SOLDIER BALKS DEATH PLOT It seemed to J. A. Stone, a civil war contracted a stubborn cold," he writes,

The Facts About Pe-ru-na.

Is Peruna an alcoholic beverage in disguise? Is it possible to use Peruna as a substitute for whiskey? Do people buy Peruna and use it as a toddy, or a bitters, or a bracer?

It would be the easiest thing in the world for any one to demonstrate the falsity of such statements. Let any one go to the drug store and purchase a bottle of Peruna. Let him undertake to use it as a beverage, or take this remedy in doses considerably larger than those prescribed on the bottle. Would the result be alcoholic intoxication? Nothing of the sort. Let any one try it and see.

Peruna is a medical compound quite heavily loaded with medicinal ingredients. If taken in doses larger than prescribed it would produce a positive drug effect. No one could take it as a beverage. If any one doubts these statements, try it and see. We know that Peruna cannot be used as a beverage; that it will not intoxicate; that it cannot be used as a substitute for liquors. We guarantee that PERUNA CONTAINS NO CHEAP WHISKEY -OR ANY OTHER WHISKEY, for that matter.

It contains a small per cent. of cologne spirits, absolutely essential to dissolve and hold in solution medicinal ingredients, but the drugs contained in Peruna prohibit its use as a beverage. It would be the easiest thing in the world for any one to demonstrate this if they chose to do so.

Peruna is sold everywhere. THE INGREDIENTS ARE PLAINLY PRINTED ON EACH BOTTLE. It has been said over and over again that chemists have analyzed Peruna and found it to contain only cubebs and whiskey. Now we challenge any chemist to demonstrate any such statement. Let any one who has even a smattering knowledge of chemistry purchase a bottle of Peruna and see whether or not it contains whiskey, find out for himself whether or not it is composed of cheap whiskey and cubebs. Of course, cubebs is one of the ingredients of Peruna, but there are many other ingredients. It contains hydrastis canadensis, corydalis formosa, collinsonia, and at least four other medicinal ingredients. To be sure, no chemist could so analyze Peruna as to be able to identify the various medicinal ingredients. This is beyond the ability of any chemist. But any ordinary chemist would be able to say that Peruna is heavily loaded with medicinal ingredients of some kind in addition to cubebs.

Now why are these statements repeated when their falsity could be so easily demonstrated? Simply because there is continued hostility toward Peruna on the part of the medical profession. Very likely the magazines which took up the crusade against Peruna and denounced it as a cheap beverage were misled by statements of the medical profession. Probably they were sincere in their attitude towards it. But now, after all these things have been said and refuted, it would seem to be in order for such people to use a little fairness and common sense in the matter.

Every time any one says that Peruna is nothing but cheap whiskey and cubebs he is telling a lie, an absolute falsehood. Most people intend to speak the truth. But the prevalent habit of repeating other people's statements, without investigation as to their truth, has led many well-meaning people to say these false things about Peruna.

Used according to the directions on the bottle, PERUNA IS A SAFE AND RELIABLE CATARRH REMEDY, but, like any other good medicine, if taken in excess of those doses, it will produce drug effects very unpleasant to

It is therefore up to every honest person to quit making such statements concerning Peruna, or acknowledge that he is repeating slanders about which he knows nothing. One might just as well say that Castor Oil is an intoxicant: that if taken in large enough doses it will operate as a "booze." If people never tried to see, but simply repeated such statements about Castor Gil, the majority of people would come to believe them. It is no easier to demonstrate such a statement about Castor Oil than it would be about Perpa

Any one who takes Peruna knows that such statements are false. To say that Peruna is cheap whiskey and cubebs may constitute good material for jokes on the vaudeville stage, but there is no excuse for any one who pretends to be truthful saying over again this oft-repeated falsehood.
