RUSSIAN TRENCH OUTSIDE VILNA

This photograph, taken immediately after the capture of Vilna by the Germans, shows part of one of the outside trenches where the Russians put up a desperate resistance

Yankee Has Exciting Time in waters and placed on patrol duty in British Navy.

Serves in Trenches and on Battleships, Captured by Germans and Escapes-Brought Home by Uncle Sam.

Yonkers, N. Y .- Wilfrid Doyle, the ineteen-year-old son of Mr. and Mrs. Edward Doyle of 156 Valentine lane, this city, is back at his home here after seven months of adventure of the kind that most boys dream about but never experience. He has fought the Turk in trenches knee deep in water at the Dardanelles, he has been cap-tured by the Germans in Belgium and he has stood watch many nights on the deck of the superdreadnaught Queen Elizabeth while she patrolled the North sea enforcing the blockade against Germany.

The spring fever wearled young Doyle of the simple pleasures of life in Yonkers and he ran away from home. He made his way to Boston. where he obtained a place as horse hostler on one of the transports engaged in carrying horses to the war sone. In Liverpool he left his ship and enlisted in the British navy. He had little trouble in getting into the service, although an alien. He told the recruiting officer that he was an Irish boy, and so he is, as his name proves. His enlistment was for the duration of the war, but after six months of effort the state department of the United States plucked him from the service of King George at the behest of his parents. A postal card he wrote to his mother directly after landing in Liver-pool supplied the clue that led to his discovery.

Gallipoli, Doyle says, is now a sham bles and a ruin in the area over which the Turks have been slowly driven back by the allies. Not so much as a drop of clean water may be obtained there. The streams and wells have been polluted by bodies and blood. Dovle arrived at the Dardanelles in May, soon after the attack on the Turks had begun. During one period of heavy pressure he served for 48 hours on land in the third fine of trenches. The men of the allied forces suffered fearfully, he says, at that time from the rains that flooded the trenches and the intense heat that made life almost unbearable.

While on this expedition Doyle saw a Turkish girl sniper captured. A group of sailors relieved from trench

the North sea. While his ship was be-ing overhauled Doyle served for a time on the battleship Drake. During this period, with 50 others, he was the map. He lights a cigarette and captured on the Belgian coast. The again mounts his high chair in front small landing party was surrounded by a large number of Germans. They were captured and marched a mile inland to a barbed wire stockade. That night 20 of them, including Doyle, escaped.

NEEDED			SIX-FOOT		SHOCKERS		
Man			linary		Would	Be	of

Use on This Kansas Cornfield.

Hiawatha, Kan .- The tallest corn of this year's crop that has been brought to town so far comes from the farm of Bert Wise, near Reserve. Wise has brought several stalks to town on which the lowes: ear is eight feet

from the ground. . . People of the community at first thought Wise was joking when he advertised for corn shockers who n-ust be at least six feet in height, out those who have seen his crop declare that a man of ordinary size will by of little value 'n helping take care of Wise's crop, as the stalks are all so high that the ears are six, seven and eight feet from the ground.

THE HERTFORD COUNTY HERALD

nteresting Description of Artillery Work on Battle Line-Battery Has Unique Record on Several Different Fronts.

THEIR WORK ENDED

Berlig.-A picture of a battery which aas fought in several different battle fronts is given by a writer inh the Vossische Zeitung. He says: "Our position on the plateau had been furiously bombarded through the

night by the Italian artillery. We were able to locate most of the bat-teries, but there was one which kept up an incessant fire until dawn, which eatly puzzled us. "The sun was rising behind the mist

in the Adriatic, which we could plainly see from our elevation. I had just been awakened by a tremendous roar, wrapped my blanket about me and came forth to see what it all meant. Captain Laytos was already peering through his telescope. His high coat collar was turned up to protect his throat and ears from the cold, and his hands were buried deep in his pock ets. Captain Laytos is a Hungarian artillery man, thirty years of age; has been twice wounded, and has just been granted a six-weeks' leave, but he refuses to leave his battery. He is

an ideal soldier, his chest is covered with decorations and he now commands the battery. "He comes down from his position

at the telescope and carefully studies the map. He lights a cigarette and of the telescope. He calls Prentelli, who knows the location of every stone within a radius of twenty kilometers and asks about the house. It stands about one hundred meters to the left, near the cross roads, and was paint-

ed white a few months ago. 'Look through the glass and tell me if you see anything strange about it.' said the cantain.

"It is not all white; here and there it is marked by what appear like dark spots.

'Precisely,' said the captain. 'That is where this battery is located. The Italians have placed their guns in the rooms of that house. But we'll fix them." "Captain Layton and Lieutenant

Wohler study the map, figuring out the distance. The elevation and angle are given over the telescope wire. The captain hands me a cigar. "'You have time to light a cigar.'

he says, 'before we fire. We shall fire in thirty-five seconds. Take a look through the glass and see the result." "Captain Laytos takes out his watch

and begins to count the seconds as I look through the telescope. I see the white house bathed in the morning sunshine, and I see also on the road leading to it a wagon creeping along. I feel like crying out to the wagon party to get under cover, and almost simultaneously I hope that our shells will get them. The captain is at his post looking through the telescope next to mine. I hear the order given to fire and at once there is a roar that shakes the whole mountain.

