to catch the eye on such a walk, or to the U. S. Life Saving Station, maintained by the Government all the year round.

Next on our walk, is Hobb's pier, open all the year round, admission free. The enterprising firm of Pittsburg, Pa. does this as an advertisement...

Leaving the pier we pass in endless succession shops for jewelry, lace, fancy clothing and everything the money can buy.

Shooting galleries, fortune telling, scenic railways, merry-go-rounds, the old mill, catch penny games, all furnish the quota of amusement to their various patrons.

RANDLEMAN COUNCIL NO. 31. J. R. O. U. A. M.

The Great Benevolent and Patriotic Order Takes a Firm Stand in Favor of the Restriction of Immigration.

Randleman, N. C. Nov 10, 1905. Immigration from European Countries during the past year was larger than ever before, and the positive and ever-present evils of unrestricted immigration are so antagonistic to our social condition and the welfare of the wage-earners of the United States that the American people now demand that some barrier be erected, not only against the insane, the criminal and the pauper, but against the COMPETITIVE alien whose product we have been letting in a high protective tariff.

Charitable institutions, prisons and hospitals are crowded with alien and some of the trades, mines and public works are so burdened with the low grade of foreign labor that the American workmen are driven out.

Last year twenty-five million dollars was sent back to Italy by Italians in America and most of it was to assist others to come. Some parts of Southern Europe have become almost depopulated through immigration to United States and in many localities not enough able-bodied men can be found to bury the dead for the reason that all the men and boys are in the United States and every one of them has displaced some American native born or naturalized citizen.

The restriction of immigration has become an economic necessity and should be made a live political issue throughout each Congressional district. The situation is grave and threatening for the life of immigration brings with it the germs of anarchy, crime, disease, and degeneracy and it is an open attack on the very existence of the American laboring men.

Already the character of many parts of the New England States has been radically altered because the fact that the foreign element has driven out the old stock of Americans, which will be the ultimate fate of other portions of our land, and if continued for one hundred years the present race of native born or naturalized Americans will be as extinct as the mound-builders.

Under our loose naturalization laws these ignorant immigrants soon become voters, the tools of corporations, the bosses and the demagogic ringsters, and their votes give the minorities in our great cities, carry the States and thereby decide for us our national elections and policies.

The objects of the Junior Order United American Mechanics has been greatly misunderstood and misquoted. It is not desired that any foreign born person be excluded from this country if his intention in coming here is to make this land his home, to observe her laws and to assist in maintaining the high character of living here we have always enjoyed. The American citizen's manner of life is such that it is absolutely impossible for the American Mechanic to compete with the laborer of every laborer being poured in upon us every year, and this order insists that the American laborer should not only be protected against the articles made by the hands of the paupers in the pauper districts of the European and Oriental Countries at pauper wages, but that we should be protected against direct competition and contact with the pauper laborers themselves in our own land.

This organization is not a labor organization, neither is it a board of mechanics, as its name would imply, but we have a most profound respect for the American laboring man, who is the real supporter of American institutions, and he is object of this order as to one of the American laborer, the American Manufacturer and the American home from the depressing effects of unrestricted immigration. Our record and our intentions are open for the inspection of an intelligent public, and we ever extend the hand of fraternity to all who believe in America and American institutions. We invite all patriotic orders, labor organizations and religious societies to join us in this campaign.
