SPRUCE UP A LITTLE.

After housecleaning don't put back all the old furniture in the same old places. That makes life too monotonous. If you can't afford a lot of new furniture, get a little. It will be a great comfort and relief. But we're selling it so cheaply nowadays that we think you can afford to get a lot if you want to.

THIS MORNING'S NEWS.

This morning at 8 o'clock the federal census enumerators will begin taking the census all over the United States. The mighty army of enumerators which has been named begins work on a census supervisor in every congressional district in the union.

Four New South Wales lepers have been treated by the leprosy serum method devised by Dr. Juan de Dios Carrasquilla of Bogota and declared by him to have been successful in 100 cases. The Australian doctors, however, declare that after a careful test they were unable to detect any improvement and that the disease continued its progress in the patients.

It is said that a naphtha pipe line 160 miles long has been laid by the Trans-Caucasus Railway company.

The American forestry building has been sent from Chicago in sections to Paris. It is probably the first time that an American building for exhibition purposes has been shipped across the Atlantic.

Lord Rosebery, who was for so long a time regarded as the "boy" of the political world, has now completed his 53d year. When a boy at Eton, it is said, he declared he would marry the richest heiress of the year, win the Derby and become prime minister, all three of which ambitions he has achieved. His wife, who died in 1890, was the daughter of Baron Meyer de Rothschild.

Many people object to the use of nuts, but the criticisms really apply to the misuse, not to the use, of these valuable foods. Nut meat as a food is three or four times as heavy as roast beef or steak, and when nuts are eaten with the fruits after a meal they are far too complex and heavy they certainly do act as if they resented being in bad company, says Health Culture. This is not the fault of the nuts, but of the diner. Moreover, nuts must be thoroughly masticated, and this, with the average human teeth, is an impossibility. When properly ground and cooked, however, and eaten with bread or fruit, nuts form a most valuable article of food and a perfect substitute for nitrogenous animal foods. A combination of scientifically prepared nuts and fresh or cooked vegetables comes not far from being a perfect dietary for mankind.

A wrought-iron gas main, 23,015 feet long and 3 inches in diameter, is in use between Phoenixville and Royerford, Pa. The gas is conveyed under pressure of twenty pounds.

As the seasons come and go the Swiss birds make their pilgrimages south and in going and returning cross the land of northern Italy and the Swiss canton of Ticino, and they are mercilessly pursued by hunters of all ages and all classes. On the lake of Maggiore it is estimated that at least 60,000 feathered songsters are trapped and killed every year and in the regions around Bergamo and Brescia many millions are slaughtered to satisfy the demands of tables and of the millinery establishments of the world.

Put not your trust in kings, or in men who break their pledges.

No man who is opposed to trusts can lend his support to the Simmons combination suffrage monopoly.

The supreme court pays Admiral Dewey a number of compliments, declaring the battle of Manila bay was one of the century's bravest feats of arms, and cuts down his bill for prize money from \$20,000 to \$10,000.

Now that a campaign is again about to open in Kentucky a "warrant" is issued against W. S. Taylor for the part he failed to take in the killing of Goebel. The Kentucky Goebelites will not let their reputations cool off.

The Infamous Liar (official title) is evidently also lacking in nerve. He may recover after thirty-six hours, but he failed to rise to the emergency yesterday. The time to return a compliment is right away or not at all.

"The ballot must be kept intact, un-mutilated, uncorrupt," says the pious Wilmington Messenger of red shirt fame. How many intact, un-mutilated and uncorrupt ballots were cast for Waddell for mayor in 1898? When a government is stolen by force it is bullets and not ballots that count.

AT HIS OLD TRICKS.

James H. Pou, who preceded F. M. Simmons as chairman of the democratic state committee, and who, in October, 1898, made affidavit before a notary public that if the democrats got into power it was not their purpose to disfranchise any illiterate voter, negro or white man, is now canvassing the state in the interest of the disfranchisement amendment. In one of his speeches this week he made the following statement:

"Our amendment has not in it the word negro—it does not mention him. It discriminates against the negro's characteristics without calling his name. That amendment is submitted to the people for ratification. It is the issue of this campaign."

Here in a nutshell is the whole argument for the constitutionality of the amendment. But how much easier it would have been to have declared that no man of "kinky" hair and flat, wide nose should vote at any election in this state. This would not have named the negro, but would have described some of his "characteristics." But the constitution of the United States also does not mention the word "negro," but does say:

"The right of the citizens of the United States to vote shall not be denied or abridged by the United States or by any state on account of race, color or previous condition of servitude."

There is no getting around this by any trick that will deceive the United States supreme court. Pou in his speech declares that the purpose of the proposed amendment is to disfranchise negroes and not disfranchise a single white man—the very thing that the constitution says shall not be done. This eminent member of the Organization tried to fool both negroes and white voters in 1898. He has thrown off a part of his mask and is confining his efforts now to fooling white men.

RED SHIRT ELEMENT REPUDIATED.

We learn from the democratic papers of Wilmington that the democrats of Brunswick county at their county convention last week, kicked out the Simmons machine "red shirt" element and nominated a ticket satisfactory to the populists. Their nominee for the legislature openly declared against the amendment and in favor of fair and honest elections. These are the kind of democrats we like to see.—Hickory Times-Mercury.

JUDGE SPENCER B. ADAMS.

Elizabeth City North Carolinian. Hon. Spencer B. Adams, the republican nominee for governor, is a typical cultured North Carolinian. Indeed, the republican party could not have found a more representative man, one that is in closer touch with the people and who has their interests more at heart. He is truly "one of the people." From childhood he has led a life of toil and of business. From the farm to the superior court clerkship, from the clerkship to the judges bench, and from thence on an active practitioner of the law. His life and profession have especially fitted him for the position to which his party has called him.

Judge Adams is one of the most forcible speakers in the state and will make a thorough canvass, and will prove an able leader in this great campaign of manhood suffrage.

The Band Played On.

Said Simmons to the people

Not many months ago,

"No man will be disfranchised

"By the democrats, oh no!

"The one who so proposes

"We'll expectorate upon,

"'Tis republican bamboozle,"

And the band played on.

Says Aycock to the people,

"The poor man cannot vote,

"Nor can the man who has no time

"To learning to devote :

"We'll put them with the 'nigger'

"Whose rights are good as gone,

"Red shirts will do the business,"

And the band played on.

Poor Aycock! Simple Simmons!

You are dumb as dumb can be,

Don't you know the "Tar-heels" always

Fought like fiends for liberty?

Have your fun, and do your shouting,

Till the breaking of the dawn,

And in August 'twill be funny

If the band plays on.

—FRED C. MATTIS.
