

CONVINCING ARGUMENT.

(Continued From First Page)

Washington, and their party refused to its great war idol, Gen. Grant.

People Applaud Democratic Movement Adopted.

Why is Roosevelt popular? Almost entirely because he has thrown overboard a lot of Republican principles and adopted a lot of Democratic principles. Because on the railroad, the trust and the arbitration questions he has got at least one foot on the Democratic platform. No Republican platform has declared for any of the things he has done. With respect to these—every one of them has been demanded in recent Democratic national platforms. He got his mandate for settlement of quarrels between capital and labor by arbitration from the Chicago platform and the plank was written by the great chieftain of Democracy, W. J. Bryan. He got only half way on our platform as to railroad rate legislation. We demanded that the railroads be put in the hands of the Interstate Commerce Commission with full power to act and bind. Roosevelt and his party said it was all right to put the railroads in the hands of the Commission, but that the Commission must be put in the hands of the Federal Courts, and they amended our platform and put it there.

We hear a great deal of talk about what is the chief issue between the parties. I am not engaged in fixing paramount issues—the people make the issues, not the politicians.

There are times when the people seem to go out of politics and leave the politicians to have their own way and let things drift, but when they wake up their minds to take a hand they push the politicians aside and take things in their own hands.

During the last eight or nine years on account of the great crops and the discoveries of gold in Alaska and the Klondike, the people have been so prosperous that they have given little attention to politics and let the politicians have their way. During this time the country has been honey-combed with private monopolies. At last the people have waked up and have begun to take an inventory of what has been going on. They have waked up to the

Tariff Legislation an Imposition.

fact that the Republican party has put upon them tariff grossly in excess of what is needed for revenue or for protection. They have waked up to the fact that through the tariff, trusts and monopolies have multiplied until they control three-fourths of the entire industrial output of the country. They have waked up to the fact that these tariff created monopolies, while they have actually reduced the price of their products to the foreigner, have increased their price forty-seven percent to the home consumer. They have waked up to the fact that these great combinations, have, through the Republican party, which they absolutely control, obtained control of their National Courts and Legislature, and they have made up their minds that the time has come for a settlement, and that until these freebooters are made to take their hands off the throat of the Government and out of the pockets of the people, and all other issues must go on the side track and wait.

It is a fight to the finish against special privilege and that fight will not end until the last private monopoly in the United States is dissolved or suppressed.

Under the Republican party, competition, the fundamental principle of trade, has been stifled and destroyed. There is no competition between the railroads. There is no competition between the corporations that constitute the great combinations controlling seventy-five percent of our entire industrial products. Nobody competes except the farmer, the laborer, the merchant and the manufacturer not in the trust.

Republicans may propose false issues as they have done so many times before to divert the minds of the people but they will get but scant hearing until competition is restored and the reign of monopoly is destroyed.

Democrats Not For Free Trade.

They charge the Democratic party with being in favor of free trade. The charge is false. The Democratic party has never framed and passed or attempted to pass a bill to raise the revenue to meet the need of the Government which did not impose a tax upon foreign products sold in this country of at least twenty-five percent. Advalorem which is more than sufficient to make up the difference between the labor cost here and abroad. Secretary Shaw in his speech recently made in North Carolina contends that but for our tariff the foreigner

could sell his goods in this market at fifteen per cent. less than we could sell them, thereby admitting that a tariff of one-third the amount of our present tariff would be sufficient to protect the American laborer and producer against the foreigner.

The Democratic party is not in favor of free trade. The Democratic party recognizes the fact that about one-half the expenses of the Government must be paid by customs duties and that tariff taxes are necessary, but what the Democratic party does insist is that a product which can be made cheaper in the United States than elsewhere needs no protection. It does insist that a product which can be made in this country and sold abroad at a fair profit in competition with the balance of the world, needs no protection, and it contends that if a product cannot be made as cheap in this country as elsewhere that it needs no greater protection than is necessary to make up the difference between its cost elsewhere and here, and that any tax upon foreign products which exceeds the difference between the labor cost and the material cost of that product here and abroad is not a tax either for the revenue or for protection, but it is a tax for bounty and that the bounty so provided by law is a bounty which the American consumer is compelled to pay to the American producer.

That such a tax is in effect the taking by law of a part of one man's earnings and giving it to another man and that it has resulted and will always result in an unequal distribution of the wealth and prosperity of the country.

Against Special Privileges.

We hear a great deal about prosperity as the result of the Republican tariff law. Well, we have prosperity, but it is a mighty unequally distributed prosperity. Under these laws we have a forty-seven percent prosperity for the trusts and a six percent prosperity for the balance of the people.

What would you think of a law in North Carolina which allowed one class of our people to charge forty-seven percent interest and the balance only to charge six percent interest? That is what the Republican tariff law does—it permits the trusts and monopolies to charge their American customer forty-seven percent profit upon their investment, while the farmer and the laborer must content himself with six percent.

The Democratic party says that six percent profit is a healthy profit and a good thing, and that a forty-seven percent profit is unhealthy and is a bad thing, and it declares that the people cannot get their just share of the general prosperity as long as the trusts are allowed to take forty-seven percent of it.

