No. 22.

When You Yawn a Good Deal

In the day time, and feel dull, lary and discouraged, you have every symptom of a general liver trouble. Simmons' Red Z Liver Regulator (The Powder Form) is a fine tonic for a disordered liver. It acts promptly. The bilious impurities which have interferred with the free action of the liver are driven out, the stomach is cleansed and strengthened so that it can thoroughly digest food. The bowels are purified and a regular habit re-established. It is a splendid medicine for the whole system. Promotes a feeling of energy, mental activity and cheerful spirits.

Sold by Dealers
Price Large Package, \$1.00
Small Package, 50c
Beware of cheap imitations. The name "Simmons' Red Z Liver Regulator" is prominent on the wrapper. Each box contains 25 doses. Price \$1.00 per box. 50c per box. 25c per box. 10c per box. 5c per box. 2c per box. 1c per box. 5c per box. 10c per box. 25c per box. 50c per box. \$1.00 per box.

Fifty Young Men Wanted.

Young men are wanted to accept positions as operators on the L. & N. R. R. Address E. H. ROY, Superintendent, Nashville, Tenn.

Special Bargains in Real Estate.

J. B. ATKINSON.

Wood's Fall Seed Catalogue

Just issued—tells what crops you can put in to make the quickest grazing, or hay, to help out the short feed crops. Also tells about both.

Vegetable and Farm Seeds that can be planted in the fall to advantage and profit.

Every Farmer, Market Grower and Gardener should have a copy of this catalog.

It is the best and most complete fall seed catalog issued. Mailed free. Write for it.

T. W. WOOD & SONS,
Seedsmen, - Richmond, Va.

Winter Cover Crops.

Correspondence of The News-Herald.

Every farmer owes it to himself, to his family and to posterity, to take the best care of his land that he possibly can; to maintain its fertility and to keep it from washing away.

Investigators, whether scientists or practical farmers, have found that winter cover crops of any kind prevent land, in a large measure, from washing, and when turned under the following spring make it more productive than if no crop had grown on it.

An experiment covering a number of years, in one of the North Western states, showed that more plant food was lost from the land during the months when no crops were grown on it than was taken off in the regular summer crops. If this was true in that state where they have long and cold winters when leaching is impossible for weeks at a time, how much more would it be true in North Carolina with her open winters when plant food can be leached from our soils almost any week during our winter months.

A ton of green rye contains, according to good authorities, about 6.6 pounds nitrogen, 3 pounds phosphoric acid and 14.6 pounds potash. A ton of green wheat contains 10.8 pounds nitrogen, 3 pounds phosphoric acid, and 14 pounds potash. Green oats contain just a little less plant food than does green wheat. A ton of green crimson clover contains 8.6 pounds nitrogen, 2.6 phosphoric acid, and 9.8 pounds potash. Red clover, Bur clover and the vetches contain more plant food in their green state than crimson clover does. The wheat and rye mentioned above was probably grown on fertile land which explains their high percentage of nitrogen, for it is an established fact that crops grown on rich land contain more nitrogen than when grown on poor land. For that reason grain grown on rich land has a higher feeding value than that grown on poor land. It may be well for us to remember this when growing grain for our own feeding purposes.

Rye, wheat and oats take nitrogen from the soil and store it in the plant, thus saving much of this costly element of plant food that would otherwise be leached from the land by our winter rains. The stools or bunches and their roots and leaves retard the flow of water and act as brakes which will prevent to a large degree the washing of rolling lands. The clovers save the land from washing in the same way and in addition to this are beneficial by being able to take nitrogen from the air through the agency of bacteria which adds to the fertility of the soil. But to grow these latter crops successfully the soil must contain the bacteria peculiar to the particular crop grown.

It has been the experience of many of our farmers that any crop grown after a winter-cover crop, when turned under at the proper time in the spring, and disked well before and after turning, will produce a great deal more, often as much as 50 per cent. more, than if no winter-cover crop had been grown. The seed for a cover crop will cost from one to five dollars an acre according to kind and quantity of seed used. This should be saved to the soil and add to the next year's crop more than twice the cost of the cover crop.

Sow at the rate of 15 to 20 pounds crimson clover seed per acre and cover lightly with harrow or cultivator. These can be sowed in growing crops, on stubble land, or after peas. Sow from 20 to 30 pounds of vetch per acre if sown with small grain, and 50 pounds alone per acre. Rye should be sown at the rate of one to one and a half bushels per acre.

