THE EARTH AS A MOON.

Our World as it Appears to Venus and Our Own Moon.

If we could be transported to the planet Venus a peculiar set of views could be obtained of our earth which would enable us to see ourselves, to some extent at least, as others see us. Venus is about the same size as the earth, is somewhat closer to the sun and has more atmosphere than the earth. When the earth and Venus are nearest together they are, of course, on the same side of the sun, and in consequence this side of the earth does not see more than a very small part of the Venus illuminated, but Venus, on the other hand, sees all of one side of the earth illuminated and consequently is able to claim she has something that takes the place of a moon anyhow, for the earth to Venus at this time looks very large and bright, almost as much so as our moon does to us.

If we could see all the illuminated surface of Venus on these occasions we should have quite a distinct second moon. When we do see all of her illuminated surface she is on the opposite side of the sun from us and consequently at an enormous distance, yet she is so brilliant as to keep us from seeing her surface distinctly.

But to our own moon we appear in the best light as a moon. A full earth as seen from the moon, according to Professor Todd and other astronomers, is a very inspiring sight on the moon's surface. It can at once be seen why this is necessarily true. The earth is several times larger than the moon and would appear in the heavens as a disk about fourteen times the size of the moon. It would shine with probably a variable light, due to the shifting clouds on the earth, though the light, of course, is reflected from the sun, and the reflecting is done in part by the upper surfaces of the clouds.

The outlines of the continents of the earth appear very clearly to the moon as if they were formed of paper mache on a globe. Cities of comparatively large size could be made out with ease in case people were there to make them out. The intensity of the reflected earth light would be as much as fourteen moons and would enable the Selenites, if such they are, to read or work in comparative daylight.—St. Louis Republic.

GOLD HIDERS.

The Aurohuacos of Colombia Worship the Yellow Metal.

Infesting the snowy slopes of snow kissed Aurohuaca, "the Sentinel," one of the highest peaks in the Sierras de San Marta, in northern Colombia, is one of the strangest tribes of Indians known to ethnologists—the Aurohuacos. Their name means "hidden gold," or "gold hidden," and that is just what they are. They worship the yellow metal, dividing their deceptions between gold and the sun.

The Aurohuaco will do anything for gold. Murder is nothing if it gains him the tiniest bit of gold. He works for gold, and for gold he will do anything. He will kill for gold, and he will die for gold. He will even sell his soul for gold, and he will even sell his soul for gold. He will even sell his soul for gold, and he will even sell his soul for gold.

His neighbors, the Talenancas, are wholly different. They regard gold or emeralds, also found in Colombia, as simply a medium of exchange for whiskey or aguardiente. The Talenancas are superstitious in their beliefs, but they worship the yellow metal, dividing their deceptions between gold and the sun.

In this favored region is plenty of alluvial gold which only needs to be taken out to make the reputation of Colombia rich and powerful. But the Aurohuacos spoil the best laid plans of men who come there to mine. They let men dig and dig and wear their fingers away washing the precious yellow grains out of the earth, and then they murder the miners or their treasures. This has been done countless times. Many of the skeletons that whitens the sides of "the Sentinel"—New York World.

BLOODSUCKING BATS

These Pests Are Plentiful in the Forests of Brazil.

THEY ARE TRUE VAMPIRES.

But Cattle and Horses Are Their Chief Victims. Which They Prefer to Human Beings—Their Chisel-Like Teeth and Peculiar Interior Anatomy.

Half a dozen of us had been telling what we thought we knew about bloodsucking bats, but our conversation had developed into an astonishing amount of misinformation and irreconcilable differences. So we called in the doctor who had lived some years in Brazil and asked him to comb out our tangled ideas.

"I'm not surprised at your confusion," he began, "for at one time or another I have believed about everything your questions would suggest. When I was a schoolboy the vampire was a bat as large as a crow, had a horn on his nose and was described as sitting on his victim's feet, fanning him with his wings while he worked his pumping apparatus. There is such a bat, but when it was proved that it was a fruit eater many of us doubted the whole bat legend along with the old mythology. There is a bloodsucking vampire, however—millions of them.

