

THE ASHEVILLE GAZETTE 1900.

An Advocate of Popular Rights as Distinguished from Ring Rule in North Carolina.

THE ASHEVILLE DAILY GAZETTE WILL BE GREATLY IMPROVED IN THE PRESENT YEAR AS A NEW SPAPER TO WHICH THE PEOPLE OF NORTH CAROLINA CAN LOOK FOR THE NEWS OF THE WORLD AND THE NEWS OF THEIR STATE THAT MAKES THE HISTORY OF EACH DAY.

Full Telegraphic Service of General News from the Laffan News Bureau (N. Y. Sun).

THE DAILY GAZETTE HAS A SPECIAL CORRESPONDENT AT WASHINGTON FROM WHOM IT OBTAINS IN ADDITION TO ITS REGULAR PRESS DESPATCHES ALL THE NEWS RELATING ESPECIALLY TO NORTH CAROLINA INTERESTS AS DEVELOPED AT THE NATIONAL CAPITAL.

THE STATE NEWS SERVICE OF THE DAILY GAZETTE DURING THE YEAR WILL BE ENLARGED AND RENDERED SO COMPLETE THAT ITS READERS CAN KEEP FULLY INFORMED OF THE TREND OF EVENTS IN NORTH CAROLINA.

IN THE POLITICAL CAMPAIGN OF THE YEAR IN NORTH CAROLINA, THAN WHICH NONE MORE VITAL TO THE INTERESTS OF THE STATE HAS CONFRONTED ITS PEOPLE, THE GAZETTE WILL ACTIVELY ESPOUSE THE MAINTENANCE OF A REPUBLICAN FORM OF GOVERNMENT AND OPPOSE AND EXPOSE THE EFFORTS OF THOSE WHO AIM TO DESTROY THE SUFFRAGE RIGHTS OF CITIZENS IN VIOLATION OF THE CONSTITUTION AND TO ESTABLISH A POLITICAL OLGARCHY BY MEANS OF LEGALIZED FRAUD AT ELECTIONS.

IN THE DISCUSSIONS OF THE VITAL POLITICAL ISSUES OF THE CAMPAIGN THE GAZETTE WILL DEAL IN FACTS, ASSUMING NO POSITION THAT IT CANNOT SUSTAIN BY EVIDENCE THAT WILL APPEAR IN ITS COLUMNS.

THE WEEKLY GAZETTE,

Now in its Fourth Year is an Eight Page Newspaper, published on Thursdays

IT CONTAINS THE CREAM OF THE NEWS OF THE WEEK AND A FULL DISCUSSION OF CURRENT ISSUES AND EVENTS.

AN AGRICULTURAL DEPARTMENT, WITH INFORMATION ESPECIALLY ADAPTED TO FARMERS IN NORTH CAROLINA, WILL BE AN ADDED FEATURE OF THE WEEKLY GAZETTE FOR 1900.

Terms of Subscription.

- Daily Gazette, one year, \$4.00
- Daily Gazette, six months, 2.00
- Weely Gazette, one year, 1.00
- Weekly Gazette with New York Weekly Tribune, one year for both papers....\$1.50

THE DAILY GAZETTE IS DELIVERED IN NEARLY EVERY TOWN IN THE STATE THAT IS ON A RAILROAD ON THE DAY OF PUBLICATION. ITS REGULAR EDITION WHICH IS SERVED TO ALL MAIL SUBSCRIBERS GOES TO PRESS AT 4 A. M., ENABLING IT TO PUBLISH IN ITS REGULAR EDITION LATER NIGHT DESPATCHES THAN MANY OF ITS DAILY CONTEMPORARIES.

MOZLEY'S LEMON ELIXIR.

Regulates the Liver, Stomach, Bowels and Kidneys.

For biliousness, constipation and malaria.

For indigestion, sick and nervous headache.

For sleeplessness, nervousness, heart failure and nervous prostration.

For fever, chills, debility and kidney diseases, take Lemon Elixir.

Ladies, for natural and thorough organic regulation, take Len on Elixir.

50c and \$1 a bottle, at druggists. Prepared only by D. Mozly, Atlanta, Ga.

Gratitude.

Dr. H. Mozly—Dear Since using your Lemon Elixir I have never had another attack of those fearful sick headaches, and thank God that I have at last found a medicine that will cure those awful spells.

MRS. ETTA W. JONES, Parkersburg, W. Va.

Mozley's Lemon Elixir.

I suffered with indigestion and dysentery for two long years. I heard of Lemon Elixir; got it; taken seven bottles and am now a well man.

HARRY ADA ES, No. 1734 First ave., Birmingham, Ala.

Mozley's Lemon Elixir.

