## BIG EARTHQUAKE IN MEXICO.

### More Than a Hundred Killed and Wounded—Property Damage \$50,000.

Mexico City, Mex., Dispatch, 7th.

Sixty-three persons were killed, seventy-five wounded and property worth \$50,000 was wrecked to-day by an earthquake which shocked the Mexican capital and injected a note of tragedy into what was to have been a day of pure rejoicing over the arrival of Francisco I. Madero, Jr.

When the work of searching the ruins is completed, it is possible that the list of dead will be increased somewhat, as hiding here and there throughout the city there doubtless are many wounded, who, with traditional fear of the authorities and government hospitals, are anxious to evade discovery.

The property loss estimate is based on calculations made by owners and contractors. Little of the loss is covered by insurance.

It was 4:36 o'clock when the first shock was felt. According to the meteorological observatory, the greatest intensity was reached at the end of the first minute, but the instruments continued to record the shocks fourteen minutes more.

The disturbance was vacillating and almost free from trepidatory motion.

More than half of the dead accounted for were soldiers. They were caught between the falling walls of the artillery barracks at San Carlos near the Mexican Central.

Although the shock was plainly felt in all parts of the city, few realized the magnitude of the catastrophe until late in the forenoon because the casualties were confined to a comparatively small area. The inhabitants were slow to realize that this was the most serious shock the capitol has suffered in a score of years.

No personal property of Americans was damaged, and, with the exception of one Chinese killed, no foreigners were injured. In the barracks where the soldiers were killed twelve women also lost their lives. They were the wives of artillerymen.

Seventy-two soldiers were sleeping in the house. Approximately thirty-five were quartered on the first floor, the remainder on the second. The outer wall fell and the roof, crashing down through the ceiling on their comrades below. The bodies of thirty soldiers have been recovered. Three are missing and sixteen are wounded, a few severely.

Those who escaped began the work of rescue at once. Women, whose soldier husbands were in the pile, stood by wailing in groups while children clung to their mothers' dresses and stared curiously at the gruesome scene. Ambulances later carried the wounded to the military hospitals and the dead to Dolores cemetery.

NO DANGER

In taking Dr. Bell's Pine-Tar-Honey for coughs and colds, it contains no habit producing drugs. Look for the Bell on the Bottle.

### "Evils of the Moving Picture Show."

At the meeting of the King's Daughters in Salisbury Thursday, Mrs. D. F. Cannon spoke on "Some Evils of the Moving Picture Show."

Mrs. Cannon's talk, says the Post, was especially directed to mothers, and she dwelt on the dangers to young girls and boys, of the darkened auditorium and suggestive pictures.

The subject was discussed at length and the following resolution adopted: "Moved that each circle of the King's Daughters in North Carolina appoint a committee to strive for the abolishment of the dark auditorium for moving picture shows, the elimination of all impure pictures and objectionable vaudeville, and that each committee appeal to the mayor of its town for his official co-operation in accomplishing this object."

### FOLEY'S KIDNEY REMEDY

Is particularly recommended for chronic cases of kidney and bladder trouble. It tends to regulate and control the kidney and bladder action and is healing, strengthening and bracing.

### THIN MILK

How can the baby grow strong if the nursing mother is pale and delicate?

### Scott's Emulsion

makes the mother strong and well; increases and enriches the baby's food.

### DR. BELL'S ANTISEPTIC SALVE

Good for all Skin Diseases.

## Duke Making a Mountain—Costly Freak of Tobacco King.

Adams Letter in Boston News Bureau.

James Buchanan Duke gets a million dollars a year in dividends from his American Tobacco stock. He is now spending some of this money in building a mountain on his country estate at Somerville, N. J. Duke's place is on a level stretch of bottomland near the Watchung mountains, and the view from his home is limited. So he is hauling in train loads of earth to build himself a mountain and thus arrange the topography of his acres to suit his fancy. On top of the mountain he is going to build another mansion. If the mountain won't come to an American millionaire he can haul it in.

The Duke fortune is founded on cigarettes. The original American Tobacco Company of 1890—the year of the anti-trust act—was a \$25,000,000 cigarette trust built on \$5,000,000 of hard assets. The Dukes had a 30 per cent. interest in the capitalization. They had built up their business from \$200,000 a year in 1883 to \$4,500,000 in 1889, and in the last year they spent \$800,000 in advertising. It was the costly advertising war in the cigarette trade that brought the five big cigarette companies together. They controlled 90 per cent. of the country's output. Duke has made cigarettes popular in this country. The enormous increase in the consumption of cigarettes has been the result of his aggressive advertising campaign.

