"Hit in the Belly With a Pone of Bread."

The Southern Republicans have no bread except Federal patronage. They care nothing for the opinion of the people in their own State. Washington is their meca. If they can obtain approval there they are happy. Brownlow has been dishappy. Brownlow has been dis-tributing the patronage in Tennessee and the fellows who haven't had their slice of pie are after his scalp. They have held a meeting and adopted resolutions against the "ignomin-ous despotism" of Brownlow. The only thing that will make them quiet will be to "hit them in the ing for a peice of pie.—News & Observer.

How to Make a Not-Sed.

The location of the hot-bed is an important matter. It should be on well-drained soil, well sheltered from wind and fully exposed to the It should be near the house, for convenience.

Fresh manure from the horse sta-ble, mixed with litter from bedding, is the material most generally made use of to furnish the heat needed in the hot-bed. A pile of this material is spread on the place selected for the hot-bed, covering an area somewhat larger than the bot-bed itself is intended to be. It is thrown on the ground in layers of a few inches in depth. Each layer is trod down firmly before another is added. The pile should be finished off by rounding it over. Leave it in this condition for a few days, until er-mentation sets in. This can be told by a warm moisture which will be by a warm moisture which will be rising from it. It should then be forked over, shaking out the long forked over, snaking out the long straw as this is done, and making another heap of it, as at first. In two or three days it will again give evidence of further heating. After this, it is in condition for final dis-position in the bed. As the manure now thrown into shape, it should packed down well, making it as uniformly compact as possible. There should be about two and a