An application of manure, or from 200 to 500 pounds acid phosphate, per acre and 25 to 50 pounds muriate of potash on sandy or gray land, will be helpful to the clovers and vetches. For rye or other small grain it may be better to add 2 per cent.

For that distressed feeling after eating, belching and nausea between meals, take Bloodina. It cures Dyspepsia by strengthening the digestive organs so that they are capable of fulfilling their functions. Leslie's Drug Store, Special Agents.

nitrogen to the above.

It is now time to commence putting these crops in. When put in cotton fields it is better to sow immediately after the pickers, as in that way no cotton will be knocked out in covering the seed.

Put in the crop that will succeed best in your locality and experiment with other crops in a small way until you are assured they will make satisfactory growth on your land and under your conditions.

T. B. PARKER,
Director Co-operative Experiments, N. C. State Department of Agriculture.

The Gunter Girls.

Raleigh Times.

"The Gunter girls of Aiken" are winning Laurels for themselves and at the same time giving an object lesson to other girls on the farm, and boys and men, too, for the matter of that. The Gunter girls are tomato girls, and it was in South Carolina, we believe, that the tomato clubs originated and where they are now most flourishing. Miss Eunice Gunter, of Seivern, Aiken county, the Columbia State informs us, has already put up 668 three-pound cans of tomatoes from one-tenth of an acre, and will probably increase the number to 700. That means two thousand pounds of the vegetable or at the rate of twenty thousand pounds to the acre. The state thinks that when a South Carolina girl makes such demonstration of what is practicable on South Carolina farms, that it is time to stop importing to the state "by railroads and steamers, for the consumption of South Carolinians, tens of thousands of cases of canned tomatoes." And the State is right. This whole section ships in canned tomatoes, carload on top of carload, when it could and does produce the finest kind of tomatoes right at home. It ought to produce a great deal more of them than it does, but it doesn't even take care of what it does produce and many bushels go to waste every year because of lack of home or local canning industries. What is made and goes to waste would not supply the home demand, but it would help some, if saved.

"The Gunter girls" and others like them will have accomplished a great thing for their section if they succeed in increasing the output of tomatoes and increasing interest in the canning industry, not only of tomatoes, but generally. The other Miss Gunter, by the way, is going to Winthrop this year. By making a world's record in tomato culture last year, she was given a scholarship to Winthrop and has passed the examinations necessary to entering the institution. She made a record in tomatoes, and it is confidently predicted she will make a record in scholarship. "The Gunter girls" are winners. May their tribe increase.

NOT A WORD OF SCANDAL marred the call of a neighbor Mrs. W. P. Spang, of Manville, Wyo., who said: "She told me Dr. King's New Life Pills had cured her of obstinate kidney trouble, and made her feel like a new woman." Easy, but sure remedy for stomach, liver and kidney troubles. Only 25c. at W. A. Leslie's.

A Land of Opportunity.

Savannah News.

Eight years ago Morris Shapiro worked for a dollar a day in a junk factory. Now he is offering the Isthmian canal commission a certified check for \$115,000 for a half-mile string of broken engines, cars, steam cranes, dredges and other machinery used by the French company that attempted the construction of the great canal thirty years ago. Twelve years ago Shapiro emigrated from Prussia. There are no barriers in America for the man who wants to climb.

BUILD UP

In spring and summer, it's the natural time to store up health and vitality for the year.

Scott's Emulsion is Nature's best and quickest help.

Our Great State Fair.

We have just received from the North Carolina Agricultural Society a striking little booklet that is a bright gem in its class. It is tiny, but full of facts and figures about North Carolina and her Great State Fair that will be held for the fifty-first time at Raleigh on October 17, 18, 19, 20, 1911. There are only eight small pages and a neat, very tasty cover, all of a size to fit in the ordinary envelope. Cuts show a birdseye view of the Fair Grounds while the Fair is going on and Lincoln Beachy flying his Curtiss aeroplane over Niagara Falls.

There is an appreciation of North Carolina that carries a point in every paragraph, a fact in every sentence, clothed in a style as attractive as the story it tells, and all in one small page. The marvelous progress of the State is told in a comparative table of crop figures for 1905 and 1910, and a similar alignment of statistics of the manufacturing industries. In addition there are comparative values of farm land and buildings, implements and machinery, labor and fertilizers.