As late as 1870 the annual production was less than 50,000,000 cigarettes, or about one for every inhabitant. Now it is 7,000,000,000 or about 80 times as large per capita. Only within the last five years the output of cigarettes has doubled. The profit in manufacturing them is enormous—this is the richest end of the American Tobacco business. When cigarettes were made by hand the labor in rolling them cost about a dollar a thousand. Now cigarettes are made in machines at a cost of six cents or seven cents a thousand for rolling.

Warning to Farmers

Mr. E. S. Millsaps, of Statesville, pointing to the extremely hot weather now prevailing in that section of the state, sends out a letter to the farmers urging upon them the necessity of practicing "close culture methods in order to conserve the soil moisture." Mr. Millsaps states that the fact that there is a deficiency of 18 inches in the rainfall calls for extra efforts in the line of pulverizing the soil. His letter follows:

"I want to urge upon every farmer to use all the means in his power to keep the surface of the cultivated fields well pulverized during the continuance of the dry weather, and after every rain that comes. As soon as rain comes there will be millions of grass and weed seeds that will germinate, and unless the soil is kept well stirred these additional plants will further rob the soil of moisture that the crop will need, and besides the evaporation that will follow if the soil becomes crusted will be immense. I know that labor is scarce and dear, but by the use of such machinery as is suited to the various crops, good work may be done at the right time.

"No better object lesson on the value of thorough preparation of the seed bed could be had than the condition of the crops at this time. In every instance the fall broken land is starting off a better crop than the spring broken land, and the further fact is seen also that the well cultivated soil is supplying the young plants more plant food and water than the poorly cultivated soil. The time has not really come when the plants require the greatest amount of water, and this good cultivation must continue right along.

"Where the stand of cotton and corn is good enough not much damage has resulted to the crops, yet the crisis will come a little later, and every farmer should be prepared to combat it as such as possible. This can be done only by the best cultivation."

If you are not satisfied after using according to directions two-thirds of a bottle of Chamberlain's Stomach and Liver Tablets, you can have your money back. The tablets cleanse and invigorate the stomach, improve the digestion, regulate the bowels. Give them a trial and get well. Sold by all druggists.

### GRANULATED EYE LIDS

Can be cured with cauterizing or scarifying by the use of Sutherland's Eagle Eye Salve. We guarantee it to cure. 25c. everywhere.

Bill of Fare for Mr. Caesar Cone's Fourth.

Charlotte Chronicle.

Mr. Caesar Cone has announced the completed details for the annual Fourth of July Picnic and dinner to the operatives of his cotton mills, at Greensboro. The 1911 event is to be a more elaborate one than those of the past. What would the operatives of a New England mill village think of being invited to "set to" on a lay-out of 500 gallons of ice cream, assorted flavors; 20,000 fresh eggs; 10,000 smoked frankfurters; 5,000 bags of peanuts; 10,000 fancy watermelons to weigh 35,000 pounds; 1,000 pounds of confectioneries; 100 crates of luscious Elberta peaches; carload ripe pineapples to be sliced and buried in 1000 pounds of sugar; 50 gallons of fresh sweet milk for the babies and young children; 5,000 buns for sandwiches; 100 crates of ripe tomatoes; 15,000 sweet and sour pickles; 5,000 ears of corn. Yet that is the commissioner's contract for the picnic entertainment of the people employed in the Cone mills. Not only do these people experience the liberal evidence of good will of the Cones on the Fourth of July, but on Thanksgiving Day and Christmas, they live on turkey and cranberry sauce and things of that kind. This is typical of the relations existing between Southern cotton mill owners and their help, and it is a feature of Northern philanthropy are not in the least concerned about. The Chronicle suggests to Mr. Cone that he make an effort to have some of these Northern newspaper and magazine writers spend the Fourth as guests.

## THOUSANDS ARE COMING BACK TO THE SOUTHERN STATES.

Spartanburg Dispatch, 9th.

Newspapers all over the South are printing letters from Southern people in the West and North-west which tell of thousands who are coming back to the South. The Secretary of the "Back Home" Association, W. D. Roberts, Johnson City, Tenn., has been for several months gathering the addresses of people who have gone west. He says inquiries for farm lands and for rates are coming at the rate of fifty a day, most of them from Southern people. Many of them, he says, request that information be given to their friends in various sections of the West.

