And if you are interested in Photographs it will probably be the most valuable. During January, February, March and April I will do all kinds of Studio Portrait Work in all sizes, regularly every day, from NOW UNTIL THE FIRST OF MAY.

After that time my Kodak finishing business requires all my time and attention, and there is no use to ask about having portraits made after the first of May.

The mountings and styles used will be of the heavy substantial type of photographs which will stand time and handling and look as well ten years from now as when made.

My Photographs don't fade and as proof of this look up photographs made by me ten or twelve years ago, which will be found in every home and you can see for yourself how well they have stood the test.

During the past few years many photographers throughout the country have put out thin, flimsily mounted photographs or not mounted at all, taking advantage of what was supposedly the style until there are thousands of worthless, warped out of shape, curled up photographs, many of which have to be kept under a book or weight to keep them from rolling up, to be found everywhere, which in a few years at best will be worthless pieces of fuzzy paper and a disappointment to the owner, whereas a brilliant, clear cut photograph substantially mounted will prove in the end far more valuable.

The photographs put out by me during the months mentioned above will be finished and mounted with the view of standing the test of all time. They will be finished on the clear, brilliant surface paper bringing out all the details and mounted on substantial mounts, and the prices will be reasonable, and as some people do not care for the large sizes and do not care to put very much money in photographs, I have arranged a series of sizes and styles to suit everybody, ranging from \$1.25 per dozen to \$5.00 per dozen, and will make no extra charge for groups, and by comparison you will find my \$3.00, \$4.00 and \$5.00 per dozen photographs will be as high or higher quality than photographs generally selling at \$5.00 to \$8.00 per dozen and it is easy enough to see if this claim is true by comparing the work. That's what I want to do.

All photographs will be finished in the permanent, fadeless black and white finish, so do not ask for brown finishes, and it has been proven that a black and white photograph is the only permanent kind.

To make brown pictures they have to be finished black and white and then bleached and retone in a hot chemical bath, and this bleaching and heating destroys the chemical base of the picture, softens the gelatin emulsion and weakens the fibre of the paper to an extent that is fatal to the permanence of the picture—and a picture that must eventually fade is worthless.

Consequently the photographers all over the country have come back to the black and white picture as the process which holds its own.

I have always contended that this bleaching and retone a photograph to get various shades was ruinous to the keeping qualities of the photograph and have believed it to the extent of refusing to put out any but the black and white. So I am not surprised that photographers have found this out and are flocking back to the permanent color—black and white.

Remember, Studio Portrait Work any day during January, February, March and April; after that other work requires all my time

Bad Habits.

Those who breakfast at eight o'clock or later, lunch at twelve and have dinner at six are almost certain to be troubled with indigestion. They do not allow time for one meal to digest before taking another. Not less than five hours should elapse between meals. If you are troubled with indigestion correct your habits and take Chamberlain's Tablets, and you may reasonably hope for a quick recovery. These tablets strengthen the stomach and enable it to perform its functions naturally. Obtainable everywhere.

OPTICAL EFFICIENCY

There is a clause in the North Carolina optical law under which men who had used a trial case years prior to its enactment were allowed to continue without passing a regular State Board examination. Being interested and licensed under this clause is no guarantee of a man's skill or efficiency.

I began optical work right after this law became effective in 1909, therefore was compelled to prepare myself in an optical college of good standing (not an imaginary college with paid degrees) to pass a very high State Board, there being no higher grade examination. I being the tenth man to pass the board.