In a brief review of the work of the State Fair the booklet calls attention to the fact that it is chartered without capital stock, its real property being held in trust to secure a bonded debt, any profits made going into a surplus which is spent in improvements and increasing premiums. The construction of the reinforced concrete agricultural building at a cost of \$7,000, the new building for women and other betterments last year are touched upon, as well as the modern poultry building to be ready for the coming Fair. Figures show 83 solid carloads of exhibits last year against 42 in 1909; 3,501 separate entries against 1,201, and \$8,191,45 net premiums paid against \$6,598.97. As evidence that the Fair is recognized as one of the greatest gathering points for pure-bred stock in the South, mention is made that the Percheron Society of America is this year offering its special prizes at the Raleigh Fair, which is one of only four Southern Fairs to be so honored. It is stated that by resolution of the Executive Committee all questionable shows and doubtful games have been forbidden the grounds.

On the amusement side there is borne the news that the Fair is contracted with the Glenn H. Curtiss Co. for aeroplane flights each day of the Fair on a guarantee-to-fly basis, the aviator to be Lincoln Beachy or Hugh Robinson. Beachy is the birdman who flew under the bridge at Niagara, while Robinson did likewise at Cairo, Ill., under a railroad bridge over the Ohio. These two were the only flyers to finish in the cross-country race from New York to Philadelphia, and both were stars at the Chicago Aviation Meet, where Beachy made a new record for altitude—11,578 feet. Another attraction mentioned is California Frank's Wild West show with its fifteen carloads and 200 people. Then there is The Great Calvert, star high-wire specialist. Special mention is made of the miraculous painting, "In the Shadow of the Cross," to be exhibited for the first time in the South. It has figured at the great world expositions and been a topic of discussion among clergymen and scientists. But aside from all this the little book is valuable for the information it contains, and is well worth preserving. Write for a copy to the State Fair, Jos. E. Pogue, Secretary, Raleigh, N. C.

FOR USE ON FACE AND HANDS Dr. Bell's Antiseptic Salve is the best. It is a creamy snow white ointment and one 25c box will last three months.

Engaged Man—Love me? Why, she actually counts the kisses I give her! Critical Friend—That's bad. She may keep it up after your marriage.—Boston Transcript.

One of Those Crazy Questions. "Well, great guns, Jones! I see you're wearing glasses. What for?" "For a sprained knee, you darned fool! What do you suppose?"—Toledo Blade.

As usually treated, a sprained ankle will disable a man for three or four weeks, but by applying Chamberlain's Liniment freely as soon as the injury is received, and observing the directions with each bottle, a cure can be effected in from two to four days. For sale by all dealers.

DETAIL PLANS ACCEPTED FOR STATE STRUCTURE.

Commission Advertises at Once for Bids Which Will Be Opened Nov. 1. Raleigh Dispatch Sept. 11th.

The state building commission, in session here today, Hon Ashley Horne, chairman, accepted the detail plans for the \$250,000 fire proof state administration building, subject to any criticism that may be passed upon specifications by Consulting Architect Glenn Brown, of Washington, D. C., who was retained in this capacity by the commission. Thornton Mary, of Atlanta, is designing architect. The commission advertises at once for bids to be opened in Raleigh November 1. Commissioners J. A. Long and J. Elwood Cox have been designated an executive committee to have immediate supervision of the work. They will later procure a clerk who will have charge of the Raleigh office for the commission to keep track of the construction work while the building is in progress.

Diarrhoea is always more or less prevalent during September. Be prepared for it. Chamberlain's Colic, Cholera and Diarrhoea Remedy is prompt and effectual. It can always be depended upon and is pleasant to take. For sale by all dealers.

Ancient Acts of Congress.

Statesville Landmark, Sept. 12th.

Mr. W. M. Weddington has shown the Concord Tribune a copy of the Congressional Record giving the acts of the Fifteenth Congress, in 1818. James Monroe was President, Daniel D. Tompkins Vice-President and Henry Clay Speaker of the House. One of the acts that was passed by this Congress is as follows:

Chapter 45. An act to regulate the pay of the army when employed on fatigue duty:

Section 1. Be it enacted by the Senate and House of Representatives of the United States of America, in Congress assembled, That, whenever it shall be found expedient to employ the army at work on fortifications, in surveys, in cutting roads, and other constant labor, of not less than ten days, the noncommissioned officers, musicians and privates, so employed, shall be allowed fifteen cents, and an extra gill of whiskey or spirits, each, per day, while so employed. (Approved, March 2, 1819.)

Among the post roads ordered established was one "from Statesville, by Campbell's Grove, to Morganton."

Where was Campbell's Grove?

Bloodine Cough Checker will quickly allay that hacking irritation accompanying a severe cough or cold. The safest and surest remedy for children. Keep a bottle constantly at hand. Leslie's Drug Store, Special Agents.

