WORK OF HEAVY STORMS IN COLORADO AND WYOMING

Two Weeks of Almost Constant Snow -Trains Blockaded and Stalled

Denver, April 16.—The storm of rain and snow that began Saturday night continued today with increased severity. It is accompanied by a gale. The precipitation for the month up to date breaks the April record since the establishment of the weather bureau there in 1872. The storm covers the eastern parts of Colorado and Wyoming, the northern part of Mexico and a Mr. Foss, of Illinois, Speaks most out of its banks.

Similar conditions prevail in the Gilpin and Clear Creek county mining districts. The snow is from two to six feet deep on the eastern slope of the mountains. At Denver and on the plains the snow melts almost as fast as it falls. Owing to the soft roadbeds railroad trains are running cautiously and incoming trains are arriving several hours late. On the divide between Denver and Colorado Springs, and in some mountain canons trains are stalled in heaps of snow, which is so heavy that plows buck it with little effect.