"The old Spanish conquistadors found proof of its existence in sore great toes, which looked as if the skin had been delicately shaved off, just deep enough to ooze blood, but they never caught one and naturally laid the blame to the biggest ones they found, which are nearly all vegetarians. The real thing is a small reddish brown creature closely resembling bats of the same color caught here not infrequently.

"The naturalist finds, however, some surprising differences. They have no teeth for any purpose save for thinning the skin—not enough for the blood to flow freely, but just sufficient to enable them to draw it by suction. The wound rarely bleeds after they leave it. This preparation is done with a pair of chisel-like teeth, sharp as a knife. Their interior anatomy differs from other animals as well as their habits. They are not nocturnal, but live in the day, and they are not carnivorous, but feed on the blood of their victims. They are not poisonous, but they are very dangerous. They are not poisonous, but they are very dangerous. They are not poisonous, but they are very dangerous.

THE COMET HUNTER.

His Emotions When He Finds a New Wanderer in Space.

The process of comet hunting is perhaps the most fascinating branch of practical astronomy. If there still lives among us moderns one only survivor of the traditional astronomer, one patient, expectant follower of the skies, seek him among the comet hunters, for today, as of old, you will find him perched on some tower scanning the heavens from dusk to dawn, sleepless, almost hopeless of success, yet ever supported by the thought that perhaps too, may add his chapter to the story celestial. Let us follow him at his work. Suddenly he sights a faint patch of hazy light, is for an instant uncertain, yet trusts that his eye deceives him not. Another minute and a larger telescope has made him sure. It is there. He hurries to his library and consults Herschel's catalogue of known nebulae. He finds the place in the book; down the page runs his eager finger. There is nothing recorded at that exact spot on the sky. It must be a comet. Yet even Herschel's careful scrutiny was not so very infrequently at fault. As yet there is no certainty. He must apply the dual test.

The larger telescope is now brought into play. If this is truly a comet it must be following some appointed orbit in space. It must be changing its position with reference to the stars. Probably half an hour will serve to settle the question to an experienced eye. The minutes pass, is there motion or is there not? He thinks there is. Now he is almost sure there is. Yes. No man could remain impassive. His pipe goes out; he forgets to smoke. Another quarter hour makes assurance doubly sure. Success is his.

But now he is seized with a new fear. Is he not observing something other than the discovery? There is another tireless comet hunter who lives in Vienna. Perhaps even now word is on the telegraphic cables. There is need of haste. The astronomer runs to the telephone, calls long distance to the observatory, through college observatory, which is the central distributing station for announcing new discoveries. They tell him calmly that they have heard nothing; that the discovery will be at once verified and made known by cable and telegram. He sits observing, through the world before morning. Our astronomer goes to shut up his telescopes. He will work no more tonight, but he sways a little as he crosses the room.—Professor Harold Jacoby in Harper's Weekly.

THEY GROW HAIR.

Certain Ingredients, if Properly Combined, Stimulate Human Hair Growth.

Resorcin is one of the most effective germ destroyers ever discovered. Beta-naphthol is a most powerful, yet absolute safe germicide and antiseptic, which prevents development of germ matter, and creates a clean, healthy condition.

Pilocarpine, although not a colored matter or dye, is an ingredient well established for its power to restore natural color to human hair.

Borax, because of its well-defined softening and cleansing properties, is most useful in the treatment of scalp and hair diseases. Glycerine acts as a stimulant to the hair bulbs, and has a soothing, healing and nourishing influence. Alcohol is indispensable in medicine because of its antiseptic, stimulating and preserving qualities.

Resorcin '93' Hair Tonic is chiefly composed of these ingredients, which are compounded in a peculiar form, and we believe is the most effective remedy known to medical science for scalp and hair troubles generally. We personally guarantee it to eradicate dandruff and scalp irritations and to grow hair, even though the scalp in spots is bare of hair, providing of course there life and vitality remaining in the hair roots.

