

**\$12,000 MUSICAL PROGRAM FOR MADE-IN-CAROLINAS EXPOSITION**

**N. Y. Concert Band, Eight Soloists of National Note, Two Violinists of International Fame and Mixed Quartet Booked; Both Carolinas Governors Be Present**

The Made-in-Carolinas Exposition, which opens in Charlotte September 12 and runs through the 29th, is an assured success on a tremendous scale, according to officials of the Carolinas Exposition company.

From the standpoint of diversity of exhibits the exposition will be by far the largest ever held in the South, and will represent manufactured displays from factories all the way from Charleston to the Tennessee State line, and from Wilmington to Reidsville, it is declared.

The first large building of brick and steel and concrete construction is nearing completion. It has a total floor space of 40,000 feet, about 24,000 of which is being sold for manufactured displays. Up to Saturday night, 22,000 feet of this amount had been sold or optioned, and the directors of the Carolinas Exposition company are hoping to close up all options and all remaining space in this building this week, and then begin preparations for the immediate construction of another large adjoining building of steel and wood and concrete.

Requests for space have come in from all over the Carolinas, and the show promises to be a wonderful educational revelation.

David Owens has returned from New York where he has concluded arrangements for a \$1,200 musical program which is declared without question the best musical organization ever appearing before a Southern show or exposition. This program will embrace the New York concert band—one of the few large American bands which is always intact and which is made up of individual artists of the highest order. The patrons of this band are such men as the Guggenheims, John D. Rockefeller and others. There will be 31 pieces, and the members of this band were carefully selected from such organizations as Damrosch's orchestra, Sousa's band and others. In addition to this band, eight soloists of national note, two violinists of international reputation, and one mixed quartet of Metropolitan opera calibre have been contracted for.

In addition to this program the directors are considering the matter of spending several thousand dollars in addition in arranging other musical features, among which will probably be \$500 in gold offered for the best Carolina band competing in a contest between bands of the different towns of the Carolinas.

**Governors to Attend**  
Governors Morrison and Cooper have accepted the invitation to be present at the opening of the exposition and deliver the addresses. A high government official has been invited, and announcement will probably be made soon. Among other notable figures who will be on the program are: Dr. E. C. Brooks, N. C. State Superintendent of Public Instruction; Dr. D. B. Johnson, president of Winthrop college, and others.

With the presence in Charlotte during the exposition of the eighty-first division with 6,000 men, the convention of the Southern Textile association, the first convention of the N. C. Manufacturers association and other similar assemblages, the attendance at the exposition will run far over 100,000 in the opinion of the officials.

The housing committee will shortly begin its work of providing every comfort and convenience for the thousands who will visit the exposition during the two weeks.

Railroads are being urged to make special rates so that school children all over the States may attend and study the exposition.

J. F. Hurley, president of the North Carolina Press association, sends out a bulletin to all members as follows:

"I cannot refrain from mentioning the industrial exposition to be held in Charlotte this fall and to urge all newspaper men to boost this to the limit. It is a wonderfully fine thing, we ought to support it, and we ought to attend it as well. If we want to see and to know North Carolina, this showing of North Carolina goods ought to be an inspiration to us."

**STATE COLLEGE AD.**

The advertisement of the North Carolina State College of Agriculture and Engineering appears in this issue. This growing technical college is doing a fine work for young men who expect to be farmers, chemists, engineers, textile manufacturers, or scientific workers in any of these lines. Read the advertisement and write to the college for fuller information if you are interested in technical education for yourself, your son, or any of your young friends.

**ADVERTISE CONVICTIONS**

Printer's Ink.  
There is scarcely any portion of the daily newspapers more eagerly scanned these days than the containing news of plants reopening. And such news is of course legitimate and interesting. Yet Julius H. Barnes, president of the Klearflax Linen Rug Co., purchased full-page advertising space to tell the public his action in going back to full-time production.

