Whipping the overloaded team is a poor way of trying to overcome the faults of a bad road.

A good road enables the lazy farmer to loaf longer at the village store, and it enables it possible for the thrifty farmer to go back and get another loaf.

There is a presidential campaign going on in Ohio, and probably the Columbian senators thought it would not be advisable to pass the treaty just preceding a presidential election.

Fifteen hundred Republican orators have been invited to take part in the Ohio campaign. Senator Hanna seems to feel that reinforcements are necessary to defeat Tom Johnson.

There will be no more intoxicating liquor sold at the National Capitol. The bill prohibiting it slipped through the Senate last week, and the President was not considered enough to veto it.

The man that will wreck a team and destroy human life is a man "sniff," but he is not half as mean as the man or woman that will try to undermine and destroy a person's character or good name.

Secretaries, S. W. Wilson and Moody, Speaker, C. C. Cannon, and a half dozen prominent Republican senators are among those who will help Senator Hanna in the Ohio campaign. It looks as if the Republicans of the State had turned in a general alarm.

Not Because of Actual Wrongs.

If the time ever comes when "there will be an inurrection and blood will run in the streets and torches put to our homes" by negroes, it will not be because of actual wrongs done them by that white race, but by reason of passions aroused at imaginary wrongs and inflamed by such utterances as these above quoted from the Rev. Mr. Mason's address from the pulpit to his congregation.

Ridiculous Rant. The idea that the Southern negroes are still slaves of their white masters is ridiculous rant. If the blacks are abused in the South, why is not the North filled with them? If they are better off in the North than in the South, why do most of them stay in their native States?

It is true that many of them are denied the privilege of voting, and it is an interesting fact that the constitution of all provinces that has been found most efficacious in effecting this denial was borrowed from the fundamental law of the commonwealth of Massachusetts.

Well Said. "The Post" concurs with the Charlotte Observer in believing that a formal investigation by the Senate of the President's trip across the continent with a view of ascertaining whether or not the railroads paid for it, will be getting down upon a very low plane of politics.