No matter whether the thermometer registers 105 above or 25 below zero, Amalgamated Arc Roofing can't be affected a particle.

No matter the curves or valleys of your roof—you need no tin to cover them, for Amalgamated Arc Roofing is very pliable. It is the Perfect Roofing, and the insurance rate is no higher than when slate or metal is used. We authorize our agents to refund the money if our tin is not perfectly satisfactory. Send for samples and full information. AMALGAMATED ROOFING CO. First Nat'l Bank Bldg. Birmingham, Ala.

Morganton Y. M. C. A.

The Morganton Y. M. C. A., which was organized the first of August, has now rented the hall over the post office and the work of equipping the same is now in progress. With just a mere handful to begin with the membership has now reached forty-six and we hope to get it up to 75 before long, and there are still a large number of young men about town that we want to get within our ranks. We extend herewith a cordial welcome to all the young men of this town to get in line and join us in this great work, which we are certain will prove beneficial and not wanting for good results. We hope before long to have the hall furnished in such a way that we can invite the public up to see for themselves the efforts being put forth to make the association attractive for young men. To do this requires a little ready money for the equipping of the hall, which will consist of a spacious reading-room, a well equipped gymnasium, shower baths, and dressing room, and we therefore through this column extend an earnest appeal to the good people of Morganton to help us in this our work, and we do so unhesitatingly, believing that you fully realize the need of this kind of an organization and that it is a great benefit to the town that a like institution is established, and a little financial help would be greatly appreciated just at this time. Also, if anyone has any furniture of any kind that they are not using themselves and which you think we could use, we would appreciate it very much if you would kindly report same to the committee on ways and means. Mail will reach them care of the Y. M. C. A. or same communications can be addressed to the president, F. T. Clarke. Your kind and careful consideration to the above will be greatly appreciated.

Yours truly,
X. H. COX.

AFTER 7 YEARS SUFFERING

I Was Cured by Lydia E. Pinkham's Vegetable Compound

Waurika, Okla.—"I had female troubles for seven years, was all run down, and so nervous I could not do anything. The doctors treated me for different things but did me no good. I got so bad that I could not sleep day or night. While in this condition I read of Lydia E. Pinkham's Vegetable Compound, and began its use and in a short time I had gained my average weight and am now strong and well."

Another Grateful Woman. Huntington, Mass.—"I was in a nervous, run down condition and for three years could find no help. I owe my present good health to Lydia E. Pinkham's Vegetable Compound and Blood Purifier which I believe saved my life. My doctor knows what helped me and does not say one word against it."

—MRS. MARI JANETTE BATES, Box 134, Huntington, Mass.

Because your case is a difficult one, do not continue to suffer without giving Lydia E. Pinkham's Vegetable Compound a trial. It surely has cured many cases of female ills, such as inflammation, ulceration, displacements, fibroid tumors, irregularities, periodic pains, backache, that bearing-down feeling, and nervous prostration.

ROUP!

No disease of Poultry is to be more dreaded than this disease, and this is just the season to be on the lookout. Hot days, cool nights, crowding the young stock, poor ventilation, drafts in poultry house are factors in bringing on roup. Try to avoid all these and keep your fowls healthy. If you should fail, however, and find some of your most promising youngsters sneezing and running at the nose, isolate them at once. It may be only a cold and can be cured quickly, but if neglected it will develop into roup.

Rust's Roup Pills and Rust's Soluble Roup Powders are splendid for this disease, also as a tonic and preventative.

Tell your poultry troubles to us. We have helped others. We can help you. Everything for the Poultryman.

FORNEY & COMPANY.

For illustrated catalogue, address

W. W. PEELE, Headmaster, Durham, N. C.

The Ware That Wears

Guaranteed 15 Years

It doesn't pay to buy cheap ware that soon peels, cracks, leaks, tarnishes, rusts, or wears out. Even at a lower cost such ware is the most expensive because it is dangerous to health and unreliable in service—doesn't last.

"1892" Pure Spun Aluminum Ware

is guaranteed for 15 years. There is practically no wear out to it and scientific investigation proves it the most sanitary cooking ware made. Particles can't chip off and cause chronic troubles nor spoil the food. Germs do not breed on its smooth surface and odors can not be absorbed by it.

You'll have better food and save trouble, time and fuel by using only "1892" Pure Spun Aluminum Ware. Look for trade mark on every piece.

FOR SALE BY

W. L. KIRKSEY.
