

GENERAL PERSHING WILL ATTEND FAIR

Big Plans On Foot For the State Fair This Year; "Military Day" Will Be Occasion of Pershing's Visit

Definite announcement that General John J. Pershing, commander of the American Expeditionary Forces during the world war, will attend the North Carolina State Fair on Wednesday, October 18, has been made public by Mrs. Edith Vanderbilt, president of the fair.

The announcement, which was contained in a telegram from Mrs. Vanderbilt to Col. Albert L. Cox, of Raleigh, served to stimulate plans for making Wednesday "Military Day" at the fair and it is now expected that Wednesday will overshadow Thursday, which is usually the "Big Day" at the fair. In order to do honor to America's greatest war hero who will make his first visit to the State capitol on the occasion of the fair, posts of the American Legion throughout the State will be asked to send representatives to the fair and units of the State's national guard and a detachment of troops from Camp Bragg are also expected to be on hand.

Arrangements for "Military Day" are in the hands of Colonel Cox and details have not yet been worked out. It is probable, however, that the program will include a speech by the General in the forenoon and some social function in his honor in the evening.

While the visit of General Pershing will cause attention to be concentrated on Wednesday, special plans are being made for each of the other big days of the fair. Tuesday will be "Breeders' Day." All of the livestock exhibits will be on display and judging will begin in all departments on Tuesday. Breeders from other States as well as North Carolina will be on hand to see the Battle of the Breeds.

Following "Military Day" on Wednesday, "College and Football Day" will be observed on Thursday. The annual gridiron classic between the University of North Carolina and the North Carolina State College will attract thousands of visitors to Raleigh, all of whom want to take in the fair in the morning and the evening. Right of way will be given the football game in the afternoon but special arrangements will be made to take care of the collegians before and after the game.

"Mothers', Children's and Flower Day" will be observed on Friday, the last day of the fair. Children will be privileged visitors during the day and every visitor to the grounds will be presented with a flower, dogwood blossoms having been designated for that purpose.

KNOW NORTH CAROLINA

Bion H. Butler. A glance at the map tells about the whole story of Nature's conspiracy to make North Carolina great. Seacoast at one end that provides ocean transportation to ports of the world, short rail carriers to the centers of population. Mild climate in summer and winter, which makes a good agricultural section and a desirable place to live in.

High mountains in the west. These shelter the State from the blizzards of the west and also affect the rainfall giving an abundance all over the State. Liberal rain falling on the high altitudes affords vast water-power, as the streams carry the water downward to the sea. From the mountain summits to the fall line is a long distance, giving a big drainage area, consequently a big volume of water to drop to the sea, as well as a big drop. So North Carolina has a great electrical possibility.

Soil and climate conditions make easy the production of crops like cotton, tobacco and timber that are the raw materials for mills and factories driven by electric power, and the State annually renews both its raw material and its power. While other States use up their iron ore and glass sand, and their coal and their gas fuel North Carolina goes ahead making its constant resources, and it is the one State of the Union that has its manufacturing plants based on a permanent source of power and material.

Here is an agreeable section in which to live. People from everywhere come to North Carolina for recreation and holiday. Here is a section in which industry is encouraged by an abundance of the things needed for many times the population we have. Here is a section from which products can be carried away on sea or land. We have no mountains to cross to get to sea, or to the big buying markets of the North and East—which means, to the bulk of the people of our own country and the bulk of the people of the world. No man lives who will see the day when North Carolina does not have ample power for all its industries, ample raw material to supply them, or ample agricultural products for its people. This is one State that cannot squander its assets nor exhaust them. No other one quite like it exists. That is Nature's conspiracy to make North Carolina great.

CURTIS-FLEMING.

Reported For The News-Herald. A wedding of much interest to their many friends was solemnized Tuesday evening, September 12th, at the home of Mr. and Mrs. W. E. Wolfe, Elizabethton, Tenn., when Miss Jean Curtis of Wilbur, Tenn., became the bride of Mr. A. N. (Jack) Fleming, of Morganton, N. C. The simple ceremony was performed by the Rev. J. W. Broyles, pastor of the M. E. church, Elizabethton, and witnessed by a few relatives and friends of the couple.

Miss Curtis is the charming daughter of Mr. and Mrs. John L. Curtis, of Wilbur, Tenn. Mr. Curtis is superintendent of the Watauga Light and Power Company of that place. Miss Curtis is very prominent among the younger set of that section, and wore a brown suit with accessories to match. Mr. Fleming is the elder son of Mr. and Mrs. John A. Fleming of Table Rock.

The party motored to Morganton where an elaborate feast was served by the grandmother of the groom, Mrs. Sarah Fleming. The couple will visit relatives near Table Rock, after which they will make their home here. Mr. Fleming was accompanied to Elizabethton by his sister, Miss Belle Fleming, of Morganton. We all wish them much happiness.

TONGUE TWISTERS

Exchange. Do you want some very good tongue exercise? You can get it by reading, or attempting to read, rapidly, the following sentences. For those who may live in future life to read or speak in public, there is more in such exercise than mere fun:

Six little thistle sticks.
Flesh of freshly fried fish.
Two toads, totally tired, tried to trot to Tedbury.

