BAD BREATH

Is caused by indigestion, and that disorder brings on headaches, sallowness, languor, dizziness and a general discouraged feeling.

SIMMONS

RED Z

LIVER REGULATOR

(THE POWDER FORM)

Corrects All Disorders of the Stomach and Bowels

Its powerful, reviving and regulating influence in the liver and digestive organs brings an immediate improvement. You feel better. The bowels move freely so that the impurities that have clogged up the digestive tract find an outlet. When the system has been thus purified the bilious half-sick feeling disappears; the complexion improves, the breath becomes sweet, the mind throws off gloomy forebodings, and there is a fine feeling of energy and exhilaration all through the body.

Sold by Dealers

Price, Large Package, \$1.00

Ask for the genuine with the Red Z on the box. If you cannot get it, write to us, we will send it by mail, postpaid. Simmons Liver Regulator is put up in 10¢ and 25¢ boxes. Each box contains 10¢ or 25¢ worth of the powder. Write for the Red Z label.

Bargains in Real Estate in Virginia and Maryland, Near Washington City.

Write Me What You Want in Virginia or Maryland.

100 acres Loudon County, Va., \$14,000. Sixty acres in cultivation, balance in timber. Two miles to station, schools and churches. Farm all fenced and good streams on same. One acre in orchard eight or ten years old, mixed varieties, plenty of grapes and berries. Six room house and small barn.

400 acres Fairfax county, Va., \$14,000. One ten-room, one three-room house, one four-room house, one six-room house, one seven-room house. One store 20x30, one blacksmith shop, one mill house, four barns and numerous out buildings. Three large streams on property. One hundred and fifty cleared, of which eighty are bottom land, and which are not subject to overflow. Balance of farm is in timber and cord-wood. Timber estimated to be worth \$4,000. This farm fronts on electric railway and station is on property. There has been on this property 1000 trees, the majority of which are now dead. This would make an ideal dairy farm. Will make terms to suit right party.

Severe Hail Storm.

Covers Sections of Iredell, Gaston and Other North Carolina Counties, and York County, South Carolina.

Statesville Landmark, 10th.

Many farmers in Iredell who had been much discouraged over the crop outlook on account of the prolonged drought, and were just beginning to feel good over the fact that refreshing showers had come, are now sick at heart, and discouraged on account of serious damage to their crops—in some instances apparently almost complete destruction—by hail. Hail fell in large quantities over a considerable area of the county during the thunder storms Monday afternoon and evening and many of the farmers in the area affected claim their damage is at least 50 per cent and on a few farms there are patches of corn that are almost a complete loss. Portions of practically every township in the county were visited by the hail storms, and while all suffered, the damage was not great except in certain sections. Judging from reports the Dunlap and Crawford neighborhoods in Bethany and portions of Fallstown, Davidson and Coddle Creek suffered most.

Severe in Mooresville Section.

Mooresville Special, 7th, to Charlotte Observer.

A destructive and probably the heaviest rain and hailstorm that has visited this section in 30 years, came down yesterday afternoon and last night in three separate and distinct installments. Between 4 and 5 o'clock a storm passed over, scattering hail along a line from a short distance east of Mooresville to a distance of three miles west of town, doing considerable damage to foliage and growing crops. About 7 o'clock yesterday evening another storm came up, covering practically the same route, except extending from Catawba station on the Western road to a point near Derita, in Mecklenburg county. In some parts of this county west of town pine trees and other timbers have been totally stripped, corn fields have been shredded and the cotton stalks are sticking out of the ground completely stripped of their limbs. It is a great calamity to many of the croppers, who had little prospects for anything like a fair crop before and now they are in a great deal worse condition. At the Chal Cornelius place 19 window lights were knocked out, and at Frank Jones' there are 59 window panes shattered and some sections of the sash broken. On Bud Watts' place the roof was broken through in numerous places and his cows, when they were brought from the pasture after the first storm, bore marks of blood and bruises caused by the terrific force of the hailstones. It was said by many reliable men that hailstones as large as goose eggs fell, and B. A. Troutman this afternoon brought to town a water bucket full of hailstones, 20 hours after the storm, which averaged in weight two ounces each. Several of these stones were weighed and were the exact weight of an average hen's egg—two ounces. At H. D. Mills' place, where Charles Wilson lives, the crops and forests look as if a great battle had taken place, and at 3 o'clock this afternoon a wagon load of hailstones could have been gathered with all ease. At George Brown's, south of town, cotton and watermelon patches are stripped of foliage. Many of the farmers along the line of desolation were in town to-day looking for early corn, and will endeavor to raise late corn to help out this fall. About 8 o'clock still another hailstorm came up, but had spent itself before reaching this section and very little fell.

Cortright Metal Shingles.

