ton county, and a lady of calture and prominence, has this to say of the treatment of cancer with Swift's Specific:

Over fifteen years ago a cancer made its appearance on my face. It was treated with plasters, and the core came out. The place healed up after some time, and seemingly my face was well. However, in a few years it returned again with more violence than ever. It gave me a great deal of pain. The former remedy seemed to do it no good. Knowing the disease to run in the family, having had one sister to die with cancer, I became seriously approhensive of my condition. It continued to increase in size and virulence. I thmost gave up all hope of ever being cured. The physicians advised the use of the knife and caustic. This was more than I could bear, and refused to have it operated upon in that way. All other remedies were used, but the cancer continued to grow worse. The pain was excruciating, and my life was a burden. In this extremity my son, Dr. Hardman, recommended me to try Swift's Specific. It was the last resort, but I was so prejudiced against the use of patent medicines, and especially this one, that I hesitated some time. At last I gave my consent, not believing there was any virtue in it. The first bottle only increased the size of the sore and the discharge from it, and hence did not inspire me with any hope. On taking the second bottle there were signs of improvement. The spot began to decrease, as well as the discharge, and hope sprang up in my heart. Could it be, I asked myself, that I was at last to be released of this disease? It has given me so many dark hours in the past that the idea of being well again almost overpowered me. There was a contest between hope and fear for a long time. It was a long night of weeping, but joy came with the merning. There is nothing left to mark the place but a small scar, and I feel that it is impossible for me to express my gratitude for this great deliverance. It is a wonderful medicine.