Cured my husband, who was afflicted with large ulcers on his leg, and was cured after using two bottles; and cured a friend whom the doctors had given up to die; who had suffered for years with indigestion and nervous prostration.

MRS. E. A. BEVILLE, Woodstock, Ala.

MOZLEY'S LEMON HOT DROPS.

Cures all Coughs, Colds, Hoarseness, Sore Throat, Bronchitis, Hemorrhage, and lung diseases. Elegant, reliable. 25c at druggists. Prepared only by Dr. H. Mozly, Atlanta, Ga.

AN OBLIGING LANDLORD.

Keeps Ferrets to Clear Out the Rats When They Annoy Guests.

"Recently I had an experience with rats that I will not soon forget," said D. B. Purks of Fredericksburg, Va.

"It happened in this way: I was traveling through Alabama and landed in a small town worn out after a day's overland travel in a broken down buggy and sought the only tavern the town boasted. After I had been in bed about 15 minutes I was startled to hear strange and curious noises, the most unnatural in sound I had ever heard. I immediately proceeded to investigate the cause of this midnight disturbance and lit the candle, the only illuminant procurable, and to my surprise beheld ten of the largest rats, in my opinion, ever seen. They ranged in size from an average squirrel to an ordinary dog. Not the least fear was manifested by these rats. They deliberately surveyed me and continued the work of eating my shoes. One large fellow, evidently master of ceremonies, was bold enough to attempt to bite me. This affront was more than I could stand.

"Jumping back into bed, I screamed for the landlord, who, after being awakened from a drunken sleep, slowly shuffled up to this chamber of horrors, dignified as a room, and contemptuously inquired the cause of the racket. After stating the nature of the trouble he 'allowed' he would settle it in short order. In about ten minutes rats poured into the room in droves to the number of about 150, all sizes and conditions, large and small, lean and fat, all squeaking and apparently frightened. I thought something unusual must have transpired, when my suspicions were confirmed by the arrival of several ferrets whose eyes sparkled with glee at the slaughter they proceeded to institute.

"As soon as I collected myself after the execution I hastened out of the room and made myself as comfortable as possible in a chair, waiting for day to break, that I could shake the town. Although I made my escape in carpet slippers, it was one of the happiest incidents of my life. The landlord evidently thought nothing of the occurrence. He said it happened very often, and he always kept a supply of ferrets to clean the rats out when they became unmanageable and too annoying to his guests."—Washington Post.

WOULD NOT SUFFER SO AGAIN FOR FIFTY TIMES ITS PRICE.

I awoke last night with severe pains in my stomach. I never felt so badly in all my life. When I came down to work this morning I felt so weak I could hardly work. I went to Miller & McCurdy's drug store and they recommended Chamberlain's Colic, Cholera and Diarrhoea Remedy. It worked like magic and one dose fixed me all right. It certainly is the finest thing I ever used for stomach trouble. I shall not be without it in my home hereafter, for I should not care to endure the sufferings of last night again for fifty times its price.—G. H. Wilson, liveryman, Burgettstown, Washington County, Pa. This remedy is for sale by C. A. Raysor, druggist.

If you have nothing to give to the poor but a crust of bread, make it palatable by softening it with a little of the milk of human kindness.

A WEALTH OF BEAUTY.

Is often hidden by unsightly pimples, eczema, tetter, erysipelas, salt rheum, etc. Bucklen's Arnica Salve will glorify the face by curing all skin eruptions, also cuts, bruises, burns, boils, felons, ulcers and worst forms of piles.

The most tireless followers of fortune are a man's creditors.

Kodol Dyspepsia Cure

Digests what you eat.

Artificially digests the food and aids Nature in strengthening and reconstructing the exhausted digestive organs. It is the latest discovered digestant and tonic. No other preparation can approach it in efficiency. It instantly relieves and permanently cures Dyspepsia, Indigestion, Heartburn, Flatulence, Sour Stomach, Nausea, Sick Headache, Gastralgia, Cramps, and all other results of imperfect digestion. Prepared by E. C. Dewitt & Co., Chicago.

MAKING BIG LENSES.

FOR TWO CENTURIES PARIS HAS HAD A MONOPOLY OF THE ART.

An Interesting Description of the Delicate and Complicated Process, Which, by the Way, is Surrounded With Much Secrecy.

The making of big lenses has for nearly two centuries been a most jealously guarded monopoly of Paris, the process being surrounded with a good deal of secrecy. The lenses used in the great telescope at the Paris exposition measure 49 inches in diameter, and those of the Yerkes telescope 40 inches, and the story of their manufacture by M. Mantois will give a very good idea of the difficulties the maker of lenses has to contend with.

