president" seems to have taken possession of him. He settled in a new state, Illinois, to grow up with the country and work himself into lead ership. Though he failed of the presidency, he was in the whitest heat of the presidential limelight for years.

Perhaps no man in American history rose to national eminence so rapidly as did Douglas. He almost won a nomination for congress at the age of twenty-five. Only three years later he was a member of the supreme court of Illinois, resigning this office at the age of thirty to enter congress. In the lower house Douglas became at once a national figure. Entering the senate a few years later, his fame widened and deepened with each succeeding year. Douglas was a far more prominent man in 1852 than was Franklin Pierce, who defeated him for the Democratic nomination for presfdent and was elected. Douglas was still under forty. Four years later the engrossing slavery problem had so divided his party that again he failed to win the nomination. In 1860 he was nominated by the northern sec-

tion of the Democracy. It was his espousal of the doctrine of "squatter sovereignty," which contended that every territory should be permitted to vote for itself on the question of slavery, that cost Douglas

the presidency. Douglas died at the early age of forty-eight, a few months after the inauguration of his greatest opponent. Abraham Lincoln. It is to his ever lasting ergdit that he upheld Lincoln in the effort to preserve the republic This fact may be taken as the moral measure of the man. His last words to his political adherents were: "There can be no neutrals in this

At times when you don't feel right, when you have a bad stomach, take something right and t will assist digestion; not something that will stimulate for a time bu something that will positively do he very work that the stomach performs under ordinary and normal con ditio s, something that will make the food digest. To do this you must take asnatural digestant like Kodol For Dyspepsia. Kodol is a scientific preparation of vegetable acids with natural juices found in a healthy stomach. Each dose will digest more than 3.000 grain of good food. It is sure to afford prompt relief; it digests what you eat and is pleasant to take. Sold by Burke Drug Co.

Mrs. Pinkham invites all sick women to write her for advice. She has guided thousands to health. Address, Lynn, Mass.

A MAN'S HANDS.

Some Callings That Leave Their Trademarks Impressed Thereon.

If your eyesight is keen enough it is possible to tell by looking at a ment that individual follows, according to scientific men.

It is a commonly accepted fact that the face reveals character, but very few persons have ever paid any attention to the hands as disclosers can get just as much information out of the latter as the former if we know how to go about it.

Alfred Gradenwitz in the Scientific American, results in a permanent alteration of the skin and muscles as well as a transformation of the parts), displacement of the joints, etc., for in repeating a given strength or quality desired. manipulation over and over again the palm and the balls of the thumb and little finger are called upon continually to perform the same action, leading to a permanent strain on and wear and tear of certain parts of the hand.

The greatest alterations are shown in the hands of laborers who do heavy manual work. They have coarse and clumsy hands, with short, thick and callous fingers, the balls of the thumb and little finger being especially developed and the skin being horny and covered with

Take the left hand of a sm By continually manipulating tongs with this hand the balls of t. fingers and and thumbs are ver markedly developed, and the Ca tips are broadened.

The hand of the average sh maker has a strikingly broad and flat thumb, while the tips of the fingers are likewise broad and flat In the hand of the typesetter who

upper parts, while the left hand thumb, which presses upon the type in the stick, is flattened.

The tailor can easily be picked out by the condition of the forefinger on his right hand, while the pianist will be found to have tapering fingers and thumbs, which are flattened upon the parts which touch the keys.

Getting Even.

On one occasion visitors to a merry-go-round on a vacant lot in the outskirts of Philadelphia were very much touched by the melancholy demeanor of a long, lean, lank individual who despite the fact that he was apparently suffering greatly persisted in riding repeatedly. At last some one said to him sympathetically:

"You appear to be in great dis-"Yes," replied the man on the merry-go-round. "This continual

riding around and around makes "Well, then, why don't you quit riding?" asked the inquisitive ques-

"I can't help it," replied the poor man. "The man who runs this merry-go-round owes me money, and the only way I can collect it is

by taking it out in rides."

On account of its connection with heathen rite and legend the mistletoe was early banished from the churches. Clergymen have in former times been known to forbid its use among the Christmas decorations, regarding it as too tainted with superstitions to fitly ornament the house of God, and from use as an architectural decoration it has been rigorously excluded. Perhaps the only known instance of its use is in Bristol cathedral, where sprays of mistletoe, with leaves and berries, fill the spandrels of one of the remarkable tombs.-London Mail.

The Wary Editor.

The musician was visibly annoyed. "But, hang it all," he said, "I told your reporter three or four times over that the violin I used was a genuine Stradivarius, and here in his report this morning there's not a word, not a word."

With a scornful laugh the editor replied: "That is as it should be, sir. When Mr. Stradivarius gets his fiddle advertised in this paper under \$2 a line you come around and let me know."-Southwesterner's Book.

A Pen Point. The pen would not write. "Shall I get you another, sir?" the secretary asked.

"No," said the millionaire. "I'll show you something valuable now," And he held the pen over the lamp a moment, then dipped it in cold water, and lo-it wrote as well

when new.
"That treatment rejuvenates old sail" said the milpens without fail," said the millionaire. "Remember it, and it will | save you money."-Exchange.

THE JUMPING OFF PLACE.

"Consumption had me in its grasp; and I had almost reached the jumping off place when I was advised to try Dr. King's New Discovery; and I want to say right now, it saved my life. Improvement began with the first bottle, and after taking one dozen bottles I was a well and happy man again," says George Moore, of Grimesland, N. As a remedy for coughs and colds and healer of weak, sore lungs and for preventing pneumonia New Dis-covery is supreme, 50c and \$1.00 at W. A. Leslie's, druggist. Trial bottle