"'We have hit the mark!' shouts the captain. "Almost a minute elapses before

the smoke disappears. I look again through the glass. The white house is gone; all I can see is a hole in the earth where it stood and the bare trunks of a few trees still standing. 'That was good work,' said the captain, handing me a cigarette. 'It was the 1,200th shot of Our Richard, as we call this battery, so named after Lieut. Richard Karner, who fell in bat-tle a few weeks ago. This same battery was at Liege, at Antwerp, in France and I don't know where else. Ask Bauer.'

Cameron house, in Washington, sometimes called the "little White House," because so many famous people have occupied it, which has been rented by the Congressional Union for Equal Suffrage as its headquarters for the great suffrage rally to be held in Washington beginning the day congress convenes and lasting for a week or more. This house is just across Lafayette square from the White House. The "little White House" will be the scene of many conferences, mass meetings and social functions during suffrage week, and Mrs. O. H. P. Belmont of New York, whose portrait is inserted, has already arranged to hold a big reception there on the even in a of the day that congress convenes ning of the day that congress convenes

This is the first photograph to reach America showing the arrival of the allied expeditionary force at Sa loniki for the relief of the Serbians. The boats loaded with British soldiers are about to be towed ashore.

duty were standing near a haystack. One of them playfully thrust his bay onet into the hay. When he drew it out it was covered with blood. The sailors immediately tore the stack apart and discovered a young girl armed with a rifle in a hollowed space. She had been on her knees at a loop-hole when the bayonet point caught her in the arm. Beside her was found a supply of food and 35 identification disks of the kind worn by all sailors and soldiers in Britain's service. It was the belief of her captors that she had killed' that many soldiers in the trenches within range and had then stolen out and cut their identification disks from their necks. Doyle returned to his ship soon after the girl was captured and he did not learn of

her fate. On board the Queen Elizabeth Dovle met Corporal Joseph Nicolson, the only survivor of a regiment of Royal Scots which was annihilated on April 28. After leaving a transport the soldiers were taken to the fighting front on board the Queen Elizabeth, An hour after arriving, at two o'clock in the afternoon, the regiment charged.

it was not properly supported and was annihilated. At five o'clock that afternoon a survivor crawled back into the trenches. He died later on the way to England, at Maita. Nicolson was found wounded 14 hours later. He was sent aboard the Queen Elizabeth for became very friendly. As soon as he and sufficiently recovered he was sent back to England

In July the Queen Elizabeth, with others of the newer English / battleships, was withdrawn from Turkish the sparkler down.

"And later, when the enemy ceased their firing, I sat down with Bauer, who was in Belgium, France, Poland Galicia, Serbia, and is now here on the Italian front and had him tell me

the story of Our Richard."

RECORD CATCH OF WALRUS

1,353 Are Landed In Five Montha Cruise of the Steamer Corwin in the Arctic.

Sattle, Wash .- A catch of 1,353 walrus, the largest ever made in one sea on, was reported by Capt. O. A. Annevik of the steamer Corwin, which returned from a five months' cruise in the Arctic. The Corwin made two trips, using Nome, Alaska, as her base On the first trip she bagged \$37 walrus, which were discharged into the freighter Latouche at Nome and sent to Seattle. On the second expedition the crew of 20 skilled Eskimos killed 516 walrus, from which were obtained 100 tons of hides, 4,000 pounds of ivory and 165 barrels of oil.

Possum in Hen Nest.

Dawson, Ga.-A few mornings ago when Mrs. Fred L. Lasseter was makpurpose of gathering up the eggs she was startled to find a good size oppossum curled up in one of the nests as ight was his home. Mrs. Lasseter promptly placed Mr. Opossum in captivity.

Man Loses His Pet Goose.

Junction City, Kan.-Ed Bicken-hauser, a barber, is mourning the death of his pet wild goose, which is years ago he caught while on a hunting trip. The goose was a reliable weather prophet as well as a watchman. No stranger could enter the Bickenhauser yard without having his presence made known. In addition, the goose was an exceptional decoy. His honkfns brought wild geese within shooting distance on many hunting trips

one of the men comfortably incased. The upper photograph shows how the bags are examined and folded before shipment. Urgent calls for more and more of such bags are made in England.

BEING INOCULATED AGAINST TYPHUS

The Austrian army is up to date in methods adopted to prevent disease. Surgeons are here seen inoculating soldiers against typhus, which has been epidemic in Serbia and parts of Austria.

ITEMS GATHERED UP

Young titmice are so greedy that their parents sometimes provide them with no less than 6,000 caterpillars a

day. English electricians have developed a thoroughly waterproof telephone cable that weighs only seven pounds to the mile.

For refrigeration purposes a Call-fornian has invented machinery that pumps warm air out of a freight can and replaces it with cold.