Thousands of individuals and boards of trade in the South are working in this "Back Home" movement. Every mail to the West carries hundreds of letters and pieces of literature which set forth the advantages of this country and a direct personal appeal to its natives to come back to their own home states. Even the women are at work; mothers are writing to their children and sisters to their brothers, all telling of the great development of the South.

On the first of July the "Back Home" Association will begin publishing an organ for circulation among the millions of Southerners in other States. It will be called the "Back Home" Magazine. An announcement of it sent to the West has brought a great many requests for copies.

SEES END OF TROLLEY CARS.

Tells Members of National Electric Light Association of His Latest Invention.

New York American.

Thomas A. Edison was the guest of honor yesterday, the third day of the convention of the National Electric Light Association. Mr. Edison bowed his thanks and Mr. Samuel Insull read a set speech for him. Afterward the inventor said he was ready with the inventions of which he had spoken before—the storage battery that will run a car or wagon and the motion picture machine with the words spoken as the action proceeds.

"The storage battery for a wagon," said he, "is operating on a butcher's wagon in Orange. It costs 25 cents to run it 17 miles. You recharge it at the end of every trip with an ordinary feed wire. The battery is fitted under the seat.

"The surface car is being operated at Concord, N. C., and they are laughing at the rest of the United States for using trolley cars. It runs very cheaply."

Of the moving picture and talking machine combination, the inventor said he and his associates were nearly ready to place it upon the market.

"We have a theater in the Bronx with a stage bigger than the Metropolitan Opera House. We have about 60 actors going through new dramas. They talk into a megaphone. We have about forty dramas. All that is to be done is to get the business end straightened out and they will be in the moving picture shows.

"We've not applied it to the Shakespearean dramas yet, but

## Carrie Nation, Famous Saloon Smasher, is Dead.

Leavenworth, Kansas, Dispatch, 8th.

Carrie Nation, the Kansas saloon smasher, died here tonight. Paresis was the cause of her death. For several months Mrs. Nation had suffered of nervous disorders and on January 22 she entered the sanitarium in which she died.

The Physician at the sanitarium informed Mrs. Nation several days ago that the end was near. She said nothing, but smiled. She became unconscious at noon today and did not revive. Relatives had been telegraphed for but only the doctor and a nurse were at her bedside when she died.

Worry over lawsuits, which she brought against a lecture bureau for failure to pay for services, is said to have caused her breakdown.

The last five months of Mrs. Nation's life was in marked contrast to her former activity. Once she saw a physician at the sanitarium smoking a cigarette. She made no remonstrance, merely saying that she had done what she could to "eradicate the evil."

## DICKENS'S LITERARY GAINS.

Said to Have Made \$50,000 Out of Each of Later Books.

The papers have been printing a great deal of pure nonsense on the subject of Dickens's literary gains. We are told among other things that the emoluments from his books were "totally inadequate, owing to the non-existence of copyright." No writer of his time was so highly paid as Dickens.

It was calculated by one who knew all about his affairs that he made about £10,000 out of each of the books which he wrote after 1846. The price paid down for "Edwin Drood" was £7,500. Author and publisher were to share equally in the profit of sales of over 25,000 copies and 50,000 were sold of each of the opening numbers. The payments for the early sheets for American and for the Tauchnitz edition must have brought the author about £2,000 besides.

Dickens is stated to have died leaving "earnings that often accrue to a respectable solicitor." That is rubbish also. Dickens left \$93,000 in round figures, and this did not include a considerable sum of money that he had settled some years before his death. His readings (1858-69) had brought in about £26,000.

It is forgotten that Dickens began life without one penny and that every farthing he spent or gave away or left was earned himself, only excepting £2,000 which was bequeathed to him by a friend about two years before his own death. Dickens lived liberally (some people said extravagantly), for about thirty-four years, he brought up and started in life a large and very expensive family and he gave a great deal of money to needy relatives.

A LEADING CALIFORNIA DRUGGIST.

Pasadena, Cal., March 9, 1911.

Foley and Co., Gentlemen:—We have sold and recommended Foley's Honey and Tar Compound for years. We believe it to be one of the most efficient expectorants on the market. Containing no opiates or narcotics it can be given freely to children. Enough of this remedy can be taken to relieve a cold, as it has no nauseating results, and does not interfere with digestion. Yours very truly, C. H. Ward Drug Co., C. L. Parsons, Sec'y, and Treas. Get the original Foley's Honey and Tar Compound in the yellow package. W. A. Leslie.
