## How to Prolong Life

No man or woman can hope to live long if the Kidneys, Bladder, or Urinary Organs are diseased. Disorders of that kind should never be neglected. Don't delay in finding out your condition. You can tell as well as a physician. Put some urine in a glass or bottle, and let it stand a day and night. A sediment at the bottom is a sure sign that you have Kidney

disease. Other certain signs are pains in the small of the back—a desire to make water often, especially at night-a scalding sensation in passing it-and if urine stains linen there is no doubt that the disease There is a cure for Kidney and Bladder Diseases. If not, do not delay longer, as the days of the exhibition are limited. It will pay anyone to see the luxuriant growth of hair worn by the ladies in attendance, which, by the way, was produced by the use of the highly meritorious preparations they represent, and was not in-

herited, as some people think.
The ladies will cheerfully give to all visitors, free of cost, any information desired regarding the necessary treatment of the hair and scalp to produce the best results.

It costs nothing to see this great exhibition, so why not come today? Everybody is invited.

#### CURRENT MISCELLANY.

The use of the diamond saw for cutting stone is facilitating the erection of the buildings for the exhibition of 1900 at Paris. This new circular saw is due to Felix Fromholt, a Parisian engineer. The diamonds which form the cutting teeth of the saw are common crystals, worth about 10 shillings a carat, and they are fixed in a steel disk over six a spindle, and revolved by steam power

For sawing hard stones there are 200 diamonds in the cutting edge, and the speed is 800 turns a minute. It ad vances into the stone about a foot in that time. For soft stones the teeth are turns a minute the saw advances about a yard in that time.

The new saw has been at work in the workshops of the Champs Elysees for several months and has given every sat isfaction. It cuts and dresses the stone on all sides and gives it sharp outlines. Moreover, it does so at one-eighth to one-tenth the cost of hand labor. A sav of this kind with an alternative move ment, sawing stones four to six feet high, is to be set up. Evidently this new implement has a future before it and may be recommended to the atten tion of stonecutters in this country, es pecially the granite workers of Scotland -London Globe.

### The Travels of a Bottle.

When the Natal volunteers were re turning from England after having taken part in the jubilee celebrations. Sergeant T. M. Owens of the Nata carabineers, in the presence of the rest of the company, scribbled a note, in closed it in a bottle, sealed the bottle and threw it over the ship's side Thi incident took place on Jane 5, 1897. while Umfuli was off the coast of Spain. The other day Mr. Owen received a copy of the Bartados Advocate of June 18, 1898, containing the following paragraph under the heading of

"This is from Lighthourner's main notes, St. Thomas: A bottle contain ing the following was picked up by James Pen on May 12 at the island of Great Guawanas, northeast of Eortola June 5, 1897. This paper is thrown into the sea by the Natal volunteers, about 16 degrees longitude, 30 degrees latitude, with the cornesity to learn if it will ever reach land. T. M. Owen, Maritzburg, Natal.

The bottle, it is calculated, traveled over 3 000 miles between the time it was consigned to the waves and when it was picked up in the West Indics. It would seem to have taken almost a straight course across the north Atlan tic ocean, following the trade route from England to South America. The time occupied was nearly 12 months. A Heavy Tone in Cotton-Operations Show 3 to 4 Points Concession from Saturday's Close.

By Direct Private Wire to W. P. Hill Broker 48 Patton Ave.

New York, Feb. 23 .-- Our market op ened strong with considerable buying. However, very heavy offerings came in and brought reactions in many cases. There were many quite sharp reactions. Around noon the market became firmer with a good demand for the Anthracite and Granger and Tobacco on report that a settlement had been effected with the opposition boomed in an excited manner. Later a failure of Burlington directors to take action on the refunding scheme brought about a sharp decline in which the Grangers and Sugar were the most prominent. The exceptions were American Tobacco, Federal Steel and Wire issues which held strong.

### THE CREATABLOOD REMEDY.

Catarrh is due to an impure condition of the blood and be one of the innumereus offsprings of blood poison. It may have come from a long way back in the family history, but the general opinion among medical men, is that catarrh is the offshoot of poisoned blood, producing bad breath and the above named symptons. The fact is admitted by all that it is only curable by constitutional treatment. Botanic Blood Balm (B. B. B.) has scored some brilliant victories in the cure of this loathsome malady, and why? Because B. B. B. when taken as directed mixes with the poisons in the blood which produc catarrh, so as to cause the poison to be expelled from the blood through the sweat glands and excretory organs. R. R. Saulter, Athens, Ga., wrote us not long ago that he was surprised to observe how agreeable his breath had become since using only three bottles of B B. B. He was also able to hear better. Mrs. Lulu Banks, of Alabama, wrote us that a friend of hers since using six bottles of B. B. B. that the mucus discharges which she had through the mouth and nose had stopped and that she was able to breathe freely and talk without offending any one with her bad breath. A remarkable case is that of Mrs. Elizabeth Knott, of Atlanta, which we print in full