Just now, at the height of the building season, we want to call the particular attention of our readers to the advertising of the Cortright Metal Roofing Co., Philadelphia, Pa., which has been appearing in our columns for several months, telling of the merits of the famous Cortright Metal Shingles. The Cortright Company advises us that the use of these goods has grown enormously all over the country and they can only attribute this constant growth to the splendid satisfaction the roofing is giving. We heartily recommend this company's product to any one desiring a perfectly weather-tight, fire-proof, ornamental and durable roof-covering at a moderate cost. The Morganton Hardware Co. handle these Metal Shingles locally and are always glad to quote prices and any other desired information concerning them.

Probable Duration of Sun.

Adopting the well-known hypothesis of Helmholtz, which attributes the production of the heat emitted by the sun to its contraction, an idea can be formed of the sun's duration. If one gives to the sun a coefficient of expansion intermediate between that of mercury and that of gas, one arrives at the conclusion that it has taken one million to three million years for the sun to contract to its present radius; in particular, it would have taken ten thousand years to contract from infinity to a radius twice its present radius. Finally, the sun will take 200,000,000 years to contract from its present radius to half that radius, and even then its temperature at the surface will be 3,000 degrees.—Scientific American.

Convention in Morganton Saturday Nominates B. F. Davis of Burke and D. F. Giles of McDowell.

A convention of the Democrats of the 34th Senatorial district, composed of the counties of Alexander, Caldwell, Burke and McDowell, was held in the Court House in Morganton last Saturday for the purpose of nominating two Senators to represent the district in the next General Assembly. The district chairman, Mr. C. M. McDowell, of Burke, called the convention to order and asked Mr. Edmund Jones, of Caldwell, to act as temporary chairman and C. E. Whitten, T. J. Robertson and T. G. Gobb as secretaries. The temporary chairman made a few encouraging remarks, and on a call of the counties the responses showed each county represented. On motion of Mr. J. F. Spainhour the temporary organization was made permanent.

Upon announcement by the chairman that nominations for Senators were in order, on a call

from hail was great. A section four miles wide, including Cherryville, Stanley, Hickory Grove, McAdenville, Belmont, Mayesworth, Bethesda, Newhope, was devastated. Crops were destroyed, roofs of houses damaged or blown off and window glass broken. At Stanley practically every house was damaged to some extent. At McAdenville many hundred window panes were broken in private residences and mills. At Cherryville the roofs of the Howel and Melville Mills were demolished. Poultry and even animals were killed by the hail, which is reported very large. Fifteen hours after the storm the ground was covered with hail in spots.

In the Ball's Creek section of Catawba county there was much damage.

Between Mt. Airy and White Plains, in Surry county, there was much damage from rain and hail and at two places wheat crops that had been gathered into barns were destroyed by lightning.

In some sections of Cleveland county the crops were riddled by the hail and fruit beaten from the trees. The hail is reported as large as hen eggs.

In South Carolina—Many Cattle Killed.

A report from Rock Hill indicates that the storm was more severe in sections of York county, S. C. Crops were beaten into the earth. A Rock Hill dispatch to the Charlotte Observer says: "Chickens and birds were killed in large numbers, and in drifts the hailstones reached an almost unbelievable depth. A half-acre flat on the Brown McFadden farm, 13 hours after the storm, was covered to a depth of four feet, while hundreds of people who went to see the sight report gullies in the same neighborhood to have been filled to a depth of from eight to fourteen feet. On the farm of R. S. Fellwell six of his cattle were killed and their bodies literally buried under the ice. Ten or twelve of John T. Roddey's cattle were killed."

A report from the Fort Mill section tells the same story of destruction. "At the farm of S. H. Hutchison," says the report, "the wings of chickens were cut off as they attempted to fly to places of refuge." The storm passed along the eastern border of York county for a distance of eight or ten miles and the area covered was three to five miles wide.

Builders of Roads

North Carolina Good Roads Association Adjourns Big Meeting at Durham.

Governors Have Control

Board Will Select Officers of the State Association—Many Bills Discussed.

Durham.—The North Carolina Good Roads Association adjourned after selecting officers for the coming year, all of the old men being retained in office, amending the by-laws of the association and hearing an address by W. C. Hammer, who told of the methods used in his county for interesting the farmers in the work of good roads. Probably the most important change in the constitution and by-laws was putting the association under a board of governors instead of having the business affairs of officers and directors of finances looked after by self-perpetuating board of governors.

The next meeting place was left to the executive committee.

Greenville won the prize for best attendance with Vance county second prize; Buncombe won the prize for the best exhibit of good roads pictures.

The presentation of a proposed bill for a state highway commission was the feature of the session of the good roads convention. The proposed law was presented by A. W. Graham of Oxford, following an address on this topic.

Mr. Graham discussed the functions of the proposed commission and said that it had been introduced and was working in a large proportion of the states
