We have private advice from Senator Pritchard that he has obtained the consent of the postoffice department to make a trial of his plan for free rural delivery of the mail at four places in Western North Carolina. It is one of the places selected for this plan. We don't know the scope and extent of free rural delivery. It is an experiment of the postal authorities with the end in view to determine if it is permanent if these experiments prove successful. Senator Pritchard, who always looks ahead for his constituents, is to be congratulated on his success in this matter.—Murphy Republican.

Labor Commissioner Benjamin R. Lacy says regarding the labor situation in North Carolina, "I think there is as little ill-treatment of labor as in any state. The industrial conditions here are about the best in the nation. Nowhere is there less friction between employers and employed. There are no strikes and no reports of troubles in any of the industries. I will urge the labor commission to use the report of the labor commissioner for 1935 in his work. It is an admirable industrial report."

Mrs. Michael Curtain, Plainfield, Ill., makes the statement that she caught cold which settled on her lungs; she was treated for a month by her family physician, but grew worse. He told her she was a hopeless victim of consumption and that no medicine could cure her.
