A SAD OCCURRENCE.

How an Unexpected Breaking down Revealed the Danger Hanging over many of our Leading

A nicely dressed gentlemen was walking along Pennsylvania Avenue, in Washington a few days since, and without any warning fell upon the sidewalk in a state of insensi bility. He was placed in an ambulance and sent to the hospital, where, upon examina-tion, it was found that he had not been overcome by the heat, but that, although in apparently perfect health, his system had become so reduced in tone that nature was forced to give way. Such cases are becommight be noted in many other cities in the East, while the Western cities have increased in even greater ratio.

The fact is nearly every man, woman and child needs something to sustain and build up the life nearly all the while. But it must be something that is nerve-building, blood-making and health-giving. Such a preparation has been found in Votina Cordial which is becoming so wonderfully popular. It is a rare combination of strengthening and healing ingredients and is superior to any known preparation of modern times. The amount of albumen it imparts to the system is simply wonderful. For overworked man. is simply wonderful. For overworked men delicate women and sickly children it come not only as a tonic, but as a food. It re-vives the life that is at low ebb.

There is no season of the year when the vital forces of life do not require to be most carefully guarded. Intoxicants are injurious; adulterated and badly prepared food clog the system without nourishing; but albumen not only sustains life, but adds a vigor and force that are simply wonderful. Few men and fewer women realize how vigor and force that are simply wonderful. Few men and fewer women realize how great a discovery this Volina Cordial is; but it is gratifying to know that thousands are understanding it, and taking advantage of the opportunities offered by its introduction, and we look for grand results from its use in the renewed life and activity of the American are the summary of the control of the control