A crucible of the proper capacity, having been bricked into the oven situated directly over the furnace—the mouth of the crucible only being left exposed—is heated very gradually for about 30 hours or so, when it becomes white hot. It is then ready to receive the glass producing substances. These are thrown in, a small shovelful at a time, and very soon begin to bubble and boil at a tremendous rate.

Were too much thrown in at once the mixture would boil over just like milk and be lost. To fill the crucible completely, therefore, if it be one of some size, takes nearly 24 hours. After it is filled the contents are allowed to go on simmering for another ten hours or so, at the end of which time the crucible resembles a vat of frothy soapuds.

Up to now it has been mere child's play. The real heating has not begun. The furnace being put in full blast, the temperature in the crucibles rises until it is sometimes as much as 3,300 degrees Fahrenheit. At a temperature such as this the lens maker may consider himself fortunate if the bricks of the oven do not melt and the crucible itself crumble away.

Should no such catastrophe occur, however, the period of intense heating is continued for from 20 to 30 hours, during which time small ladlefuls of the seething liquid are taken out every few minutes and rapidly cooled. They have the form when cold of half glass balls, and each of them is minutely examined with powerful magnifying glasses and in every kind of light to see whether it contains air bells. So long as the smallest bubble is detected the heating has to be continued.

At last, when all the specimens have been found to be perfectly free from air bells, the heat of the furnace is reduced, and the liquid in the crucible is skimmed of all the impurities which have risen like scum and are floating on the surface.

Now begins one of the most difficult parts of the process. This is the stirring and mixing. The substances of which glass is composed are always tending to separate from each other while the mass is cooling. This it is that causes the formation of the bubbles. To counteract this tendency, therefore, a stirring rod of clay, raised itself to white heat in a separate furnace, is introduced into the crucible, over which it is suspended by a system of chains and rods in such a way that it can be moved easily in any direction, just as if it were a huge spoon.

The contents of the crucible at this moment are as fluid as water, and the workmen whose task it is to keep the stirring rod in motion have at first only to suffer from the heat. This is so intense that they are obliged to incase their hands and arms in asbestos bags, and even so cannot work for a longer spell than five minutes at a time, when they have to be replaced by others. The perspiration rolls down their foreheads in such streams as to completely deprive them of sight for a time.

As the temperature decreases the contents of the crucible gradually grow thicker and thicker—at first like treacle, then almost of the consistency of dough—the stirring at last being, of course, excessively difficult.

During the whole operation, which lasts on an average from 10 to 15 hours, the testing of specimens for air bells has to go on as before, and if by chance any are found the stirring has to be stopped and the whole boiling process begun over again.

When, however, the stirring is considered to have been continued long enough, the crucible is allowed to cool very rapidly for about five or six hours, until the surface of the contents, being lightly rapped with a piece of iron, gives forth a metallic ring. Were the cooling to be continued as rapidly as it had begun, the glass would be so brittle that at the slightest shock it would fly into 10,000 morsels. The crucible is, therefore, completely walled up and is not allowed to grow cold for at least a fortnight and sometimes, when large lenses are in question, for six weeks or more.

At last the oven is opened and the glass is found lying within the crucible in lumps of varying size. It is very seldom that more than half of each of the blocks of glass taken from the crucibles is free from filaments. The three parts are cut, chipped or ground away and the remaining lumps of pure glass placed in clay molds and put in ovens, the temperature of which is raised to what is comparatively nothing (for glass)—viz, about 1,500 degrees F. The heat, in fact, must be sufficient to soften the glass and make it take the form of the mold. Should it be raised beyond a certain point, so that the glass becomes fluid once more and boils, it is lost.

After it has been molded and cooled, with the same precautions as were adopted in the first instance for the crucible, the lens is roughly polished on the edges, examined with greater care than ever, and, if found free from flaws, is finally handed over to the optician to be polished and made ready for the telescope.

A large lens, it will be clear from what precedes, can only be made from a large block of pure glass, and it is not every day that large enough blocks can be obtained. Lenses, for instance, of a diameter of 49 inches weigh in crown glass when completed over 700 pounds and cost \$15,000.—Pearson's Magazine.

Toasting

WINE OF CARDUI

HEALTHY OLD AGE.

LARUS, BERTON CO. ARK., Aug. 4.
I am 48 years old and have been suffering with Change of Life. I had flooding spells so bad that none thought I could live. My husband got me Wine of Cardui and it saved my life. I am like another person since taking it.
MRS. E. B. TOWNSEND.