**Suffered Intense Pain.**

"A few years ago when visiting relatives in Michigan something I had eaten brought on an attack of cholera morbus," writes Mrs. Celesta McVicker, Macon, Mo. "I suffered intense pain and had to go to bed. I got a bottle of Chamberlain's Colic and Diarrhoea Remedy and one dose relieved the pain wonderfully. I only took two or three doses but they did the work."—Adv.

**SUNDAY SCHOOL LESSON**

**JULY 10TH**

**"Saul the Pharisee."**

Golden Text: Christ came into the world to save sinners; of whom I am chief.

Text of the Lesson: Acts 7: 54 to 8:3; 22, 3, 4; 26:4, 5, 9, 10. Also the 6th and 7th chapters of Acts should be read.

This lesson should give us, not a few loosely connected facts about Saul the Pharisee, but rather a series of vivid pictures.

The first of these is that of the deacon, Stephen, a man "full of faith and the Holy Spirit," who "wrought great wonders and signs among the people."

So great was his power that opposition arose, and members of certain synagogues—notably the synagogue of the Cilicians—disputed with him. As Saul was a Cilician, we may well believe that he took part in these arguments.

Stephen could not be answered (Acts 6:10; Matt. 10:19) but he could be silenced, and we see him before the Sanhedrim, the highest court of the Jews where false witnesses declared that he was guilty of blasphemy. Dr. Myer says that Stephen's defense is "the first attempt to read the story of God's dealing with Israel in the light of Christ; the earliest commentary on the Old Testament by the New;" but it had no effect. Stephen was condemned to death. Saul "was consenting"—that is he probably cast a vote in the Sanhedrim against Stephen. Acts 26:10 and 22:20.

This lesson contains, also, two other pictures:  
I. Stephen's Death. When the witnesses who cast the first stone at Stephen were stripping for their work, they laid down their garments at Saul's feet. There, on the margin of that wild scene—we see his figure, standing a little apart—the pile of many-colored robes at his feet, and his eyes bent upon the holy martyr who is kneeling—and praying—"Lord, lay not this sin to their charge." (Dr. James Stalker.)

II. Saul's Persecution of the Christians. We quote again from Dr. Stalker: "Terrible were the scenes which ensued. Saul flew from synagogue to synagogue, from house to house, dragging forth men and women, who were cast into prison and punished. Some appear to have been put to death and—darkest trait of all—others were compelled to blaspheme in the name of the Saviour."

There is a practical question and a practical personal application to be found in our lesson. The question comes first:  
What was the cause of Saul's sin; where did he go astray?  
We will all agree that it was not in his desire or aim; he certainly had a singleness of desire: to find favor in the sight of Jehovah and to find personal righteousness.

Now Saul should have known how these things may be found. We learned last Sabbath how thorough was the training of the Jewish child in the Old Testament Scriptures—how he memorized great portions of it, first at home, later at the synagogue school. And Saul had, in addition, the training in the rabbinical college at Jerusalem under Gaetulio who is still remembered among the Jews as the Great Rabbi. Over and over he had heard and had read Jeremiah's great confession: "O Jehovah, I know that the way of man is not in himself; it is not in man that walketh to direct his steps." And we find Saul's sin in his choosing his own way—the way laid down by the Scribes and Pharisees—the way of self-righteousness (Matt. 23:16-23).

It was for people of all time, as Saul should have known, that Isaiah had declared: "What unto me is the multitude of your sacrifices," saith Jehovah: "I have had enough of the burnt-offerings of rams—your new moons and your appointed feasts, my soul hateth," and "Is not this the fast that I have chosen, to lose the bonds of wickedness. . . . Is it not to deal thy bread to the hungry? and that thou bring the poor that are cast out to thy house?"

Yet Saul trusted in the fact that "After the straightest sect of our religion, I lived a Pharisee."  
Surely as he rushed madly from city to city persecuting the Christians he had forgotten, too, Micah's instructions: "He hath showed thee, O man, what is good; and what doth Jehovah require of thee but to do justly, and to love kindness and to walk humbly with thy God."