The sea ceaseth, but sufficeth us.
Give Grimes Jim's great gilt gig whip.

Strict, strong Stephen Stringer snared slickly six sickly silky snakes.
She stood at the door of Mrs. Smith's fish-sauce shop, welcoming him in.

Swan swam over the sea; swim, swan, swum, swan.

A haddock, a haddock, a black spotted haddock, a black spot on the black back of the black haddock.

Susan shineth shoes and socks, socks and shoes shineth Susan; she ceaseth shining shoes and socks, for socks and shoes shock Susan.

You know the tongue-twister Peter Piper, but there are others which are harder. One of the worst is "Mixed biscuits." Try saying that rapidly, and if you succeed, say this: "Stop at the shop at the top of the Sloane street."

Then try saying over and over again, just as fast as you can: "Six slender saplings," and see if your tongue does not get nicely twisted.

Some people contend that it is extremely difficult to say even such a simple thing as "Troy boat" fast, and many times without getting the words mixed.

Extravagant Son—Of course I keep a running account at my tailor's.

Irate Father—Running account? He tells me it has been standing for eighteen months.

MISS TAYLOR WILL BE FIELD AGENT IN DRAMA

Morganton Girl Who Achieved Renown With Carolina Play-makers Goes to University

The following announcement from Chapel Hill will be read with interest by friends here:

Miss Elizabeth Taylor of Morganton has returned to the University to be the field agent of the Extension Division's bureau of Community Drama. She is fresh from the studies in News York at the Inter-Theatre Art school, and during part of the summer she was dramatic director at the summer camp of the Henry Street Settlement at Peekskill, N. Y.

Not only at the University, but at a number of towns in the State, Miss Taylor achieved renown two or three years ago through her acting with the Carolina Playmakers. Perhaps her most notable work was her impersonation of Gumba, the mother of the Lowries, in Paul Greene's play, "The Last of the Lowries." She also played the parts of Theodosia Burr in "Off Nag's Head," and Mag, the tenant farmer's wife, in "Peggy."

The New York magazine The Survey, published an article on The Carolina Playmakers recently, and the chief illustration was a picture of Miss Taylor in "The Last of the Lowries."

As field agent she will go about the State to aid communities in putting on plays and pageants. Her services will be available without the payment of fees. She will assist in the organization of dramatic groups, the selection of plays, the construction of stages, scene painting, costuming and make-up, and she will help direct rehearsals.

"My husband is merely a manufacturer of waste baskets," sighed the woman with aspirations. "It seems such a prosy occupation."

"On the contrary there is really much poetry in waste baskets," replied the unappreciated bard.

HOLLYBROOK LAKE

Open from 8 a. m. to 10 p. m.
Suits and towels furnished, per hour 25c.
Parties furnishing suits and towels 15c.
Children 10c.

Parents will accompany children. No swimming on Sunday. No charge for picnics.

Secretary to the Corporation.

Hay Making Simplified With Standard Fordson Equipment

YOU cannot afford to lose time in the haying season. There are few sections where the weather at haying time is always ideal. That is the one time of year when speed is the essence of good farming. It is no uncommon happening for some farmers to lose several tons of hay by a delay in getting it off the ground.

This work is now speeded up by using the Fordson with the RODERICK LEAN CUTMORE MOWER. The CUTMORE is attached direct to the tractor between the front and rear wheels in the position where the driver can have perfect control over it. The power is taken from the worm gear that drives the rear wheels, so it is always even and dependable.

The CUTMORE makes hay cutting with the Fordson a one-man job. There is ample power for cutting the heaviest crops, including alfalfa, clover, vetch, velvet beans, pea hay and lespedeza.

The cutter bar may be disconnected in a few minutes, so that the tractor may be used for other work. The draw bar is always available for pulling a wagon, rake or other tool. Attached to your Fordson, the CUTMORE means greater speed and economy of handling your hay crop.

BURKE GARAGE CO.

If you want to save all you raise, equip your farm with STANDARD FORDSON EQUIPMENT.

"I knew him when he was a boy"

What one is there of us that has not felt the glow of satisfaction, over the outstanding success of a life-long friend! Often a surprise—seemingly "all of a sudden." Yet neither surprising nor sudden, when you stop to think back over each step of his progress.

THE United States Rubber Company—makers of U. S. Royal Cords—were first to conceive, make and announce the balanced tire. A tire in which there is such complete unity of action in tread and carcass that neither will give way before the other.

First to conceive, make and announce a complete line of tires—a tire for every need of price and use under one standard of quality.

First to tell the public about the good and bad in tire-retailing. (You remember the phrase "Go to a legitimate dealer and get a legitimate tire.")

First also to arouse industrial and trade minds to the need of a new kind of tire competition. (Competition for better and better values. Greater and greater public confidence.)

THESE high spots along the U. S. road to leadership indicate the intent—the will to win by the quality route in a price market.

Now that so many car-owners have given their verdict for quality tires in general, and U. S. Tires in particular—a number of dealers and car-owners whose vision has been clouded by "discounts," "sales" and what not, are beginning to remember that they "knew him when he was a boy."
