mand an average point at severe as no one head in ton where there are tweeter or more a we that does not have one or more cover that it would be prefitable to still outright. Excellent spring but access can be bought for 8% or less, and the time restured to weigh the milk both inglit and morning is less than one minute per cov. Who is there then, that cannot afford to keep two ords. Hondriff I high man. then, that cannot afford order-Hourd's Dairyman.

Snalls Destroying Corn.

Shalls Destroying Corn.

Many moisture beging animals, the shalls and thousehold lenged eventual have been turn-sails man stress and destructive this summer. It seems quite reasonable to think that the excessive moisture of last year enabled from the real in massant animers. We are now getting reports of shalls injuriant corn, and similar damage was reported list year, says tradeson elimertanid in literal New Yorker. As the shalls length of the says that the enable of pently upon the surface of the plaint and out much like a fating insect, it is reasonable to suppose that they would succumb to a disc of pulson, but some report little surces fresh the application of parts green. I still have faith that they can be effectively poisoned, I should think they could be hand picked with result in a bed of seedlines. They work at night and either has been an over a bed and pick them. In a cura or other larger field I should resert to a disc of poison. A narrow strip of sait seems to keep outsiders from getting into a bed of seedlings.