Trusts Favored by Republicanism.

Of all the tricks and devices devised by human ingenuity, not even excepting the green goods and the gold brick scheme, the Republican tariff is the most effective in juggling money out of the hands of the man who earned it and putting it into the hands of men who did not earn it.

To illustrate, let me call your attention to the steel trust. This is one of the greatest trusts in this country.

Steel Trust an Example.

Steel and iron is one of the highest products named in the Dingley bill, yet steel and iron can be made cheaper in the United States than anywhere else in the world. That fact was admitted on the floor of the House by one of the leading champions of the product. It was admitted in the sworn testimony of the trust magnates before the Industrial Commission. It was admitted by Mr. Schaub, one of the leading stockholders and managers of the steel trust. It was admitted by Mr. Tom Johnson and Mr. Johnson himself is one of the largest manufacturers of steel in the country.

That steel can be made cheaper here than elsewhere and needs no protection, is conclusively shown by the fact that last year one hundred and sixty million dollars worth of American steel and iron goods were sold abroad in competition to the cheapest made steel in the world. The steel trust not only under-sells the steel of other countries in foreign markets, but it sells steel and iron in other countries for about eight dollars per ton less than it sells it to our own people.

Some time ago two railroads were built, running nearly parallel, one in Canada and one in the United States, on which steel rails, furnished by the American steel trust were used. They charged the American railroad twenty-eight dollars per ton and the Canadian railroad twenty dollars per ton.

Republicans tell us that the foreigner pays the tariff and that the tariff is for the benefit of the American. The illustration I have just given you looks very much like the American pays the tariff and that

the tariff is for the benefit of the foreigner.

There are thousands of trusts doing the same thing every day as the steel trust is doing, and I only sight the steel trust as an illustration.

You have heard of the Ship Subsidy Bill. I wish to call your attention to it now because it gives point to what I have just been saying. Some time ago Congress appointed a Commission to investigate questions connected with the restoration of the American Merchant Marine, which, under the Republican party, has dwindled until less than five percent of our foreign commerce is carried in American bottoms as against two-thirds under the old Democratic regime before 1860. Ship builder after ship builder appeared before the Commission and testified that they could not build American ships in competition with foreign ship builders, because, they said, that iron and steel constituted the chief material in the construction of ships and that our American iron and steel manufacturers supplied their foreign competitors with this material for less than they would sell it to them, and they alleged, because of the tariff they could not buy material in the foreign markets.

People Pay Bounty to Ship Builders.

To meet this situation the Republicans, instead of taking off the tariff on iron and steel used in the construction of American built ships introduced a bill to tax the American people to raise a bounty for our ship owners to overcome this discrimination between the American ship builders and their foreign competitors.

Steel and iron are almost as necessary in this age as salt. Every household is full of it, every cultivated field is full of it, every factory is full of it.

And though it can be made cheaper here than anywhere else in the world, under the Republican tariff, our people have to pay the trusts in addition to a fair profit a bonus of eight dollars per ton for every ton they use. Just as the ship owner has to pay them more than they are charging his foreign competitor.

As it is with the steel trust, so it is with all the other multitudinous trusts which have grown up under the Republican tariff.

Trusts Must Be Suppressed.

The question is, what are we going to do with the trusts? The Democratic position is simple. It is at war with them. It says they must compete as other people have to do or they must be dissolved and suppressed.

The Republican party, on the other hand, is in collusion with them. There exists between it and them the relation of parent and child. They are the outgrowth of its tariff laws. They live upon tariff patronage dished out to them by the Republican party in such measure as they demand. When the Dingley tariff was passed we had but few trusts in this country, there was not quite one billion dollars invested in them, and most of these were trusts which had grown out of patents or railroad rebate favoritism. Today we have hundreds of them and something over fifteen billions of dollars are invested in them. They control seventy-five percent of our industrial output.

The Republican party says that the remedy for the trusts is to regulate them through the Courts. Roosevelt says that the remedy for them is to regulate them through the Courts. Can the trusts be controlled or suppressed through the Courts?

Republican Effort Futile.

Foreigners outside the President has posed before the country as a great "trust buster." In that time no trust has been broken. No trusts have gone out of business and no trust has destroyed the value of its product.

The press bureau of the administration has kept the papers for the last year full of accounts of investigations, prosecutions, trials and convictions, etc. of trusts. From the noise that has been made, one would have supposed that the President was filling the penitentiaries with trust magnates, and yet there have been in all this time, despite all this noise, but two convictions. The defendant in one of these cases was a small fellow and was sent to jail for a short term. In the other case the defendant was the beef trust with its millions. They were let off with a fine of \$15,000, which in proportion to its ability to pay was no more than a penny and the costs would be to the richest man in this country. Of course, the beef trust paid the fine and is still doing business and charging trust prices. Indeed the papers announce it has just arbitrarily advanced the price of meats, while the price of beef cattle has gone down.

The Democratic party says the way to attack the trusts is through the tariff. It says they were created

by the tariff and that the power which creates can destroy.