Personal Application: There is a way that seemeth right to a man but the end thereof are the ways of death. Prov. 16:25.  
Search me, O God, and know my heart:  
Try me and know my thoughts:  
And see if there be any wicked way in me  
And lead me in the way everlasting. Psalms 139:23-24.

**LENOIR WANTS TO ARRANGE TOURNAMENT**

The following letter is self-explanatory:  
"Dear Miss Cobb:  
"We are trying to arrange match games of tennis with our neighboring towns and we want to know if Morganton has a team and will join in with us. We hope if we can get the different towns to take part in it, to have an all-day tournament here sometime during the latter part of the summer. We are going to have a local tournament, and we want to also have a match tournament. If you will kindly hand this letter to some of your tennis players, or will take it up with them, and let me hear regarding same, I will appreciate it very much.  
"Yours very truly,  
"LENOIR TENNIS CLUB,  
"May Puett, President."

There are a number of tennis players in Morganton and The News-Herald takes this means of passing on to them Miss Puett's suggestion. If they are interested they might notify us or communicate with her direct.

**WATER POWER ALMOST CERTAIN TO COME BACK**

**White Coal is Cheaper Than Black Coal, Says Commerce and Finance**

An interesting article from a recent issue of Commerce and Finance is herewith reproduced:

One of the inevitable results of the high price of coal will be the development of hydro-electric energy wherever the opportunity is good in the United States. There are hundreds of spots in the east where water power was utilized in former days but where the water wheel was abandoned because coal was so cheap that it no longer was profitable to employ the power of the streams. Now the conditions have changed and once more water power is almost certain to "come back," particularly in sections of the country where it is possible to impound considerable quantities of water without great cost and where it does not freeze so hard in winter as to cause a suspension of operations.

In France the government is engaged on various projects for the utilization of tidal waters in streams where the rise and fall is very great. In one of the rivers where the tidal rise is more than 20 feet, it is proposed to generate power on both the inflow and the outflow and supply light, heat and energy for a large territory thereabout.

There is no such tide in this country. In the Gulf of Mexico the tide is inconsequential, ranging from 18 to 24 inches. In New York it is about six feet. On the Main coast it is about eight feet.

Up in Canada the Atlantic tide is something to talk about, particularly in the Bay of Fundy. There the tide is about 40 feet and that region boasts of one of the wonders of the world in a reversible waterfall, the waters tumbling over one side of a rocky obstruction as the tide comes in and over the other side as the tide goes out.

Hydro-electric engineers are in more demand these days than they have been for years and more serious attention is being given to water projects than ever before. Before long the investing public is likely to have a lot of literature from bankers specializing in this department of enterprise and investment.

Water power projects require a lot of money. One deterrent is that the investment is total before there is any return. On the other hand, there is little expense for upkeep once the work is done. Nature doesn't charge anything for the work it does and rarely, if ever, strikes.

**WHEAT - HEARTS—Delicious and Nourishing.**

**16. OUNCES OF PREVENTION!**

Forget forever the "pound of cure." Let Dalys Tonic, in the big 16-ounce bottle, keep your nerves, blood and stomach in top-notch condition all the time.

Feel your strength grow. Watch your endurance and vitality increase. Acquire "The Daily Habit." Let the tremendous curative and health-building properties of this tonic keep you freed from the menace of colds, coughs and stomach and nerve disorders. A compound of Malt, Wild Cherries, Cod Liver, Hyphosphites and Wine, Dalys is pleasant to take—and even more pleasant are the benefits it's sure to bring.

Many have told us they possessed only half the strength and health that was rightfully theirs till they took Dalys Tonic.

You cannot, in justice to yourself, pass by this opportunity to build up your health and gain strength.

Buy a bottle of Dalys Tonic today. Sold at Kibler Drug Company.