Wine of Cardui

It is the devout wish of nearly all people to live to a ripe old age. None of us want to die young. This universal desire can be realized if care be taken of the health in early and middle life. A little precaution then will add many years to our existence. Death can be kept away a long time. Happy, healthy old age will be the lot of the woman who promptly corrects the ailments which afflict her sex. In youth, Wine of Cardui will take the female child safely over the dividing line between girlhood and womanhood. As a wife she needs it to help her through the trials of pregnancy and childbirth with as little discomfort as possible. At the Change of Life it will help her over the dangerous place that appears in her pathway between 40 and 50. Then will come many years of truly blissful existence. She will grow old slowly and gracefully. To the last she will preserve that charm and beauty which are always characteristic of perfectly healthy grandmothers. It is for women alone to decide whether they will be healthy or sick. The remedy for their sickness is close at hand.

A Roll of Paper.

They were coming along Newspaper row, and in front of several of the newspaper offices they saw trucks loaded with the big rolls of white paper on which the newspapers are printed. "Next to the races," said one of the party, "I'll bet that those rolls are the subject of more wagers than any other thing in New York. Everybody wants to bet on the length of the paper unwound." Then they guess at it. I've heard guesses all the way from 1,000 feet to 10,000 feet. Ten thousand, I think, is the highest. As a matter of fact, there are four miles of white paper in each one of those rolls that are being unloaded there." He pointed to a truckload of big rolls.

"There's a bit of information," he went on, "that even the people in the newspaper offices don't know. I know that because I went through two or three offices. They could tell me how much each roll weighed to the fraction of a pound. They could tell me just how many 4, 6, 8, 10 and 16 page papers could be produced from a roll and all that, but they couldn't tell me how long each roll of paper was. I went to the man who made the paper before I found out."—New York Sun.

Philosopher.

"You look happy this morning."
"I am. One of my teeth started aching horribly last night and kept up all night."
"Do you mean to say that makes you happy?"
"It makes me happy to think it doesn't ache me now."—Exchange.

The Chinese ask, "How is your liver?" instead of "How do you do?" for when the liver is active the health is good. DeWitt's Little Early Risers are famous little pills for the liver and bowels. Dr. T. C. Smith.

If a woman is a good cook, she knows the world no apology if she does not show off well in society.—Atlantic Globe.

It is a wise man that knows his own bedside when it is fixed up for an afternoon tea.—Indianapolis Journal.

A bachelor says that a tyrant is a woman who fancies herself superior to her husband—and lets her neighbors know it.

All who suffer from piles will be glad to learn that DeWitt's Witch Haze Salve will give them instant and permanent relief. It will cure eczema on all skin diseases. Beware of counterfeits. Dr. T. C. Smith.

The only difference between a violinist and a fiddler is that one draws a salary and the other doesn't.

In the spring the birds are singing, blades of grass and buds are springing, O'er the meadow the cattle roam. In the spring your blood is freighted With the germs that cause disease, Humors, boils, are designated Signals warning you of these. In the spring that tired feeling Makes you every duty shirk,— Makes you feel like begging, stealing, O'er the meadow the cattle roam. But there's something known that will A man to health and vigor lead. You will find Hood's Sarsaparilla Just exactly what you need.

NOTICE.

Notice is hereby given that application will be made to the general assembly at its next meeting to have the charter of the city of Asheville, N. C., amended so that the city may own, operate and control or acquire an interest in a lighting plant for the city

THE STOMACH OF MAN

subject to a dozen such common but painful affections as cramps, cholera morbus and dysentery, that by neglect may be made chronic and dangerous. The best, handiest, surest and quickest remedy is PAIN-KILLER, a medicine which has been tried for more than a half of a century and never failed to give relief. Avoid substitutes; there is but one Pain-Killer, Ferry Davis'. Price 25c. and 50c.

By virtue of the power of sale vested in the undersigned trustee by a certain deed of trust, bearing date February 1st, 1896, executed by W. B. Merritt and wife, M. J. Merritt, which deed of trust is registered in the office of the register of deeds for Buncombe county, in book No. 38 of mortgages and deeds of trust, on pages 517 et seq., so which reference is hereby made, and by reason of default having been made in the payment of the indebtedness secured by said deed of trust, said undersigned trustee will sell for cash by public auction at the court house door in the city of Asheville, county of Buncombe, state of North Carolina, on Thursday, the 5th day of July, 1900, the land conveyed in said deed of trust lying and being in the county of Buncombe and state of North Carolina, and bounded and more particularly described as follows:

A certain tract of land adjoining the lands of James McNair, G. A. Bartlett and others, beginning on a stake in the road on the north side of the ford of Flat Creek and runs a north course with James McNair's line to J. A. Dougherty's line; thence a east course with said line to G. A. Bartlett's line; thence a south course with G. A. Bartlett's line to Flat Creek; thence up said creek and with the same to the beginning, containing one hundred acres more or less, and being the same land conveyed by L. L. Dougherty to L. J. Brown and subsequently conveyed by T. K. Brown to L. J. Brown by deed recorded in the office of the register of deeds of Buncombe county, in book 68, page 577.

This June 4th, 1900.