We want every one troubled with scalp disease, dandruff or loss of hair to try Resorcin '93' Hair Tonic. If it does not remove dandruff and promote a growth of hair to the satisfaction of the user, we will without question or quibble return every cent paid for it. This guarantee is printed on every package. It has effected most satisfactory results in 93 out of 100 cases where put to a practical test.

Resorcin '93' Hair Tonic is entirely unlike and in every particular different from anything else we know of for the purpose for which it is recommended. We urge you to try it at our entire risk. Certainly we could offer no better guarantee. Two sizes, 50 cents and \$1.00. Sold in Morganton only at our store.—The Rexall Store. W. A. Leslie.

WONDERFUL RETRIBUTION.

An Incident of the Workings of Canada's Government Protection.

In September, 1904, two white men entered the Lesser Slave lake country, in the Canadian northwest, ostensibly prospecting for gold. Subsequently the Indians reported that one of the men seemed to be traveling alone, an observant Cree boy adding, "The white man's dog won't follow the fellow any more." The answers given by Charles King of Mount Pleasant, Utah, regarding his lost companion, Hayward, were not satisfactory. King was arrested, and there began one of the most splendid bits of detective work of which Canada has record.

Sergeant Anderson turned over the ashes of a campfire and found three hard lumps of flesh and a small piece of skull bone. In front stretched a little slough, or lake, which seemed a likely place in which to look for evidence. Setting Indian women to fish up with their toes any hard substance they might feel in the ooze, Anderson secured a stickpin of unusual make and a sovereign case. He systematically drained the lake and found a shoe with a broken eye needle sticking in it. The campfire ashes examined with the microscope yielded the missing part of a needle's broken eye and established unmistakable connection between the needle and the shoe.

The master of the stickpin in London, England, was communicated with by cable, and the Canadian government summoned a Mr. Hayward to come from England to identify the trinkets of his murdered brother. Link by link the chain grew, it took eleven months for Sergeant Anderson to get his complete case in shape. The mounted police brought from Lesser Slave lake to Edmonton forty Indian and half breed witnesses. The evidence was placed before the jury, and the Indians returned to their homes. A legal technicality cropping up, the trial had to be repeated in its entirety, and once more those forty men, women and children left their traps and fishing nets and came into Edmonton to tell their story.

The result was that Charles King was found guilty of the murder of Edward Hayward and paid the death penalty. The trial cost the government of Canada over \$30,000—all to avenge the death of one of the wandering units to be found in every corner of the silent places, an unknown prospect.—Agnis Dean Cameron in Prospector.

QUEER VILLAGES.

Some Peculiar Ones That May Be Seen in England.

The English village is very dear to the hearts of poets and painters, and thousands of them are certainly charming. A few, however, are more amusing than anything else—as, for instance, one which consists entirely of old railway carriages, even the chapel being composed of four horse trucks. Another village, with a population of 1,100 and taxed at the valuation of \$8,000, has neither school, church nor other public building, the only thing of the sort being a letter box on a pillar.

Villages with but a single inhabitant are not unknown. One of them being Skiddaw, in Cumberland. The single villager complains bitterly because he cannot vote, there being no overseer to prepare a voters' list and no church or other public building on which to publish the list.

Some villages have declined to contribute money to maintain the roads, remarking that the one he has is quite good enough for its use. In the Isle of Ely is a little parish with about a dozen inhabitants that has no rates, as there are no roads or public institutions of any kind and consequently no expenses.

Kempton, near Bradford, can probably lay successful claim to the distinction of being the longest village in the world, as it straggles along the road for a distance of seven miles.

Sometimes a village will entirely disappear, having been built either on the edge of the crumbling cliffs that make part of the coast line or over an ancient mine. One of the latter class is in Shropshire, and each year one or more of the cottages tumbles as the earth sinks beneath it.—Harper's Weekly.

