Editor Clark, a Member of the Board, Gives Report of the Meeting-Number of Patients -New Water Supply.

The following report of the quarterly meeting of the State Hospital board of directors appeared in Friday's Statesville Landmark, Editor Clark being a member of the board:

At the regular quarterly meeting of the board of directors of the State Hospital at Morganton, Wednesday, the report of Supt. McCampbell showed that there were on the Hospital rolls June 1 last, 594 male and 810 female patients, a total of 1,-404. During the three months-June, July and August-52 men and 53 women were admitted, a total of 105. Discharge during the same period, 31-one man and 30 women. Deaths 20-9 men and 11 women. Remaining on the rolls August 31 1,458-636 men and 822 women.

The installation of an additional water supply, for which the last Legislature made an appropriation of \$60,000, is in progress. The ditch has been dug for the gravity line, a distance of about eight miles, and pipe is being laid. To protect the water supply several hundred acres comprising the water shed will be purchased. Negotiations for this land have been in progress and Supt. Mc-Campbell was instructed to close the deals. It is expected that the new water line will be completed in two to two and a half months and it is estimated that it will add a minimum of 400,000 to 500,000 gallons to the Hospital's water supply. The present supply of about 200,000 gallons has been adequate for some years and the addition is expected to provide ample water for the institution for many years.

Application was made for right of way through the lands of the Hospital for a railroad which it is proposed to build from Morganton in the direction of Shelby. The application was referred to the executive committee and the superintendent, with power to act.

The superintendent was instructed not to receive patients until application papers had been received and passed on and a permit issued for admission. In a few instances patients are taken to the Hospital without application papers having been filed or a permit issued for the admission of the patient. This embarrasses the superintendent, who must either refuse patients in such cases or take them without papers. If the latter course is pursued the practice of Arbor Day may be imbued upon is liable to be abused by those who desire the admission of patients and is unfair to those who await the regular procedure. Hence the instruction that the regulations must be complied with by applicants for admission.

The crop on the Hospital farm is unusually promising this year. The the thirteenth day of September, in farmer estimates that the corn crop the year of our Lord, one thousand will be over 3,000 bushels, but form- nine hundred and fifteen, and in the er members of the board think the estimate is modest; that the crop American Independence. will surpass that. In addition to the corn crop there will be a fine crop of feedstuff and the crops of vegetables, etc., have been good.

All the members of the board were present at the meeting except Mr. A. A. Shuford of Hickory, who had
