COMET TURNS GOAL ON ITS MARCH.

Looped the Loop Around Sun Yesterday and Now Starts Back Whence it Came.

Asheville Citizen, 25th.
Halley's comet, which has been coming earthward at the rate of some million miles a minute, according to astronomers, for the past seventy-five years, is at last visible and those who have been waiting anxiously for its appearance can now catch a faint glimpse of it in the eastern skies between three and four o'clock in the morning. It still lacks the brilliance and glory it will take on later, the tail which is some fifty million miles long being barely discernible as yet.

The comet reached the turning point in its mad marathon around the sun yesterday and is now rounding the goal preparatory to chasing itself back into that Plutonian darkness whence it came. It is moving very slowly astronomers say, going only at a rate of some odd thousand miles a second, which for this celestial visitor is the same thing as being tied to a post.

From now on until the latter part of May it will be a brilliant spectacle in the early morning sky and then it shifts its engagement to the evening sky for mid-summer, so that everybody may have a chance to see it.

It will attain its greatest brilliance about the middle of next month; on May 18 it will saucily switch its fifty million mile tail in the earth's face. Scientists are wondering what will happen when the earth plunges through the comet's tail.

Nobody has ever caught a comet by the tail and so scientific knowledge of what the tail is composed of is very meager, but they all say that nothing will happen—or if anything does happen, it will be to the comet's tail and not to the earth.

According to the generally accepted theories the tail is composed of fine particles of dust—star dust, perhaps or invisible gases. Whichever it may be does not matter for when it hits the earth, it will lose. The trusts may gobble up the gas as they are accustomed to do, with all such public utilities.

Observers at Harvard university after beholding the comet gave out the following statement: "A good photometric measurement of the brightness of the nucleus of Halley's comet was obtained. The measured magnitude of the nucleus was 6.4. The total brightness of both the nucleus and the surrounding coma was a little above the fifth magnitude. The comet has grown somewhat brighter within the last few days and is now faintly visible to the naked eye.

"From a popular point of view the comet is disappointing at this time, and with the approach of the moon during the next two weeks toward the region in the sky in which the comet is found there will be very little to repay the early riser. In fact astronomers do not look for any spectacular display while the comet is in the eastern sky.

"Next month, however, when it passes between the earth and the sun and reappears in the west, it will be an object of much interest.

"Centuries ago the comet flaunted a good sized tail, but conflicts with the sun every seventy years has shrunk the comet of much of its brilliant appendage."

Foley's Kidney Remedy will cure any case of kidney and bladder trouble not beyond the reach of medicine. No medicine can do more. W. A. LELSIE.

A story comes from Monroe of a suit brought before a magistrate of that town, against the railroad company for alleged damages to a mule. The bill of particulars set forth that the mule was physically damaged to the extent of \$10 while for "injury to said mule's nervous condition" the sum of \$30 was demanded. The result of the suit is not stated.

MUST WAIT FOR LEGISLATURE.

Morganton State School for the Deaf and Dumb Must Wait for Appropriation for Equipment.

Raleigh Dispatch.
It happened that in appropriating money for the new building for the State School for the Deaf and Dumb at Morganton, the Legislature made no provision for its equipment and the institution will have to wait until the next Legislature makes appropriations before it can equip the primary building, which is nearly completed at a cost of \$23,000. The law provides that a State institution shall not incur debt and the old provision allowing it in case of extreme necessity or dire need has been stricken from the statute. Representatives of the executive committee of the school recently appeared before the Council of State to learn if the school could borrow the money, and the matter was referred to the Attorney General for investigation. The committee was to have submitted its proposition in writing, which has not yet been done, but it was stated yesterday by one who has investigated the law that no State institution may incur a debt.

Young Southerner's Oratory a Starting Novelty.

In what is declared the supreme effort in oratory in Pawling School, at Pawling, N. Y., a declamation that stirred his Northern hearers as they had never been stirred by Northern eloquence, Thomas Dixon, Jr., son of the famous Southern author, won the first prize for oratory in an unprecedented manner last week. His subject was a condensed version of Charles Gaston's speech before the Democratic convention, taken from "The Leopard's Spots," and some sentences from "The Clansman." Young Dixon is 18 years of age. His speech was a startling novelty to a Yankee audience and swept the judges off their feet. Dixon threw himself into it with fire and passion and his Northern judges forgot to grade him on the technical points of oratory. When he sat down in a whirlwind of applause they had not made a mark. They just gave him a hundred, awarded the medal without discussion and devoted their time to figuring out the fellow who was entitled to the second prize.

Tuberculosis Sunday Observed in All Pulpits in Large Cities.

Washington Dispatch, 24th.
Pulpits of all denominations in Washington, united to-day with those of every large city of the nation, on the fight of tuberculosis. In every church of the national capital clergymen and laymen both spoke of the fight being waged by the national association for the study and prevention of tuberculosis and literature prepared for the occasion was distributed. Tuberculosis Sunday was made the occasion for another mile stone in the great campaign being fought all over the country against the White Plague. Special sermons were preached in many of the churches and in others where pastors felt incompetent to speak on the subject, laymen were called in. Thousands of circulars telling of simple methods to prevent the spread of the plague were distributed and the location of the free dispensaries of the city widely advertised.

New York Observed It.

New York Dispatch, 24th.
Nearly all leading churches of the city, in common with those throughout the country, joined to-day in making this tuberculosis Sunday. The movement has the support of President Taft, the governors of nine states and the mayors of hundreds of cities.

At Philadelphia.

Philadelphia Dispatch, 24th.
Tuberculosis Sunday was generally observed here to-day by churches of many denominations. A number of clergymen told in their sermons of methods by which the spread may be prevented. In a majority of the churches circulars issued by the Society for the Study and Prevention of Tuberculosis were distributed.

POPULATION SHOWS BIG GROWTH; FOOD LESSENS.

Advance Census Report Shows Three Per Cent. Decrease in Number of Animals.

Washington Dispatch, 25th.
An increase of 12,000,000 in the population of the United States during the past ten years, and a decrease of about \$5,000,000 in the number of available food animals is the estimate made by the Bureau of Statistics from reports on these two subjects, made respectively by the Census Bureau and the Department of Agriculture.

Another lesson in the law of supply and demand, deduced by the Bureau of Statistics, is that the supply of food animals has gone down 3 per cent., while the value has increased 22 per cent. Cattle are the one class of food animals which has come anywhere near keeping pace with the growth in population. Cattle have increased in number 11 per cent., while the population has increased 16 per cent.

A pound of lard in 1901 was worth 7.4 cents; in 1910 it is worth 18 cents, an increase of 143 per cent. This may be accounted for, in part at least, by the fact that there has been a decrease of 16 per cent. in the number of hogs in the United States.