A Big Reduction

On all Clothing now on hand. We mean this. If you are a "Doubting Thomas" we will show you the bill, if you will promise to buy at cost.

All Sample Shoes now on hand at 15 per cent off.

A big assortment 50 cent value Dress Shirts at 35 cents for choice.

A lot of Ladies' Wrappers, worth from 80 cents to \$1.15, your choice for 50 cents while they last.

If you are in need of a good Trunk or Suit Case, we have big values for the money.

Come and see for yourself that you can get the best values for cash.

Fortune Telling

Does not take into consideration the one essential to woman's happiness—womanly health.

The woman who neglects her health is neglecting the very foundation of all good fortune. For without health love loses its lustre and gold is but dross.

Womanly health when lost or impaired may generally be regained by the use of Dr. Pierce's Favorite Prescription.

This Prescription has, for over 40 years, been curing delicate, weak, pain-wracked women, by the hundreds of thousands, and this too in the privacy of their homes without their having to submit to indelicate questions and oftentimes repugnant examinations.

Sick women are invited to consult Dr. Pierce by letter free. All correspondence held as strictly confidential. Address: World's Dispensary Medical Association, R. V. Pierce, M. D., President, Buffalo, N. Y.

Dr. Pierce's GREAT FAMILY DOCTOR BOOK, The People's Common Sense Medical Adviser, newly revised up-to-date edition—1000 pages, answers in Plain English hosts of delicate questions which every woman, single or married, ought to know about. Sent free, in plain wrapper in any address on receipt of 21 one-cent stamps to cover mailing only, or in cloth binding for 31 stamps.

FOR SALE.

A small farm of 44 acres on the Shelly road, four miles from Morganton.

Morganton Insurance & Realty Co., (INCORPORATED) FRED L. HUFFMAN, Manager.

WEAK, WEARY WOMEN.

Learn the Cause of Daily Weakness and End Them.

When the back aches and throbs.

When housework is torture.

When night brings no rest nor sleep.

When urinary disorders set in.

When women's lot is a weary one.

There is a way to escape these woes.

Doan's Kidney Pills cure such ills.

Have cured women here in Morganton.

This is one Morganton woman's testimony.

Mrs. M. M. Piery, Green St., Morganton, N. C., says: "In my case Doan's Kidney Pills proved to be a very reliable remedy. I suffered for over ten years from weak kidneys and when I caught cold it was sure to settle in these organs, causing my back to ache for weeks. I tried a number of remedies but nothing gave me relief until Doan's Kidney Pills were procured. I used them according to directions and they proved of great benefit."

For sale by all dealers. Price 50 cents. Foster-Milburn Co., Buffalo, New York, sole agents for the United States.

Remember the name—Doan's—and take no other.

MORE PINKHAM CURES

Added to the Long List due to This Famous Remedy.

Oronogo, Mo.—"I was simply a nervous wreck. I could not walk across the floor without my heart fluttering and I could not even receive a letter. Every month I had such a bearing down sensation, as if the lower parts would fall out. Lydia E. Pinkham's Vegetable Compound has done me a great deal of good and has also relieved the bearing down. I recommended it to some friends and two of them have been greatly benefited by it."—Mrs. MAE McKNIGHT, Oronogo, Mo.

Another Grateful Woman.

St. Louis, Mo.—"I was bothered terribly with a female weakness and had backache, bearing down pains and pains in lower parts. I began taking Lydia E. Pinkham's Vegetable Compound regularly and used the Sensitive Wash and now I have no more troubles that way."—Mrs. AL. HURD, 5722 Prosser Ave., St. Louis, Mo.

Because your case is a difficult one, doctors having done you no good, do not continue to suffer without giving Lydia E. Pinkham's Vegetable Compound a trial. It surely has cured many cases of female ills, such as inflammation, ulceration, displacements, fibroid tumors, irregularities, periodic pain, backache, that bearing-down feeling, indigestion, dizziness, and nervous prostration. It costs but a trifle to try it, and the result is worth millions to many suffering women.