Revision of Tariff Necessary.

Republican orators tell us that protection is a great thing, that it has made New England rich and on account of our raw material and growing manufacturing interests it will make the South rich.

If the protective tariff has made New England rich, it has made it rich at the expense of the South and the West, upon which their trust protected industries have levied and collected for private uses ten times as much taxes as the Government has levied and collected for public uses. I deny that protection makes a people rich. It has indeed made the trusts and monopolies which it has created rich beyond the dreams of avarice, but the trust billions mean not more but less prosperity for the millions.

If Republican protection could make a people rich and prosperous, we have but few things in North Carolina that are benefited, or could be benefited by protection.

We make some wool in North Carolina, and wool is highly protected by the tariff. I had occasion a few days ago to investigate it and I found that we consumed in North Carolina about twenty-four times as much wool as we make. So that for every dollar we make by the tariff on wool grown in North Carolina, we pay twenty-four dollars for the wool and woolen goods that we buy from the outside.

We produce some iron ore in North Carolina and iron is highly protected by the tariff, but we buy in household cutlery, in farming implements, in the machinery in our mills and factories, in iron for bridges and railroads probably several hundred times more iron than we make. So that for every dollar we receive from the tariff in this way, we spend several hundred on account of the tariff in the purchase of products on iron.

We make some coal in North Carolina. Coal is also highly protected by the tariff, but we buy and consume in North Carolina several hundred times more coal than we make, so that for every dollar we make by the tariff on our coal, we pay out through the tariff on coal we buy several hundred dollars.

Lumber is protected by a duty of two dollars, but on account of the great demand for lumber, and the scarcity of lumber, two dollars a thousand is no protection against foreign competition as is shown by the fact that last year forty-three million dollars worth of lumber was imported into this country against

fourteen million when lumber was free.

The cheap grade of cotton goods which our Southern mills make is protected by the Republican tariff, as it was by the Democratic tariff, but the fact that our Southern Cotton Mills sold thirty millions of dollars worth of their products in China last year in competition with the European manufacturers at prices so satisfactory they are anxious to enlarge that trade, shows that they need but little if any protection against their English, French or German competitors. More than that the high prices which they are compelled, by reason of tariff, to pay for their machinery, etc. does, probably more than balance any possible benefit to them of the duty on cotton goods. Surely they do not need greater protection than forty-three percent provided in the Wilson Democratic Tariff Bill.

What else have we in North Carolina that is protected? Why there is mica and bull calves and their hides. From the way Republican orators in this State have been in the habit of enlarging upon the benefits of protection on mica, I once thought we must produce millions of it. Some time ago I made an investigation and to my astonishment I found that in 1901 we produced only \$101,000 worth of mica. I do not think we are producing much more now.

And now Secretary of the Treasury Shaw tells us that the hides of our bull calves are only half protected by the Republican tariff. They are protected when the New England shoe trust wants them to make high priced shoes for their American customers, but they are not protected when the New England shoe trust wants hides to make cheap shoes for their foreign customers. This is a fair sample of the way in which the tariff favors the trusts as against the farmer and the stockraiser. If the farmer happens to be given a little protection under it, it is taken away from him if his interests happen to clash with that of the trusts.

Agricultural Pursuits Affected.

Now eighty per cent of all our people are engaged in agriculture, raising cotton, corn and wheat—they get no protection from the tariff, but they are tariff payers. They sell their products at home and abroad at the prices which they are purchased in the open markets of the world. There was a time when our cotton farmers thought that the tariff had something to do with the price of cotton, but they know better now. They know if cotton rises a cent today in Liver-

(Continued On Next Page)

The Cause of Many

Sudden Deaths.

There is a disease prevailing in this country most dangerous because so deceptive. It is called Sudden Death. Many sudden deaths are caused by it—heart disease, pneumonia, heart failure or apoplexy are often the result of kidney disease. If kidney trouble is allowed to advance the kidney-poisoned blood will attack the vital organs, causing catarrh of the bladder, or the kidneys themselves break down and waste away cell by cell.

Bladder troubles almost always result from a derangement of the kidneys and a cure is obtained quickly by a proper treatment of the kidneys. If you are feeling badly you can make no mistake by taking Dr. Kilmer's Swamp-Root, the great kidney, liver and bladder remedy. It corrects inability to hold urine and scalding pain in passing it, and overcomes that unpleasant necessity of being compelled to go often through the day, and to get up many times during the night. The mild and the extraordinary effect of Swamp-Root is soon realized. It stands the highest for its wonderful cures of the most distressing cases.

Swamp-Root is pleasant to take and is sold by all druggists in fifty-cent and one-dollar size bottles. You may have a sample bottle of this wonderful new discovery and a book that tells all about it, both sent free by mail. Address, Dr. Kilmer & Co., Binghamton, N. Y. When writing mention reading this generous offer in this paper. Don't make any mistake, but remember the name, Swamp-Root, Dr. Kilmer's Swamp-Root, and the address, Binghamton, N. Y., on every bottle.

Surprise Party.
